The Dead Phone Bryan W. Alspa,2015-01-08 Warren Hollis is a seasoned true crime writer. He likes to submerge himself in the local culture when he writes, so he packs his essentials and heads to Knorr, Pennsylvania. It's a tiny town in western PA, the kind of town most people on their way to Pittsburgh or New York would drive right past. It's a town full of friendly, smiling people, but it hides a dark past. Years ago a man began sneaking into the bedrooms of young girls and taking them under the cover of night. Days later, a grisly calling card would be left for the families to find. He became known as The Boogeyman and the rural town of Knorr, and the surrounding communities, have done all they can to forget those terrible days when no one was safe, not even when nestled into their own beds. Warren arrives and starts asking questions. He stays in a small cabin just outside of town. It's a nice place, exactly what he's looking for. There's just one strange thing: a big, heavy black phone at the top of the stairs. It's not connected to anything. The phone is just a decorative hold-over from the party line days. Something about it disturbs Warren, the way something about Knorr disturbs him, as well. Someone is hiding something about The Boogeyman. Then the killing starts again. And, in the middle of the night, a phone that should never be able to ring - begins to do just that...

Prime Time Animation Carol Stabile,2013-09-13 In September 1960 a television show emerged from the mists of prehistoric time to take its place as the mother of all animated sitcoms. The Flintstones spawned dozens of imitations, just as, two decades later, The Simpsons sparked a renaissance of primetime animation. This fascinating book explores the landscape of television animation, from Bedrock to Springfield, and beyond. The contributors critically examine the key issues and questions, including: How do we explain the animation explosion of the 1960s? Why did it take nearly twenty years following the cancellation of The Flintstones for animation to find its feet again as primetime fare? In addressing these questions, as well as many others, essays examine the relation between earlier, made-for-cinema animated production (such as the Warner Looney Toons shorts) and television-based animation; the role of animation in the economies of broadcast and cable television; and the links between animation production and brand image. Contributors also examine specific programmes like The Powerpuff Girls, Daria, Ren and Stimpy and South Park from the perspective of fans, exploring fan cybercommunities, investigating how ideas of 'class' and 'taste' apply to recent TV animation, and addressing themes such as irony, alienation, and representations of the family.
