**The Provo International Conference on the Dead Sea Scrolls** Donald Parry, Eugene Ulrich, 2018-12-24 This volume contains the published proceedings of the conference on the Dead Sea Scrolls, held at Provo, Utah, July 15-17, 1996. Forty-three articles, all dealing with various aspects of the Scrolls, are placed under the following divisions: Technology, Editions and Analyses of Texts, The Qumran Community, Calendar, Levi and the Priesthood, Messianism and Eschatology, and Wisdom and Liturgy. The volume offers the most recent scholarship on a number of issues and topics pertaining to the Qumran community, newly translated biblical and non-biblical texts, and technological advances that assist scholars and researchers in accessing and studying the scrolls. The section that pertains to technology, for example, focuses on DNA techniques to analyze Scroll fragments and an imaging radar system that has archaeological applications to Qumran and its environs. Another section addresses the question of how and where the Qumranites lived and speaks concerning Qumran names.

**Cartography in Central and Eastern Europe** Georg Gartner, Felix Ortog, 2009-10-27 The region of Central and Eastern Europe has a rich and long history in cartography. Many important improvements in mapping and cartography have been proposed and performed by cartographers and researchers of that region. The long and outstanding history has led to a lively and vivid presence. Now contemporary methods for depicting the earth and its cultural and natural attributes are used. This book focuses on the contemporary activities in all major realms of cartography in Central and Eastern Europe. It covers aspects of theoretical, topographical, thematic and multimedia cartography, which have been presented at the first Symposium on Cartography for Central and Eastern Europe, which took place from February 16th to 17th, 2009 in Vienna, Austria and was organized by the International Cartographic Association (ICA) and the Vienna University of Technology. The symposium's aim was to bring together cartographers, GI scientists and those working in related disciplines from CEE with the goal of offering a platform for discussion and exchange and stimulation of joined projects. About 130 scientists from 19 countries followed the invitation and visited Vienna, Austria. A selection of fully reviewed contributions is edited in this book and is meant as a mirror of the wide range of activities in the realm of cartography in this region. The innovative and contemporary character of these topics has led to a great variety of interdisciplinary contributions. Topics cover an enormous range with heterogeneous relationships to the main book issues.
