Countering the Financing of Terrorism Thomas J. Biersteker,Sue E. Eckert,2007-09-12 Groups committing acts of terrorism have adapted their means of financing to elude detection since the 9/11 attacks in the United States. Surveying the global community's multi-year effort to cut off terrorist funding, this volume offers a much-needed analysis of a complex, widely discussed, yet poorly understood subject. While books on terrorism have touched upon the topic, this is the first comprehensive, balanced, and scholarly overview of terrorist financing, its methods, and efforts to counter it. Bringing together leading analysts of terrorism, international relations, global finance, law, and criminology, Countering the Financing of Terrorism provides a critical assessment of the international effort to restrict terrorist financing. It evaluates the costs and benefits and offers recommendations for more effective policies for the future.

Dominant Language Constellations Joseph Lo Bianco, Larissa Aronin, 2020-09-07

This volume is dedicated to the concept and several applications of Dominant Language Constellations (DLC), by which it advances understanding of current multilingualism through addition of a novel perspective from which to view contemporary language use and acquisition. The term Dominant Language Constellation denotes the set of a person's or group's most expedient languages, functioning as an entire unit and enabling an individual or group to meet their needs in a multilingual environment. The volume presents pioneering contributions that employ DLC as the lens for analysing a wide array of issues. These include multilingual syntactic development, cross-linguistic interaction and multilingual production in formal and informal educational contexts, as well as linguistic profiles of multilingual groups used in elementary school and higher education. Other DLC issues include discussions of how identity, emotions and attitudes operate in various minority and majority contexts. Because the DLC concept does not assume any inherent hierarchy of languages it can serve as a framework public policy in multilingual countries/communities faced with challenging policy determinations regarding choice of languages for use in education settings and more widely in social institutions and the economy. Some chapters develop and extend the DLC concept, others adapt and apply it to a variety of contexts, both global and local. Many chapters feature educational and social settings across large parts of the world— Africa, Australia, Europe, North

America (Canada and the USA) and Southeast Asia. The volume can serve as supplementary reading for courses on multilingualism, sociolinguistics, language policy and planning, educational linguistics, Second and Third Language Acquisition.

Physical Geology Steven Earle, 2016-08-12 This is a discount Black and white version. Some images may be unclear, please see BCCampus website for the digital version. This book was born out of a 2014 meeting of earth science educators representing most of the universities and colleges in British Columbia, and nurtured by a widely shared frustration that many students are not thriving in courses because textbooks have become too expensive for them to buy. But the real inspiration comes from a fascination for the spectacular geology of western Canada and the many decades that the author spent exploring this region along with colleagues, students, family, and friends. My goal has been to provide an accessible and comprehensive guide to the important topics of geology, richly illustrated with examples from western Canada. Although this text is intended to complement a typical first-year course in physical geology, its contents could be applied to numerous other related courses.
