The Chora of Croton 1 Jon Morter,2012-10-03 From 1974 to the present, the Institute of Classical Archaeology (ICA) at the University of Texas at Austin has carried out archaeological excavations and surveys in ancient territories (chorae) in southern Italy. This wide-ranging investigation, which covers a large number of sites and a time period ranging from prehistory to the Middle Ages, has unearthed a wealth of new information about ancient rural economies and cultures in the region. These discoveries will be published in two multivolume series (Metaponto and Croton). This volume on the Neolithic settlement at Capo Alfiere is the first in the Croton series. The Chora of Croton 1 reports the excavation results of a remarkable Neolithic site at Capo Alfiere on the Ionian coast. Capo Alfiere is one of a very few early inhabitation sites in this area to have been excavated extensively, with a full team of scientific specialists providing interdisciplinary studies on early farming and animal husbandry. It provides comprehensive documentation of the economy, material culture, and way of life in the central Mediterranean in the sixth and fifth millennia BC. Most notable are the remains of a wattle-and-daub hut enclosed within a massive stone wall. Unique for this area, this well-preserved structure may have been used for special purposes such as ritual, as well as for habitation. The presence of Stentinello wares shows that the range of this pottery type extended further east than previously thought and casts new light on the development of ceramics in the area.

Rockin' the Classics and Classicizin' the Rock: Janell R. Duxbury,2001-02-05 Rock music of all varieties has been influenced by classical music and vice versa, both in the form of direct quotes and in the form of borrowings of style, composition, and instrumentation. The average listener may be unaware of the many links between rock music and the classics. One might remember a few examples, such as Walter Murphy's chart-topping A Fifth of Beethoven or Eric Carmen's All by Myself, but pass them off as interesting anomalies. However, the influence of the classics on rock music is pervasive and grows from a long line of precedents. This second supplement to Janell R. Duxbury's original 1985 discography, Rockin' the Classics and Classicizin' the Rock, brings the earlier work and first supplement up-to-date with hundreds of new entries documenting recently released or newly discovered examples of the interconnection between these musical genres. Duxbury details nearly 700 new examples of recorded rock instrumentals and songs that borrow musical themes from the classics. Variations range from contemporary renditions of complete classical works to brief classical quotes or phrases subtly incorporated into rock compositions. Duxbury also gives additional examples of recorded orchestral versions of songs originally composed and/or written by rock artists. In these examples, the musical style varies from strict classical interpretations to pop-style orchestral renditions. The second supplement then expands Duxbury's original compilation of sound recordings and live performances of rock groups performing with established orchestras and choruses, selected samples of recorded rock music that simulate baroque or classical sound/structure, examples of the manifest influence of rock on classical music, and instances of rock artists and classical artists switching roles. Lastly, this discography updates the 1985 version and the first supplement with new information, expanded details, and minor corrections to the earlier works. An extended list of selected non-rock background examples is included in several new appendixes. The Preface is updated. A general index includes the names of classical composers, rock artists and groups, orchestras, choruses, orchestra conductors, sound recording producers, and song or instrumental titles. With its incomparable scope and content, this supplement, together with Duxbury's previous discography, and its first supplement will be appreciated by students, researchers, record collectors, trivia buffs, music industry employees, and fans of rock music and the classics.

Enabling Context-Aware Web Services Quan Z. Sheng,Jian Yu,Schahram Dustdar,2010-05-06 With recent advances in radio-frequency identification (RFID) technology, sensor networks, and enhanced Web services, the original World Wide Web is continuing its evolution into what is being called the Web of Things and Services. Such a Web will support an ultimately interactive environment where everyday physical objects such as buildings, sidewalks, and commodities become recognizable, addressable, and even controllable via a mostly ubiquitous Web. This integration of the physical and virtual worlds will fundamentally impact the way we live and in doing so afford tremendous new business opportunities with great human benefit, such as support services to keep the elderly independent, and intelligent traffic management that will cut wasted hours from every day. More efficient supply chains, improved environmental monitoring, better access to health services ... the list is endless. Enabling Context-Aware Web Services: Methods, Architectures, and Technologies compiles the newest developments and advances driving this new age forward. With contributions from leading researchers across the world this pioneering work bridges the gap between context-awareness and Web services. A comprehensive presentation of what's already accomplished and what is possible, the chapters of this book are systematically organized into three major sections: Methods focuses on the principle of context awareness in Web services and various ways to model those services at the specification level. Architectures details the infrastructures, frameworks, and standards needed to build context-aware Web services. Technologies presents a cornucopia of techniques adapted from once isolated research areas including semantic Web, database, and artificial intelligence development, as well as formal methods being employed to improve the development of context-aware Web services. Researchers, engineers, entrepreneurs, and educators across any number of fields will find new ideas worth considering, jumping-off points for developing improved software and applications, and seeds for business ventures that efficiently deliver needed products, information, or services. The possibilities are as limitless as we dare to imagine.

Cover Crops for Sustainable Farming Eric Justes,2017-05-29 This study, based on a literature review and simulations, shows the efficiency of cover crops at catching nitrate in most agriculture situations. It also analyzes both the negative impacts they can have and the ecosystem services they can provide. The introduction of a cover crop between two main crops helps catch the soil mineral nitrogen before the period of drainage and consequently reduces nitrate leaching and nitrate concentration in the drainage water. This study allows quantifying the efficiency of cover crops at catching nitrate and optimizing their implantation conditions over a large range of French pedoclimatic conditions. The presence of high nitrate levels in surface and ground waters, due to excessive nitrogen fertilization and natural production of nitrate by soil organic matter mineralization, is a double challenge for public health and environment protection.

The exchange of ideas between scientists and technicians from both the academic and industrial sectors is essential to facilitate the development of systems that can meet the ever-increasing demands of today's society. This book

brings together lessons learned, current work and promising future trends associated with distributed computing, artificial intelligence and their application to provide efficient solutions to real-world problems. The book includes 29 high-quality and diverse contributions in established and emerging areas of research presented at the symposium organized by the Osaka Institute of Technology, Hiroshima University, University of Granada and University of Salamanca, which was held in Ávila, Spain, from 26th-28th June 2019

Health 4.0: How Virtualization and Big Data are Revolutionizing Healthcare Christoph Thuemmler, Chunxue Bai, 2017-01-07 This book describes how the creation of new digital services—through vertical and horizontal integration of data coming from sensors on top of existing legacy systems—that has already had a major impact on industry is now extending to healthcare. The book describes the fourth industrial revolution (i.e. Health 4.0), which is based on virtualization and service aggregation. It shows how sensors, embedded systems, and cyber-physical systems are fundamentally changing the way industrial processes work, their business models, and how we consume, while also affecting the health and care domains. Chapters describe the technology behind the shift of point of care to point of need and away from hospitals and institutions; how care will be delivered virtually outside hospitals; that services will be tailored to individuals rather than being designed as statistical averages; that data analytics will be used to help patients to manage their chronic conditions with help of smart devices; and that pharmaceuticals will be interactive to help prevent adverse reactions. The topics presented will have an impact on a variety of healthcare stakeholders in a continuously global and hyper-connected world. · Presents explanations of emerging topics as they relate to e-health, such as Industry 4.0, Precision Medicine, Mobile Health, 5G, Big Data, and Cyber-physical systems; · Provides overviews of technologies in addition to possible application scenarios and market conditions; · Features comprehensive demographic and statistic coverage of Health 4.0 presented in a graphical manner.

The Chora of Metaponto 7 Joseph Coleman Carter, Keith Swift, 2018-01-10 The seventh volume in the Institute of Classical Archaeology's series on the rural countryside (chora) of Metaponto is a study of the Greek sanctuary at Pantanello. The site is the first Greek rural sanctuary in southern Italy that has been fully excavated and exhaustively documented. Its evidence—a massive array of distinctive structural remains and 30,000-plus artifacts and ecofacts—offers unparalleled insights into the development of extra-urban cults in Magna Graecia from the seventh to the fourth centuries BC and the initiation rites that took place within the cults. Of particular interest are the analyses of the well-preserved botanical and faunal material, which present the fullest record yet of Greek rural sacrificial offerings, crops, and the natural environment of southern Italy and the Greek world. Excavations from 1974 to 2008 revealed three major phases of the sanctuary, ranging from the Archaic to Early Hellenistic periods. The structures include a natural spring as the earliest locus of the cult, an artificial stream (collecting basin) for the spring's outflow, Archaic and fourth-century BC structures for ritual dining and other cult activities, tantalizing evidence of a Late Archaic Doric temple atop the hill, and a farmhouse and tile factory that postdate the sanctuary's destruction. The extensive catalogs of material and special studies provide an invaluable opportunity to study the development of Greek material culture between the seventh and third centuries BC, with particular emphasis on votive pottery and figurative terracotta plaques.

William Blake in Context Sarah Haggarty, 2022-01-20 William Blake, poet and artist, is a figure often understood to have 'created his own system'. Combining close readings and detailed analysis of a range of Blake's work, from lyrical songs to later myth, from writing to visual art, this collection of thirty-eight lively and authoritative essays examines what Blake had in common with his contemporaries, the writers who influenced him, and those he influenced in turn. Chapters from an international team of leading scholars also attend to his wider contexts: material, formal, cultural, and historical, to enrich our understanding of, and engagement with, Blake's work. Accessibly written, incisive, and informed by original research, *William Blake in Context* enables readers to appreciate Blake anew, from both within and outside of his own idiom.

Just Words Mary Kate McGowan, 2019-01-24 We all know that speech can be harmful. But what are the harms and how exactly does the speech in question bring those harms about? Mary Kate McGowan identifies a previously overlooked mechanism by which speech constitutes, rather than merely causes, harm. She argues that speech constitutes harm when it enacts a norm that prescribes that harm. McGowan illustrates this theory by considering many categories of speech including sexist remarks, racist hate speech, pornography, verbal triggers for stereotype threat, micro-aggressions, political dog whistles, slam poetry, and even the hanging of posters. *Just Words* explores a variety of harms – such as oppression, subordination, discrimination, domination, harassment, and marginalization – and ways in which these harms can be remedied.
