The World Goes Pop Elsa Coustou, Lina Dzuveroric, 2015-01-01
A global survey of Pop art that reassesses its roots, impact, and legacy This groundbreaking book surveys the concurrent engagements with the spirit of Pop throughout

the world, from the frequently studied activity in the United States, England, and France to less well-known developments in Central and Eastern Europe, Latin America, Asia, Africa, and the Middle East. One of the first publications to examine Pop art with this global scope, *The World Goes Pop* explores the wide-ranging movements that developed on different continents, such as Nouveau Réalisme, Neo Dada, New Figuration, and Spiritual Pop. This unique presentation offers the opportunity to compare how Pop art around the world differed due to geography, local traditions, and different cultures' social and political underpinnings. Fascinating essays touch upon key themes that factored into various Pop movements, including feminism, political representation, sexual politics, and seriality. A bold design and 200 striking illustrations showcase pieces by more than 60 artists, many of whose works have never been exhibited outside their home nations. The book also features a combined interview with a number of the living artists featured within, giving important insight into the thoughts and processes of Pop's international practitioners.

Neutrosophic Sets and Systems Florentin Smarandache,Surapati Pramanik, “Neutrosophic Sets and Systems” has been created for publications on advanced studies in neutrosophy, neutrosophic set, neutrosophic logic, neutrosophic probability, neutrosophic statistics that started in 1995 and their applications in any field, such as the neutrosophic structures developed in algebra, geometry, topology, etc.

Rigid Body Dynamics Algorithms Roy Featherstone,2014-11-10 *Rigid Body Dynamics Algorithms* presents the subject of computational rigid-body dynamics through the medium of spatial 6D vector notation. It explains how to model a rigid-body system and how to analyze it, and it presents the most comprehensive collection of the best rigid-body dynamics algorithms to be found in a single source. The use of spatial vector notation greatly reduces the volume of algebra which allows systems to be described using fewer equations and fewer quantities. It also allows problems to be solved in fewer steps, and solutions to be expressed more succinctly. In addition algorithms are explained simply and clearly, and are expressed in a compact form. The use of spatial vector notation facilitates the implementation of dynamics algorithms on a computer: shorter, simpler code that is easier to write, understand and debug, with no loss of efficiency.

Advances in Morphometrics Leslie F. Marcus,Marco Corti,Anna Loy,Gavin J. P. Naylor,Dennis E. Slice,2013-11-11 This volume is based on the NATO Advanced Study Institute, Advances in Morphometrics held in Il Ciocco, Tuscany, Italy from July 18-30, 1993, and directed by Leslie F. Marcus. The Advances in Morphometrics ASI was advertised in Nature and a number of professional journals. Announcements were sent to relevant institutions and departments throughout the world. Because NATO required that the majority of attendees be from NATO countries, the 71 persons attending represented nine NATO countries, four eastern European countries, now recognized as equal partners for ASI, and a few participants from non-NATO countries. Participants were all active scholars in different disciplines within biology, as well as computer science, statistics, geology and paleontology. Their experience ranged from that of graduate students to senior faculty, as well as one emeritus scholar. A complete list of the those attending and their addresses, phone and FAX numbers and, where available, e-mail addresses is given in the participants list. All the local arrangements were made by Marco Corti and Anna Loy of the University of Rome La Sapienza. They made the initial contact with the Il Ciocco conference center and then arranged for computer and Xerox rentals, design of logos, organization of posters, and publication of poster abstracts.
