"Work Hard, Study . . . and Keep Out of Politics!" James A. Baker,Steve Fiffer,2008-06-02 White House chief of staff twice over, former secretary of state, past secretary of the treasury, and campaign leader for three different candidates in five successful campaigns—few people have lived and breathed politics as deeply or for as long as James Baker. Now, with candor, down-home Texas storytelling, and more than a few surprises, Baker opens up about his thirty-five years behind the scenes. Beginning in 1975 with the Ford administration, in a job procured for him by friend and tennis partner George H. W. Bush, Baker was in the thick of American politics. He recounts the inside story of Ford’s rejection of Reagan as a running mate in 1976 with the same insight he has into Reagan’s rejection of Ford four years later. When the White House was plunged into turmoil after the Reagan assassination attempt, he was there, and his stories take readers deeper into those chaotic days. Baker was on hand for the George H. W. Bush campaign’s battle over running mate Dan Quayle and, more recently, he was again on the front row as George W. Bush fought it out in Florida. Spellbinding and frank, his stories are the ones between the lines of our history books. In this new edition, Baker also responds for the first time in print to the George W. Bush administration’s reaction to the Iraq Study Group Report, written with his input. Baker is very qualified to comment on the political operation of the current administration, and his new writing for this paperback brings the full weight of his experience to bear.

Command Of The Air General Giulio Douhet,2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.
