Achieving the Paris Climate Agreement Goals Sven Teske,2019-02-01 This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.

Introduction to Bayesian Statistics William M. Bolstad, James M. Curran, 2016-09-02 ...this edition is useful and effective in teaching Bayesian inference at both elementary and intermediate levels. It is a well-written book on elementary Bayesian inference, and the material is easily accessible. It is both concise and timely, and provides a good collection of overviews and reviews of important tools used in Bayesian statistical methods. There is a strong upsurge in the use of Bayesian methods in applied statistical analysis, yet most introductory statistics texts only present frequentist methods. Bayesian statistics has many important advantages that students should learn about if they are going into fields where

statistics will be used. In this third Edition, four newly-added chapters address topics that reflect the rapid advances in the field of Bayesian statistics. The authors continue to provide a Bayesian treatment of introductory statistical topics, such as scientific data gathering, discrete random variables, robust Bayesian methods, and Bayesian approaches to inference for discrete random variables, binomial proportions, Poisson, and normal means, and simple linear regression. In addition, more advanced topics in the field are presented in four new chapters: Bayesian inference for a normal with unknown mean and variance; Bayesian inference for a Multivariate Normal mean vector; Bayesian inference for the Multiple Linear Regression Model; and Computational Bayesian Statistics including Markov Chain Monte Carlo. The inclusion of these topics will facilitate readers' ability to advance from a minimal understanding of Statistics to the ability to tackle topics in more applied, advanced level books. Minitab macros and R functions are available on the book's related website to assist with chapter exercises. Introduction to Bayesian Statistics, Third Edition also features: Topics including the Joint Likelihood function and inference using independent Jeffreys priors and joint conjugate prior The cutting-edge topic of computational Bayesian Statistics in a new chapter, with a unique focus on Markov Chain Monte Carlo methods Exercises throughout the book that have been updated to reflect new applications and the latest software applications Detailed appendices that guide readers through the use of R and Minitab software for Bayesian analysis and Monte Carlo simulations, with all related macros available on the book's website Introduction to Bayesian Statistics, Third Edition is a textbook for upper-undergraduate or first-year graduate level courses on introductory statistics course with a Bayesian emphasis. It can also be used as a reference

work for statisticians who require a working knowledge of Bayesian statistics.

Gas Sensors Based on Conducting Metal Oxides Nicolae Barsan,Klaus Schierbaum,2018-10-17 Gas Sensors Based on Conducting Metal Oxides: Basic Understanding, Technology and Applications focuses on two distinct types of gas sensors based on conducting metal oxides. Ion conduction, applied in so-called solid-state electrolytic sensors for one, and electronic conduction used in semiconductivity gas sensors for the other. The well-known λ -probe, a key component to optimize combustion in car engines, is an example of the former type, and the in-cabin car air-quality control SnO_2 and WO_2 sensor array stands for the semiconductivity type. Chapters cover basic aspects of functioning principles and describe the technologies and challenges of present and future sensors. Cases on Challenges Facing E-Learning and National Development Ugur Demiray, 2010

E-Learning offers many opportunities for individuals and institutions all over the world. Individuals can access to education they need almost anytime and anywhere they are ready to. Institutions are able to provide more cost-effective training to their employees. E-learning context is very important. It is common to find educators who perceive e-learning as internet-only education that encourages a static and content-focused series of text pages on screen. Others envisage the shallow and random online messages that are typical of a social real-time chat session, and wonder how that type of communication could add any value to academic discourse. Some may have experienced e-learning done poorly, and extrapolate their experience into a negative impression of all e-learning. The book will examine the emergence and growth of e-learning. The use of the e prefix indicates the application of information and communication technology (ICT) in government, finance, and all forms of socio-economic and community development. This eBook is designed and presented in two volumes. The first volume consists of the country cases of Algeria, Belarus, Bulgaria, Egypt, Estonia, Finland, Greece, Jordan, Hungary, Iraq, Iran, Israel, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macedonia, Moldova, and Morocco. The second volume gives a place to the country cases of Norway, Oman, Palestine, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovakia, Slovenia, Sweden, Syria, Tajikistan, Tunisia, Turkey, Ukraine, United Arab Emirates and Uzbekistan. So, the book consists of more than 70 authors from 39 different countries and from 42 universities and 14 institutions with company for all 42 chapters. (Individual chapters contain references.) [Cases on Challenges

Facing E-Learning and National Development: Institutional Studies and Practices. Volume II was co-edited by Leena Vainio, Mehmet Can Sahin, Gulsun Kurubacak, Petri T. Lounaskorpi, S. Raja Rao, and Carlos Machado. For Volume I, see ED508217.].

Wandering, Begging Monks Daniel Folger Caner, 2020-05-12 An apostolic lifestyle characterized by total material renunciation, homelessness, and begging was practiced by monks throughout the Roman Empire in the fourth and fifth centuries. Such monks often served as spiritual advisors to urban aristocrats whose patronage gave them considerable authority and independence from episcopal control. This book is the first comprehensive study of this type of Christian poverty and the challenge it posed for episcopal authority and the promotion of monasticism in late antiquity. Focusing on devotional practices, Daniel Caner draws together diverse testimony from Egypt, Syria, Asia Minor, and elsewhere—including the Pseudo-Clementine Letters to Virgins, Augustine's *On the Work of Monks*, John Chrysostom's homilies, legal codes—to reveal gospel-inspired patterns of ascetic dependency and teaching from the third to the fifth centuries. Throughout, his point of departure is social and cultural history, especially the urban social history of the late Roman empire. He also introduces many charismatic individuals whose struggle to persist against church suppression of their chosen way of imitating Christ was fought with defiant conviction, and the book includes the first annotated English translation of the biography of Alexander Akoimetos (Alexander the Sleepless). *Wandering, Begging Monks* allows us to understand these fascinating figures of early Christianity in the full context of late Roman society.

Bridging Australia and Japan: Volume 2 Keiko Tamura,Arthur Stockwin,2020-08-23 This book is volume two of the writings of David Sissons, who first established his academic career as a political scientist specialising in Japanese politics, and later shifted his focus to the history of Australia-Japan relations. In this volume, we reproduce his writings on Japanese politics, the Pacific War and Australian war crimes trials after the war. He was a pioneer in these fields, carrying out research across cultural and language borders, and influenced numerous researchers who followed in his footsteps. Much of what he wrote, however, remained unpublished at the time of his death in 2006, and so the editors have included a selection of his hitherto unpublished work along with some of his published writings. *Breaking Japanese Diplomatic Codes*, edited by Desmond Ball and Keiko Tamura, was published in 2013, and the first volume of *Bridging Australia and Japan* was published in 2016. This book completes this series, which reproduces many of David Sissons' writings. The current volume covers a wide range of topics, from Japanese wartime intentions

towards Australia, the Cowra Breakout, and Sissons' early writings on Japanese politics. Republished in this volume is his comprehensive essay on the Australian war crimes trials, which influenced the field of military justice research. Georgina Fitzpatrick and Keiko Tamura have also contributed essays reflecting on his research. Sissons was an extraordinarily meticulous researcher, leaving no stone unturned in his search for accuracy and completeness of understanding, and should be considered one of Australia's major historians. His writings deal not only with diplomatic negotiations and decision-making, but also the lives of ordinary and often nameless people and their engagements with their host society. His warm humanity in recording ordinary people's lives as well as his balanced examination of historical incidents and issues from both Australian and Japanese perspectives are hallmarks of his scholarship.

Identifying and Managing Risk Will Baker, Howard Reid, 2004 An effective risk management process is a vital decision making tool in today's environment of rapid change and global and national threat. Organisations that plan to identify and treat risk proactively, stand to flourish in the marketplace. This book provides an introduction to the principles of risk management and introduces students to all of the issues surrounding risk management.

China and Africa David H. Shinn, Joshua Eisenman, 2012-07-10 The People's Republic

of China once limited its involvement in African affairs to building an occasional railroad or port, supporting African liberation movements, and loudly proclaiming socialist solidarity with the downtrodden of the continent. Now Chinese diplomats and Chinese companies, both state-owned and private, along with an influx of Chinese workers, have spread throughout Africa. This shift is one of the most important geopolitical phenomena of our time. *China and Africa: A Century of Engagement* presents a comprehensive view of the relationship between this powerful Asian nation and the countries of Africa. This book, the first of its kind to be published since the 1970s, examines all facets of China's relationship with each of the fifty-four African nations. It reviews the history of China's relations with the continent, looking back past the establishment of the People's Republic of China in 1949. It looks at a broad range of areas that define this relationship—politics, trade, investment, foreign aid, military, security, and culture—providing a significant historical backdrop for each. David H. Shinn and Joshua Eisenman's study combines careful observation, meticulous data analysis, and detailed understanding gained through diplomatic experience and extensive travel in China and Africa. *China and Africa* demonstrates that while China's connection to Africa is different from that of Western nations, it is no less complex. Africans and Chinese are still developing their perceptions of each other, and these changing views have both positive and negative dimensions.
