Transfeminist Perspectives in and beyond Transgender and Gender Studies Finn Enke, 2012-05-04 Lambda Literary Award for Best Book in Transgender Nonfiction, 2013 If feminist studies and transgender studies are so intimately connected, why are they not more deeply integrated? Offering multidisciplinary models for this assimilation, the vibrant essays in Transfeminist Perspectives in and beyond Transgender and Gender Studies suggest timely and necessary changes for institutions of higher learning. Responding to the more visible presence of transgender persons as well as gender theories, the contributing essayists focus on how gender is practiced in academia, health care, social services, and even national border patrols. Working from the premise that transgender is both material and cultural, the contributors address such aspects of the university as administration, sports, curriculum, pedagogy, and the appropriate location for transgender studies. Combining feminist theory, transgender studies, and activism centered on social diversity and justice, these essays examine how institutions as lived contexts shape everyday life.

Global Digital Cultures Aswin Punathambekar, Sriram Mohan, 2019-06-06 Digital media histories are part of a global network, and South Asia is a key nexus in shaping the trajectory of digital media in the twenty-first century. Digital platforms like Facebook, WhatsApp, and others are deeply embedded in the daily lives of millions of people around the world, shaping how people engage with

others as kin, as citizens, and as consumers. Moving away from Anglo-American and strictly national frameworks, the essays in this book explore the intersections of local, national, regional, and global forces that shape contemporary digital culture(s) in regions like South Asia: the rise of digital and mobile media technologies, the ongoing transformation of established media industries, and emergent forms of digital media practice and use that are reconfiguring sociocultural, political, and economic terrains across the Indian subcontinent. From massive state-driven digital identity projects and YouTube censorship to Tinder and dating culture, from Twitter and primetime television to Facebook and political rumors, *Global Digital Cultures* focuses on enduring concerns of representation, identity, and power while grappling with algorithmic curation and data-driven processes of production, circulation, and consumption.

What element in life is waiting for every reader to embrace? While many individuals have significant knowledge, skills, and abilities, in many cases they lack the true element of performance. Performance Driven Thinking is a journey that will challenge the reader to no longer accept entitlement or status quo thinking. Performance Driven Thinking will take the reader from where they are to where they could be if they would truly concentrate on their individual performance. We were born to perform and the challenge that will be issued as a result of this book will assist readers in increasing their personal and professional performance.

T-Minus AI Michael Kanaan, 2020-08-25 Late in 2017, the global significance of the conversation about artificial intelligence (AI) changed forever. China put the world on alert when it released a plan to dominate all aspects of AI across the planet. Only weeks later, Vladimir Putin raised a Russian red flag in response by declaring AI the future for all humankind, and proclaiming that, Whoever becomes the leader in this sphere will become the ruler of the world. The race was on. Consistent with their unique national agendas, countries throughout the world began plotting their paths and hurrying their pace. Now, not long after, the race has become a sprint. Despite everything at stake, to most of us AI remains shrouded by a cloud of mystery and misunderstanding. Hidden behind complicated and technical jargon and confused by fantastical depictions of science fiction, the modern realities of AI and its profound implications are hard to decipher, but crucial to recognize. In *T-Minus AI: Humanity's Countdown to Artificial Intelligence and the New Pursuit of Global Power*, author Michael Kanaan explains AI from a human-oriented perspective we can all finally understand. A recognized national expert and the U.S. Air Force's first Chairperson for Artificial Intelligence, Kanaan weaves a compelling new view on our history of innovation and technology to masterfully explain what each of us should know about modern computing, AI, and machine learning. Kanaan also dives into the global implications of AI by illuminating the cultural and national vulnerabilities already exposed and the pressing issues now squarely on the table. AI has already become China's all-purpose tool to impose its authoritarian influence around the world. Russia, playing catch up, is weaponizing AI through its military systems and now infamous, aggressive efforts to disrupt democracy by whatever disinformation means possible. America and like-minded nations are awakening to these new realities—and the paths they're electing to follow echo loudly the political foundations and, in most cases, the moral imperatives upon which they were formed. As we march toward a future far different than ever imagined, *T-Minus AI* is fascinating and crucially well-timed. It leaves the fiction behind, paints the alarming implications of AI for what they actually are, and calls for unified action to protect fundamental human rights and dignities for all.

East Central European Migrations During the Cold War Anna Mazurkiewicz, 2019-05-06 An extremely useful and much needed survey. Over eleven chapters, authors from eight countries cover the complex history of migration from the perspective of Central and Eastern Europe between 1945 and 1993. Following in the footsteps of Klaus Bade's *Encyclopedia of European Migrations*, the authors make extensive use of sources in national languages, while providing an extensive overview of population movements in the region between the Baltic, Black, and Adriatic Seas. The individual chapters shed light on phenomena overlooked in other volumes, including individual state reactions to various migratory phenomenon, and the political, economic, and ideological consequences of human movement. The chapters of this volume are uniform not only in their informative nature, but also in suggesting new pathways for in-depth research. Adam Walaszek, Jagiellonian University, Kraków, Poland Eastern Europe is an emblematic space of mobility and its Cold War history cannot be told without considering migration from and into the countries of the region. This volume comes at a timely moment and provides a uniquely comprehensive account, full with useful information for further research. It will be a must-read both for migration studies scholars and for area specialists. Ulf Brunnbauer, Leibniz Institute for East and Southeast European Studies, Regensburg, Germany The Handbook is a gift to students of migration on three counts. It gathers the expertise of scholars fluent in the languages – and familiar with the archives – of Eastern and Central Europe. Thus it brings the multi-layered and complex histories of movement beyond the flat descriptor of Soviet bloc or Eastern European migrations. The Handbook is both rich and lucid, presenting in-depth materials on the European twentieth-century, on one hand, and organizing each chapter in a similar way, offering the reader

transparently comparable histories. From Estonia south to Albania, and from the USSR west to the GDR, each chapter elucidates a complex migration history distinguished by national politics, ethnic composition, and economics – moving from the cataclysmic impacts of World War II to the international migrations and politics of Cold War movement, as well as the politics of Cold War emigrants themselves. Each chapter ends with an epilogue on post-1989 international migrations and a valuable addendum on published and archival sources. Finally, the Handbook models the kind of high quality work produced by international scholarly cooperation at its best. In the Name of the Goddess Tapati Guha-Thakurta, 2015 Each year, Kolkata's Durga Puja scales new heights as the most spectacular and extravagant event in the city's calendar. From the turn of the twenty-first century, the festival has taken on a particular artistic dispensation that is unique to the contemporary city, demanding a new order of attention and analysis. Based on field-research conducted between 2002 and 2012, this book unravels the anatomy of this newly-conjured 'art' event, by tracking the new production processes, the mounting trends of publicity and sponsorship as well as the practices of mass spectatorship that make for the transformed visual culture of the festival. This new visual aesthetic, it is argued, has become the most important marker of the rapidly mutating identity of today's Durga Puja in Kolkata, bringing into the fray new categories of artists and designers, new genres of public art, and new spaces for art production and reception in the city. The book's central concern lies in conceptualizing a specically contemporary and artistic history of the urban festival. In keeping with its title, the book examines the diversity of images and practices - from the consumerist spectacle and the bonanza of awards to the efflorescence of public installations and art and craft productions - that unfurls in this season 'in the name of the goddess'. While proling the Durga Pujas as Kolkata's biggest public art event, the book also addresses the ambivalence of the designations of 'art' and 'artist' in this eld of production and viewership. One of the main aims of this study has been to lay open the claims of 'art' in this festival both as a set of insistent projections as well as a mesh of incomplete formations. The new artistic nomenclature of the festival, it is shown, is not easily secured and has to struggle to assert itself within the body of the religious event and the ephemeral mass spectacle.

Using Technology in Foreign Language Teaching Rahma Al-Mahrooqi, Salah Troudi, 2014-10-17 Language learning is a complex and challenging endeavor. For students to achieve the desired proficiency in English as a Foreign Language (EFL) their institutions need to invest time, effort and huge resources in order to cater for different learning styles. To be cost effective, many language-teaching institutions strive to provide intensive foreign language (FL) instruction to reduce the time period needed to learn the target language. This explains the current interest in combining differe...
