Guide to Securing Microsoft Windows XP Systems for IT Professionals: A NIST Security Configuration Checklist Karen Scarfone,2009-08 When an IT security configuration checklist (e.g., hardening or lockdown guide) is applied to a system in combination with trained system administrators and a sound and effective security program, a substantial reduction in vulnerability exposure can be achieved. This guide will assist personnel responsible for the administration and security of Windows XP systems. It contains information that can be used to secure local Windows XP workstations, mobile computers, and telecommuter systems more effectively in a variety of environments, including small office, home office and managed enterprise environments. The guidance should only be applied throughout an enterprise by trained and experienced system administrators. Illustrations.

Unix Backup and Recovery W. Curtis Preston,1999 Providing an overview of all facets of UNIX backup and recovery, this text offers practical solutions for environments of all sizes and budgets, explaining everything from freely-available backup systems to large-scale commercial utilities.

Natural Resources, Neither Curse nor Destiny Daniel

Lederman,William F Maloney,2006-10-23 'Natural Resources: Neither Course nor Destiny' brings together a variety of analytical perspectives, ranging from econometric analyses of economic growth to historical studies of successful development experiences in countries with abundant natural resources. The evidence suggests that natural resources are neither a curse nor destiny. Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation. Furthermore, natural resource abundance need not be the only determinant of the structure of trade in developing countries. In fact, the accumulation of knowledge, infrastructure, and the quality of governance all seem to determine not only what countries produce and export, but also how firms and workers produce any good.

Reforms, Opportunities, and Challenges for State-Owned Enterprises Edimon Ginting,Kaukab Naqvi,2020-07-01 State-owned enterprises (SOEs) play significant roles in developing economies in Asia and SOE performance remains crucial for economy-wide productivity and growth. This book looks at SOEs in Azerbaijan, Indonesia, Kazakhstan, the People's Republic of China, and Viet Nam, which together present a panoramic view of SOEs in the

region. It also presents insights from the Republic of Korea on the evolving role of the public sector in various stages of development. It explores corporate governance challenges and how governments could reform SOEs to make them efficient drivers of the long-term productivity-induced growth essential to Asia's transition to high-income status.

IT Essentials ,2013 Cisco's IT Essentials: PC Hardware and Software curriculum introduces the skills needed to help meet growing demand for entry-level information and communication technology (ICT) professionals. It covers the fundamentals of PC technology, networking, and security, and also introduces advanced concepts. While extensive online study resources are available, many have requested a low-cost printed resource for study offline. This booklet is that resource. Drawn directly from the online curriculum, it covers every skill and competency required by the new A+ exams (220-801 and 220-802): * Define IT and describe a computer's components * Protect self, equipment, and the environment * Assemble a desktop computer step-by-step, and install and navigate an operating system * Explain and perform preventive maintenance and basic troubleshooting * Upgrade or replace components of laptops and peripherals * Connect

computers to networks * Implement basic security * Communicate well and behave professionally * Assess customer needs, analyze possible configurations, and recommend solutions This booklet enables students to study offline, highlight key points, and take handwritten notes. Its text is extracted word-for-word, from the online course, and headings with exact page correlations link to the online course for classroom discussions and exam preparation. Icons direct readers to the online Cisco Networking Academy curriculum to take full advantage of the images, labs, and activities provided there.

Fundamentals of Spacecraft Attitude Determination and Control F. Landis Markley,John L. Crassidis,2014-05-31 This book explores topics that are central to the field of spacecraft attitude determination and control. The authors provide rigorous theoretical derivations of significant algorithms accompanied by a generous amount of qualitative discussions of the subject matter. The book

documents the development of the important concepts and methods in a manner accessible to practicing engineers, graduate-level engineering students and applied mathematicians. It includes detailed examples from actual mission designs to help ease the transition from theory to practice and also provides prototype algorithms that are readily available on the author's website. Subject matter includes both theoretical derivations and practical implementation of spacecraft attitude determination and control systems. It provides detailed derivations for attitude kinematics and dynamics and provides detailed description of the most widely used attitude parameterization, the quaternion. This title also provides a thorough treatise of attitude dynamics including Jacobian elliptical functions. It is the first known book to provide detailed derivations and explanations of state attitude determination and gives readers real-world examples from actual working spacecraft missions. The subject matter is chosen to fill the void of existing textbooks and treatises, especially in state and dynamics attitude determination. MATLAB code of all examples will be provided through an external website.

Feedback Systems Karl Johan Åström,Richard M. Murray,2021-02-02 The essential introduction to the principles and applications of feedback systems—now fully revised and expanded This textbook covers the mathematics needed to model, analyze, and design feedback systems. Now more user-friendly than ever, this revised and expanded edition of Feedback Systems is a one-volume resource for students and researchers in mathematics and engineering. It has applications across a range of disciplines that utilize feedback in physical, biological, information, and economic systems. Karl Åström and Richard Murray use techniques from physics, computer science, and operations research to introduce control-oriented modeling. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including

transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root locus plots Provides exercises at the end of every chapter Comes with an electronic solutions manual An ideal textbook for undergraduate and graduate students Indispensable for researchers seeking a self-contained resource on control theory

The Pope, the Public, and International Relations Mariano P. Barbato,2020-06-30 This edited volume engages a long-standing religious power, the Holy See, to discuss the impact of the structural and postsecular transformations of international relations through the emergence of a global and digital public sphere. Despite the legal construction that enables the separation of the Holy See as a distinct legal entity, it is also an instrument for the papacy to represent externally and regulate internally the global and transnational Catholic Church. The Holy See is also the tool that enables the papacy to address a transnational or a global public beyond Catholic adherence – most prominently through journeys that are often at the same time state visits and pastoral

journeys. Instead of understanding these hybrid roles as an irregular exemption, the contributions of the book argue that the Holy See should be seen as a certainly special but nevertheless quite normal actor of international and public diplomacy.

Survey of Text Mining Michael W. Berry,2013-03-14 Extracting content from text continues to be an important research problem for information processing and management. Approaches to capture the semantics of text-based document collections may be based on Bayesian models, probability theory, vector space models, statistical models, or even graph theory. As the volume of digitized textual media continues to grow, so does the need for designing robust, scalable indexing and search strategies (software) to meet a variety of user needs. Knowledge extraction or creation from text requires systematic yet reliable processing that can be codified and adapted for changing needs and environments. This book will draw upon experts in both academia and industry to recommend practical approaches to the purification, indexing, and mining of textual information. It will address document identification, clustering and categorizing documents, cleaning text, and visualizing semantic models of text.

Implementing the IBM Storwize V3500 Jon Tate,Uwe Dubberke,Justin Heather,Andrew Hickey,Imran Imtiaz,Nancy Kinney,Dieter Utesch,IBM Redbooks,2013-10-21 Businesses of all sizes are faced with the challenge of managing huge volumes of data that are becoming increasingly valuable. But storing this data can be costly, and extracting value from the data is becoming more and more difficult. IT organizations have limited resources and cannot afford to make investment mistakes. The IBM® Storwize® V3500 system provides a smarter solution that is affordable, simple, and efficient, which enables businesses to overcome their storage challenges. IBM Storwize V3500 is the most recent addition to the IBM Storwize family of disk systems. It delivers easy-to-use, entry-level configurations that are specifically designed to meet the modest budgets of small and medium-sized businesses. IBM Storwize V3500 features the following highlights: -

Consolidate and share data with low cost iSCSI storage networking. - Deploy storage in minutes and perform storage management tasks quickly and easily through a breakthrough graphical user interface. - Experience peace of mind with proven IBM Storwize family high-availability data protection with snapshot technology and IBM warranty support. - Optimize efficiency by allocating only the amount of disk space needed at the time it is required with high performance, thin-provisioning capabilities.

Education for Rural Development Food and Agriculture Organization of the United Nations,Unesco,2003 An international joint study by the Food and Agriculture Organization of the United Nations (FAO) and UNESCO's International Institute for Educational Planning (IIEP) was conducted on education and rural development to review the status of the topic from the standpoint of public policies and the conceptual frameworks on which they are based and also to shed light on what may be called good practice. The findings of the study are meant to serve not as models, but rather as points of reference for all those who are seeking ways of developing education in rural areas and contributing more effectively to rural development. Chapter I, Education and Rural Development: Setting the Framework (David Atchoarena and

Charlotte Sedel), provides a contextual and theoretical introduction to the new rural development and poverty reduction thinking, as well as a discussion on the contribution of education to rural development. In Chapter II, Basic Education in Rural Areas: Status, Issues and Prospects (Michael Lakin with Lavinia Gasperini), the book reviews in depth the provision of basic education in rural areas and offers some policy directions for improvement. Further exploring a particular dimension of basic education, Chapter III, Making Learning Relevant: Principles and Evidence from Recent Experiences (Peter Taylor, Daniel Desmond, James Grieshop and Aarti Subramaniam), devotes specific attention to strategies linking the formal school teaching with students' life environment, including agriculture, and to garden-based learning. The intention is to provide updated information and new insights on much-debated aspects which are often associated with rural areas although their application is much broader. Chapter IV, Strategies and Institutions for Promoting Skills for Rural Development (David Atchoarena, Ian Wallace, Kate Green, and Candido Alberto Gomes), shifts the analysis from education to work and discusses the implications of the transformation of rural labor markets for skill development. A particular concern is the rise in rural non-farm employment and the

need to enlarge the policy focus from agricultural education and training to technical and vocational education for rural development. This debate is taken further in Chapter V, Higher Education and Rural Development: A New Perspective (Charles Maguire and David Atchoarena), which considers higher level skills and the contribution of the tertiary education sector to rural development. Special attention is given to the reform of higher agricultural institutions and lessons based on case studies are provided to document good practice in institutional reform. Finally, Chapter VI, Main Findings and Implications for Policy and Donor Support (David Atchoarena with Lavinia Gasperini, Michael Lakin and Charles Maguire), concentrates on the main findings of the study and discusses policy implications and possible responses for donors and countries. (Contains 28 tables, 14 figures, and 64 boxes.).

Mining Capitalism Stuart Kirsch,2014-06-07 Corporations are among the most powerful institutions of our time, but they are also responsible for a wide range of harmful social and environmental impacts. Consequently, political movements and nongovernmental organizations increasingly contest the risks that corporations pose

to people and nature. Mining Capitalism examines the strategies through which corporations manage their relationships with these critics and adversaries. By focusing on the conflict over the Ok Tedi copper and gold mine in Papua New Guinea, Stuart Kirsch tells the story of a slow-moving environmental disaster and the international network of indigenous peoples, advocacy groups, and lawyers that sought to protect local rivers and rain forests. Along the way, he analyzes how corporations promote their interests by manipulating science and invoking the discourses of sustainability and social responsibility. Based on two decades of anthropological research, this book is comparative in scope, showing readers how similar dynamics operate in other industries around the world.

Weaver's Wisdom , Satguru Sivaya Subramuniyaswami, a living legend, yoga master and author of Merging with Siva, recognized the immense value of the Tirukural in 1949 as a young seeker in Sri Lanka. Decades later, he instructed two of his swamis to translate it from classical Tamil into American English, and had an renowned artist in South India illustrate the 108 chapters. Here is the fruit of those efforts, the gentle, profound world of Asian ethics and simple humanness. Yet, Weaver's Wisdom's universality makes it a book you can share with anyone. It contains fortune

cookies you can snack on before sleep or at anytime. Its charming wit and common sense will uplift and inspire you and your whole family.
