Startup CEO Matt Blumberg, 2020-07-02 You're only a startup CEO once. Do it well with *Startup CEO*, a master class in building a business. —Dick Costolo, Former CEO, Twitter Being a startup CEO

is a job like no other: it's difficult, risky, stressful, lonely, and often learned through trial and error. As a startup CEO seeing things for the first time, you're likely to make mistakes, fail, get things wrong, and feel like you don't have any control over outcomes. Author Matt Blumberg has been there, and in Startup CEO he shares his experience, mistakes, and lessons learned as he guided Return Path from a handful of employees and no revenues to over \$100 million in revenues and 500 employees. Startup CEO is not a memoir of Return Path's 20-year journey but a thoughtful CEO-focused book that provides first-time CEOs with advice, tools, and approaches for the situations that startup CEOs will face. You'll learn: How to tell your story to new hires, investors, and customers for greater alignment How to create a values-based culture for speed and engagement How to create business and personal operating systems so that you can balance your life and grow your company at the same time How to develop, lead, and leverage your board of directors for greater impact How to ensure that your company is bought, not sold, when you exit Startup CEO is the field guide every CEO needs throughout the growth of their company.

Managing a Service Business, 1984

Managing for performance excellence Koen Dewettinck, Regine Slagmulder, Kurt Verweire, 2012-05-24 ?Managing for Performance Excellence provides practitioners with an integrative framework that highlights the key ingredients of an effective approach to performance management. It describes the formal process of planning, measuring and monitoring performance that companies need to develop as the first step towards becoming a highperforming organisation. As the numerous examples show, a

well-functioning process by itself does not guarantee enduring success. Based on an in-depth analysis of real-life situations, the authors draw attention to potential pitfalls and highlight four concrete performance management challenges that companies need to address: clear strategic focus; engaging climate; collaborative structure; and solid information infrastructure. Performance management is examined from a number of different perspectives, with ample illustrations and practical guidelines against which readers can benchmark their own organisations. These insights are a product of the multidisciplinary pool of expertise present at Vlerick Leuven Gent Management School; a school renowned for its successful mix of academic knowledge and business relevance.

Managing Value in Organisations Mr Donal Carroll,2012-11-01 The song of organisational change goes: 'Ready or not, here I come. You can't hide...' But is change collapsonomics - everything - or have some things not changed? Managing Value in Organisations argues that traditional business thinking has produced low trust with high cost in increased disengagement: the 100 year old management model still accrues organisational debt, the business model privileges producers, and the learning model pretends individual learning produces collective learning. All are now barriers to development. Working with five organisations, Donal Carroll reinvents the management model to multiply trust, the business model for more complex customer value, and learning model for significant collective learning. He provides evidence that together, these get organisations to their next stage of development faster. In a climate of perceived increasing uncertainty and 'more for less' it invites organisations to move from default models and choose their models to 'live on purpose'. This applied business research has many new ideas: value creating research

method, three new models, 'techniques' for organisations to self-assess and construct their next stage, as well as 'fecund argument, productive interference, organisational orphans' and 'facing down Facebook '. It invites readers on a risky narrative, testing one idea in five organisations, over one year through two journeys – the organisations' and writer's. A different business book, it seeks to capture the 'poetry and plumbing' excitement of management innovation. Managers at every level, coaches, consultants, business scholars, researchers, anyone seeking sustainable improvement, or who thinks the impossible can't be reached will find something here.

Ungson,Yim-Yu Wong,2008-07-30 International business is undergoing continuous transformation as multinational firms and comparative management evolve in the changing global economy. To succeed in this challenging environment, firms need a well-developed capability for sound strategic decisions. This comprehensive work provides an applied and integrated strategic framework for developing capabilities that lead to global success. The book is packed with frameworks, cases, anchoring

exercises, techniques, and tools to help readers emerge with a completed business plan after the last chapter. Second, it focuses on strategy and how firms build competitive presence and advantages in a global context. A primary learning objective is to enable readers to understand and evaluate the major issues in strategy formulation and implementation in a global context. Third, it provides an accessible framework that will help guide readers in making strategic decisions that are sound and effective. It offers a unifying process that delineates the necessary steps in analyzing the readiness of a firm to do business abroad. In addition to core issues, each chapter presents frameworks, analytical tools, action-oriented items, and a real-world case - all designed to provide insights on the challenges imposed by globalization and technology on managers operating in a global context.
