Contract Management Body of Knowledge® National Contract Management Association, 2023-01-07 A must-have reference for contract management professionals, the CMBOK presents what should be learned by contract managers and how they should learn it. The content was developed through a voluntary consensus process governed and administered by NCMA to promote the fair development of consensus. This consensus was established through a job task analysis survey of contract managers and working groups comprised of subject matter experts in contract management. The CMBOK is not solely for the benefit of contract managers; contract managers are not the only ones involved in contract management activities. Numerous stakeholders measure success or failure by contract performance. Knowledge of contract management and competent contract management processes directly impacts the success of contract performance. The seventh edition of the CMBOK is primarily driven by the changes to the Contract Management Standard™ (CMS™). In June 2022, the American National Standards Institute (ANSI) reaffirmed the NCMA CMS™ as an American National Standard (ANS). This ANS [ANSI/NCMA ASD 1-2019 (R2022)—see Annex] serves as the CMBOK's foundational document to expand, refine, and reorganize contract management knowledge. The CMBOK provides further definition of the field of contract management; the framework for the body of knowledge; and the practices, lexicon, and processes of contract management. In addition, it provides procedural steps for contract management processes in general, as well as for specialized areas, including government or commercial contracting.

Contract Management Alain Brunet, Franck César, 2021-07-30 This book presents the latest findings relating to behavioral economics and the digital tools applied to contract management. There has been a decisive change in the role of contracts in the past decade, with contracts being transformed from purely legal necessities designed to protect against worst-case scenarios into tools for optimizing ongoing and mutually profitable business relationships with customers. There is an increasing emphasis on tight contracts, where time-risk and additional costs are passed on to the prime contractor, who may suffer heavy penalties in the event of non-performance. Contracts shape the behavior of the parties involved and as such have a major impact on project success. The contract manager's goals are to protect the interests of the company and its shareholders by minimizing the company's financial and contractual liabilities and to maximize its profitability while ensuring end-user satisfaction. The contract is usually written before the design is fully developed, and there is often a mismatch between contractual specifications and what the customer actually wants. Good contract management entails preserving the rights of the contractor by ensuring all parties respect their contractual obligations; providing advice to the project managers and engineering team; preparing profitable amendments to contracts or change requests; maintaining good record-keeping in the event that claims arise; filing notices when necessary; and guiding the project to a profitable conclusion. Like the ancient Chinese game of Go, moves made early in the game (notification of events) can shape the nature of a potential conflict one hundred moves later (arbitration threat).

Contract management can also smooth the relationship between partners, allowing well-balanced “don’t-trade-a-dollar-for-a-penny” contracts to be managed through an established process rather than as sporadic events (we cannot claim to be in control of our business if we are not in control of the contracts on which it depends). Managing a contract with a mix of incomplete manuals, fragmented information, and poor planning can drive companies to “reinvent the wheel.” Contract management promotes a three-phase sequence to streamline information flows across the contract lifecycle, from the bid phase to performance, project closeout, and final payments.
