**Flash Out of the Box** Robert Hoekman, Jr.,2004-11-18 If you believe the sky really is the limit when it comes to creating unparalleled user experiences and applications for the Web--then Macromedia Flash MX is sure to be your tool of choice. With Flash, you can integrate video, text, audio, and graphics into distinctive and compelling web content, stunningly interactive and expressive user interfaces, and rich applications for the Internet.Flash is all about helping you dramatically enhance the user experience. And Flash Out of the Box is all about helping you think outside of the box to get there--first, by diving into the Flash box and then becoming intimately acquainted with every nook and cranny of it.In Flash Out of the Box, you'll follow and work with a simple box through a day in the life style journey. You'll study, use, abuse, and transform the box as you move through exercises that teach you the basics of Flash, and much more, in an entertaining, unforgettable, task-oriented fashion. You'll learn to animate, work with video, load external assets, draw, mask, modularize, and many other things that will be essential as you move into more advanced techniques with other books. It's just you, Flash, and the box, mastering each technique along the way and adding others in a fashion that will let you practice and learn simultaneously.Most Flash tutorials you've looked at are tool-centric, focusing on Flash's individual features and how to use them (an approach that can quickly become tedious), whereas this innovative, engaging, and motivating book is uniquely user-centric. That means it concentrates on you and what you want and need to learn. Each successive lesson anticipates and builds upon your

needs, capabilities, and questions as you evolve from Flash beginner to Flash master. Written in a fun and conversational tone, the highly accessible Flash Out of the Box makes learning Flash MX 2004 intuitive, logical, and, most of all, fun.

**Adobe Flash CS4 Professional Classroom in a Book** Adobe Creative Team, 2010-04-16 The fastest, easiest, most comprehensive way to learn Adobe Flash CS4 Professional. Powerful features such as the new Motion Editor, inverse kinematics, and support for 3D will make developing your Flash sites fast, easy, and fun. “The Classroom in a Book series is by far the best training material on the market. Everything you need to master the software is included: clear explanations of each lesson, step-by-step instructions, and the project files for the students.” —Barbara Binder, Adobe Certified Instructor, Rocky Mountain Training Classroom in a Book®, the best-selling series of hands-on software training workbooks, helps you learn the features of Adobe software quickly and easily. Classroom in a Book offers what no other book or training program does—an official training series from Adobe Systems Incorporated, developed with the support of Adobe product experts. All of Peachpit's eBooks contain the same content as the print edition. You will find a link in the last few pages of your eBook that directs you to the media files. Helpful tips: · If you are able to search the book, search for Where are the lesson files? · Go to the very last page of the book and scroll backwards. · You will need a web-enabled device or computer in order to access the media files that accompany this ebook. Entering the URL supplied into a computer with web access will allow you to get to the files. · Depending on your device, it is possible that your display settings will cut off part of the URL. To make sure this is not the case, try reducing your font size and turning your device to a landscape view. This should cause the full URL to appear.

**A Primer on Scientific Programming with Python** Hans Petter Langtangen, 2016-07-28 The book serves as a first introduction to computer programming of scientific applications, using the high-level Python language. The exposition is example and problem-oriented, where the applications are taken from mathematics, numerical calculus, statistics, physics, biology and finance. The book teaches Matlab-style and procedural programming as well as object-oriented programming. High school mathematics is a required background and it is advantageous to study classical and numerical one-variable calculus in parallel with reading this book. Besides learning how to program computers, the reader will also learn how to solve mathematical problems, arising in various branches of science and engineering, with the aid of numerical methods and programming. By blending programming, mathematics and scientific applications, the book lays a solid foundation for practicing computational science. From the reviews: Langtangen ... does an excellent job of introducing programming as a set of skills in problem solving. He guides the reader into thinking properly about producing program logic and data structures for modeling real-world problems using objects and functions and embracing the object-oriented paradigm. ... Summing Up: Highly recommended. F. H. Wild III, Choice, Vol. 47 (8), April 2010 Those of us who have learned scientific programming in Python ‘on the streets’ could be a little jealous of students who have the opportunity to take a course out of Langtangen’s Primer.” John D. Cook, The Mathematical Association of America, September 2011 This book goes through Python in particular, and programming in general, via tasks that scientists will likely perform. It contains valuable information for students new to scientific computing and would be the perfect bridge between an introduction to programming and an advanced course on numerical methods or computational science. Alex Small, IEEE, CISE Vol. 14 (2), March /April 2012 “This fourth edition is a wonderful, inclusive textbook that covers pretty much everything one needs to know to go from zero to fairly sophisticated scientific programming in Python...” Joan Horvath, Computing Reviews, March 2015

**Centered Presentations** Jennifer Palus, Tom Searcy, 2013-09-19 An exploration of four dimensions of presentation design and delivery: Content, Creative, Conversation, and Confidence. Content may be an issue for you or your team if you routinely find:

- You are unable to present all your slides in the allotted time.
- Your presentation falls far short of the expected duration.
- Your audience derails your agenda, focusing on other topics.
- Your audience does not seem to grasp the concepts in your presentation or the desired next steps.

Signs that may point to an issue within your creative:

- Your audience visibly winces at the color combinations or animation.
- If you lose your place when presenting, it's hard to get back on track because every slide looks essentially the same.

Although you try not to, you find yourself reading your text-heavy slides to your audience.

- You avoid sharing your presentation with your internal brand team.

You or your team may need to focus on conversation if:

- You are doing almost all the talking in your meetings.
- You shut down conversation in order to stay on your planned timing.
- You realize you've been talking for ten minutes about a topic that is not covered in your presentation content.
- You think of your major point as a big "reveal" and don't want to give anything away until you get there.
- You avoid rehearsal so that you will sound natural; you wing it.

Signs you may have a perceived confidence issue

- Audience members have told you they could not hear or understand you.
- You rarely get questions from your audience.
- Audience members direct questions to other members of your team.
- You find yourself tongued-tied when asked to clarify a slide topic.
- You hear yourself, but cannot stop, using "um" in every sentence.

In each section, learn how presenters stray from center by staying in their comfort zones, and how to return to center with specific recommendations. If you or your team struggle with aspects of developing or delivering compelling presentations, this book will provide a new toolbox and shared vocabulary. Includes checklists and assessments to bring the ideas to life.
