Computer Aided Geometric Design Robert E. Barnhill,Richard F. Riesenfeld,2014-05-10 Computer Aided Geometric Design covers the proceedings of the First International Conference on Computer Aided Geometric Design, held at the University of Utah on March 18-21, 1974. This book is composed of 15 chapters and starts with reviews of the properties of surface patch equation and the use of computers in geometrical design. The next chapters deal with the principles of smooth interpolation over triangles and without twist constraints, as well as the graphical representation of surfaces over triangles and rectangles. These topics are followed by discussions of the B-spline

curves and surfaces; mathematical and practical possibilities of UNISURF; nonlinear splines; and some piecewise polynomial alternatives to splines under tension. Other chapters explore the smooth parametric surfaces, the space curve as a folded edge, and the interactive computer graphics application of the parametric bi-cubic surface to engineering design problems. The final chapters look into the three-dimensional human-machine communication and a class of local interpolating splines. This book will prove useful to design engineers.

Highbrow/Lowbrow Lawrence W. LEVINE,2009-06-30 In this unusually wide-ranging study, spanning more than a century and covering such diverse forms of expressive culture as Shakespeare, Central Park, symphonies, jazz, art museums, the Marx Brothers, opera, and vaudeville, a leading cultural historian demonstrates how variable and dynamic cultural boundaries have been and how fragile and recent the cultural categories we have learned to accept as natural and eternal are. For most of the nineteenth century, a wide variety of expressive forms—Shakespearean drama, opera, orchestral music, painting and sculpture, as well as the writings of such authors as Dickens and Longfellow—enjoyed both high cultural status and mass popularity. In the nineteenth century Americans (in addition to whatever specific ethnic, class, and regional cultures they were part of) shared a public culture less hierarchically organized, less fragmented into relatively rigid adjectival groupings than their descendants were to experience. By the twentieth century this cultural eclecticism and openness became increasingly rare. Cultural space was more sharply defined and less flexible than it had been. The theater, once a microcosm of

America—housing both the entire spectrum of the population and the complete range of entertainment from tragedy to farce, juggling to ballet, opera to minstrelsy—now fragmented into discrete spaces catering to distinct audiences and separate genres of expressive culture. The same transition occurred in concert halls, opera houses, and museums. A growing chasm between "serious" and "popular," between "high" and "low" culture came to dominate America's expressive arts. "If there is a tragedy in this development," Lawrence Levine comments, "it is not only that millions of Americans were now separated from exposure to such creators as Shakespeare, Beethoven, and Verdi, whom they had enjoyed in various formats for much of the nineteenth century, but also that the rigid cultural categories, once they were in place, made it so difficult for so long for so many to understand the value and importance of the popular art forms that were all around them. Too many of those who considered themselves educated and cultured lost for a significant period—and many have still not regained—their ability to discriminate independently, to sort things out for themselves and understand that simply because a form of expressive culture was widely accessible and highly popular it was not therefore necessarily devoid of any redeeming value or artistic merit." In this innovative historical exploration, Levine not only traces the emergence of such familiar categories as highbrow and lowbrow at the turn of the century, but helps us to understand more clearly both the process of cultural change and the nature of culture in American society.

  Lead with Hospitality Taylor Scott,2021-04-27 Across all industries and levels of organizations, one key leadership trait inspires and motivates more than any other: hospitality. We have all encountered inspirational leaders who've helped us, taught us, encouraged us, pushed us to get outside our comfort zones, or motivated us to become the best version of ourselves. What is it about their leadership styles that inspires us to do more for our team and our personal and professional growth? Turns out, we admire these leaders for the same reasons we love our favorite hotels, resorts, restaurants, or bars: How they make us feel is essential. Members of today's workforce—especially millennials and Gen Z—are looking for inspiring environments and work that truly fulfills them. Before anyone is compelled to do anything they first must feel. Speaker, consultant, and hospitality industry veteran Taylor Scott knows that the most effective leaders approach their roles with heart, emotionally connecting with their team members before attempting to manage them. Scott draws from his two decades in leadership roles at respected hotels, resorts, and restaurants. He distills the principles of gracious hospitality, translating them into actionable leadership lessons which apply in any industry, such as: • How making people feel welcome fosters loyalty and keeps workers engaged with an organization's purpose • How serving people with empathy and compassion sparks workers' highest productivity • How making people feel comfortable encourages exploration, curiosity, and discovery while inviting everyone to lean into their creativity • How making people feel significant drives them to deliver their best work He also shares specific, practical steps you can take to put these principles into action. Scott shows how to connect, serve, engage, coach, and inspire your peers, teams, and even your own leaders. Lead with Hospitality is a call to action to connect with people on a

human level which ultimately inspires teams, organizations, and companies to go to the next level.

Collaborative Innovation Networks Yang Song,Francesca Grippa,Peter A. Gloor,João Leitão,2019-06-26 Collaborative innovation networks are cyberteams of motivated individuals, and are self-organizing emergent social systems with the potential to promote health, happiness and individual growth in real-world work settings. This book describes how to identify and nurture collaborative innovation networks in order to shape the future working environment and pave the way for health and happiness, and how to develop future technologies to promote economic development, social innovation and entrepreneurship. The expert contributions and case studies presented also offer insights into how large corporations can creatively generate solutions to real-world problems by means of self-organizing mechanisms, while simultaneously promoting the well-being of individual workers. The book also discusses how such networks can benefit startups, offering new self-organizing forms of leadership in which all stakeholders are encouraged to collaborate in the development of new products.

The Converso's Return Dalia Kandiyoti,2020-08-04 Five centuries after the forced conversion of Spanish and Portuguese Jews to Catholicism, stories of these conversos' descendants uncovering long-hidden Jewish roots have come to light and taken hold of the literary and popular imagination. This seemingly remote history has inspired a wave of contemporary writing involving hidden artifacts, familial whispers and secrets, and clandestine Jewish ritual practices pointing to a past that had been presumed dead and buried. The Converso's Return explores the cultural politics and literary impact of this reawakened interest in converso and crypto-Jewish history, ancestry, and identity, and asks what this fascination with lost-and-found heritage can tell us about how we relate to and make use of the past. Dalia Kandiyoti offers nuanced interpretations of contemporary fictional and autobiographical texts about crypto-Jews in Cuba, Mexico, New Mexico, Spain, France, the Ottoman Empire, and Turkey. These works not only imagine what might be missing from the historical archive but also suggest an alternative historical consciousness that underscores uncommon convergences of and solidarities within Sephardi, Christian, Muslim, converso, and Sabbatean histories. Steeped in diaspora, Sephardi, transamerican, Iberian, and world literature studies, The Converso's Return illuminates how the converso narrative can enrich our understanding of history, genealogy, and collective memory.
