ROBERT M. STEVENSON

Sound, Sin, and Conversion in Victorian England Julia Grella

O'Connell, 2018-04-19 The plight of the fallen woman is one of the salient themes of nineteenth-century art and literature; indeed, the ubiquity of the trope galvanized the Victorian conscience and acted as a spur to social reform. In some notable examples, Julia Grella O'Connell argues, the iconography of the Victorian fallen woman was associated with music, reviving an ancient tradition conflating the practice of music with sin and the abandonment of music with holiness. The prominence of music symbolism in the socially-committed, quasi-religious paintings of the Pre-Raphaelites and their circle, and in the Catholic-Wagnerian novels of George Moore, gives evidence of the survival of a pictorial language linking music with sin and conversion, and shows, even more remarkably, that this language translated fairly easily into the cultural lexicon of Victorian Britain. Drawing upon music iconography, art history, patristic theology, and sensory theory, Grella O'Connell investigates female fallenness and its implications against the backdrop of the social and religious turbulence of the mid-nineteenth century.

Jewry in Music David Conway, 2011-12-15 David Conway analyses why and how Jews, virtually absent from Western art music until the end of the eighteenth century, came to be represented in all branches of the profession within fifty years as leading figures – not only as composers and performers, but as publishers, impresarios and critics. His study places this process in the context of dynamic economic, political, sociological and technological changes and also of developments in Jewish communities and the Jewish religion itself, in the major cultural centres of Western Europe. Beginning

with a review of attitudes to Jews in the arts and an assessment of Jewish music and musical skills, in the age of the Enlightenment, Conway traces the story of growing Jewish involvement with music through the biographies of the famous, the neglected and the forgotten, leading to a radical contextualisation of Wagner's infamous 'Judaism in Music'.

A Manual of Music Wilber M. Derthick, 1888

And Yet It Is Heard Tito M. Tonietti, 2014-05-16 We bring into full light some excerpts on musical subjects which were until now scattered throughout the most famous scientific texts. The main scientific and musical cultures outside of Europe are also taken into consideration. The first and most important property to underline in the scientific texts examined here is the language they are written in. This means that our multicultural history of the sciences necessarily also becomes a review of the various dominant languages used in the different historical contexts. In this volume, the history of the development of the sciences is told as it happened in real contexts, not in an alienated ideal world.

Can the West Be Converted? Jean-Georges Gantenbein, 2021-11-04 Rather than considering contemporary culture in light of secularization, much of the Western Church operates with a degree of nostalgia. This book constitutes a decisive missiological intervention calling for renewed appraisal of contemporary Christian proclamation.

The Cambridge History of Seventeenth-Century Music Tim Carter, John Butt, 2005-12-22 First published in 2005, this title provides extensive knowledge on seventeenth-century music.

The Science and Regulations of Naturally Derived Complex Drugs Ram Sasisekharan, Sau L. Lee, Amy Rosenberg, Larry A. Walker, 2019-04-23 This volume in the AAPS Advances series covers various quality, safety and clinical aspects of drug development that are relevant to new and/or generic drugs containing a complex mixture of molecules. Specific topics discussed include: raw materials sourcing; manufacturing controls; characterization; identification of critical product quality components and attributes; identification of impurities, particularly as they bear on toxicity and immunogenicity; clinical trial study design considerations, and the regulatory science applications to development of such complex mixtures. Complex mixtures are challenging to characterize and analyze using standard methods. Further challenges extend throughout the product development cycle from raw material control to clinical study design. The regulatory landscape is rapidly changing as new types of complex mixtures are introduced into clinical trials and to the market (e.g., traditional Chinese medicines and medical marijuana products), while older products are facing generic competition for the first time (e.g., enoxaparin). The future outlook for complex generic drug products, as opposed to the more commonly developed targeted single agent drug products is not clear. The risks pertaining to lack of a full understanding of raw material control, process and controls in manufacture, as well as characterization of a complex mixture were seen vividly during the heparin crisis of 2008. As such powerful lessons have been learned about the regulatory science specific to complex products. The

Science and Regulations of Naturally Derived Complex Drugs addresses the interests among industry, academics, and government on the issues surrounding the future development of mixtures for medicinal use.

Mass Awakening Shoshi Herscu, 2018-10-08 The Truth has been hidden from us while a global policy of mass depopulation and exploitation has been carried out behind the scenes for the past half-century. The author, an independent journalist, became aware of this agenda only in the past few years. She found it hard to believe, but in-depth research and the testimony of whistleblowers worldwide have exposed these strategies. They include geoengineering (chemtrails), fluoridation of water supplies, GMOs, vaccinations, false flag terrorist attacks, and economic warfare by the group David Wilcock calls the Cabal. However, despite this grim reality, a positive shift of mass awakening is occurring worldwide. Tribunals are being established to prosecute elite offenders; revelations of hidden technology like free-energy and new economic models are being put forth. The author shows how humanity is claiming its rightful heritage as spiritual beings and charts the course of our elevation of consciousness. MASS AWAKENING gives us all real hope for an amazing future. Mass Awakening is Shoshi Herscu's well researched and yet profoundly personal handling of intensely shocking material, rarely covered in print. It is both a true inspiration and a much-needed breath of fresh air. -Ada Tourtsakis PrepareForChangeLeadership.org

Music Commodities, Markets, and Values Jayson Beaster-Jones, 2016-05-12 This

book examines music stores as sites of cultural production in contemporary India. Analyzing social practices of selling music in a variety of retail contexts, it focuses upon the economic and social values that are produced and circulated by music retailers in the marketplace. Based upon research conducted over a volatile ten-year period of the Indian music industry, Beaster-Jones discusses the cultural histories of the recording industry, the social changes that have accompanied India's economic liberalization reforms, and the economic realities of selling music in India as digital circulation of music recordings gradually displaced physical distribution. The volume considers the mobilization of musical, economic, and social values as a component of branding discourses in neoliberal India, as a justification for new regimes of legitimate use and intellectual property, as a scene for the performance of cosmopolitanism by shopping, and as a site of anxiety about transformations in the marketplace. It relies upon ethnographic observation and interviews from a variety of sources within the Indian music industry, including perspectives of executives at music labels, family-run and corporate music stores, and hawkers in street markets selling counterfeit recordings. This ethnography of the practices, spaces, and anxieties of selling music in urban India will be an important resource for scholars in a wide range of fields, including ethnomusicology, anthropology, popular music studies, and South Asian studies.

Secular Vocal Music Francesco Barsanti, 2018-01-01 A latecomer to music and not particularly gifted as an executant on any instrument (a great handicap for any musician in an age when music appreciation was performer-centered rather than composer-centered), the Italian expatriate Francesco Barsanti (ca. 1690–1775) would seem doomed to failure, especially given his reportedly

unassertive, even timid, personality; but his versatility, industry, and ability to win and retain a surprisingly large support network kept him afloat until the end. His ability to survive from day to day by carrying out a multitude of humdrum tasks gave him sufficient time and freedom to engage in what he did best and seemingly valued most: composing music. The compact but by no means negligible corpus of music he produced in a wide variety of genres makes him one of the most original and interesting composers active in eighteenth-century Britain. His instrumental music has already won some recognition in modern times, but his equally impressive vocal music, all produced in Britain, is so far virtually unknown. The present volume, which contains all Barsanti's secular vocal music known to survive, together with a complementary volume containing his complete sacred vocal music, aims to bring these attractive works before the musicological community and the public at large.
