A Short View of the Laws Now Subsisting with Respect to the Powers of the East India Company William Pulteney,John Stewart,2022-09-15 The East India Company was an English, joint-stock company founded in 1600 to trade in the Indian Ocean region, initially with the East Indies (the Indian subcontinent and Southeast Asia), and later with East Asia. It gained control of large parts of the Indian subcontinent, colonised parts of Southeast Asia and Hong Kong, and kept trading posts and colonies in the Persian Gulf Residencies. This book is a short summary of the laws enacted with respect to the powers of the East India Company to borrow money under their seal, and to incur debts in the course of their trade, by the purchase of goods on credit, and by freighting ships or other mercantile transactions.

The sources for the unit labor cost data are the OECD Analytical Database (quarterly unit labor cost in manufacturing) and IMF staff (annual data interpolated into higher frequencies). Euro area unit labor cost is used as a proxy for a number of economies for which data are unavailable: Cyprus, Czech Republic, Estonia, Latvia, Lithuania, Malta, and Slovak Republic. For manufactured goods, trade by type of good and market is distinguished in the database. For primary products, the weights assigned depend principally on a country's role as a global supplier or buyer of the product. Trade in crude petroleum, petroleum, and other energy products are excluded. For some countries that heavily depend on tourism, bilateral exports of tourism services averaged over 2004-2006 are also included in calculating the competitiveness weights.
