**How I Met My Monster** Amanda Noll,2019-11-03 One night, when Ethan reaches under his bed for a toy truck, he finds this note instead: Monsters! Meet here for final test. Ethan is sure his parents are trying to trick him into staying under the covers, until he sees five colorful sets of eyes blinking at him from beneath the bed. Soon, a colorful parade of quirky, squeaky little monsters compete to become Ethan's monster. But only the little green monster, Gabe, has the perfect blend of stomach-rumbling and snorting needed to get Ethan into bed and keep him there so he falls asleep—which as everyone knows, is the real reason for monsters under beds. With its perfect balance of giggles and shivers, this silly-spooky prequel to the award-winning *I Need My Monster* and *Hey, That's MY Monster!* will keep young readers entertained.

**Guilty Pleasures** Hugh McIntosh,2018-09-24 Guilty pleasures in one's reading habits are nothing new. Late-nineteenth-century American literary culture even championed the idea that popular novels need not be great. Best-selling novels arrived in the public sphere as at once beloved and contested objects, an ambivalence that reflected and informed America's cultural insecurity. This became a matter of nationhood as well as aesthetics: the amateurism of popular narratives resonated with the discourse of new nationhood. In *Guilty Pleasures*, Hugh McIntosh examines reactions to best-selling fiction in the United States from 1850 to 1920, including reader response to such best-sellers as *Uncle Tom's Cabin*, *Ben Hur*, and *Trilby* as well as fictional representations—from Trollope to Baldwin—of American culture's lack of artistic greatness. Drawing on a transatlantic archive of contemporary criticism, urban display, parody, and advertising, *Guilty Pleasures* thoroughly documents how the conflicted attitude toward popular novels shaped these ephemeral modes of response. Paying close attention to this material history of novel reading, McIntosh reveals how popular fiction's unique status as socially saturating and aesthetically questionable inspired public reflection on what it meant to belong to a flawed national community.

Greening It Adrian T. Sobotta,Irene N. Sobotta,John Götze,2010 Information Technology is responsible for approximately 2% of the world's emission of greenhouse gases. The IT sector itself contributes to these greenhouse gas emissions, through its massive consumption of energy - and therefore continuously exacerbates the problem. At the same time, however, the IT industry can provide the technological solutions we need to optimise resource use, save energy and reduce greenhouse gas emissions. We call this Greening IT. This book looks into the great potential of greening society with IT - i.e. the potential of IT in transforming our societies into Low-Carbon societies. The book is the result of an internationally collaborative effort by a number of opinion leaders in the field of Greening IT.
