Polymer Colloids Rodney Priestley,Robert Prud'homme,2019-12-02 Academic and industrial

research around polymer-based colloids is huge, driven both by the development of mature technologies, e.g. latexes for coatings, as well as the advancement of new materials and applications, such as building blocks for 2D/3D structures and medicine. Edited by two world-renowned leaders in polymer science and engineering, this is a fundamental text for the field. Based on a specialised course by the editors, this book provides the reader with an invaluable single source of reference. The first section describes formation, explaining basic properties of emulsions and dispersion polymerization, microfluidic approaches to produce polymer-based colloids and formation via directed self-assembly. The next section details characterisation methodologies from microscopy and small angle scattering, to surface science and simulations. The final chapters close with applications, including Pickering emulsions and molecular engineering for materials development. A comprehensive guide to polymer colloids, with contributions by leaders in their respective areas, this book is a must-have for researchers and practitioners working across polymers, soft matter and chemical and molecular engineering.

Augie's Quest Augie Nieto,T.R. Pearson,2011-01-15 What happens to orphan diseases that aren't big enough profit centers for the pharmaceutical industry or get caught in the web of government funding and academic research? Augie Nieto found out in the spring of 2005: At forty-seven years old he was diagnosed with ALS. Devastated, Augie struggled with depression and attempted suicide. When he awoke from a coma, with friends and family surrounding him, his sense of faith and mission were renewed. Fast-forward one year: Augie and his wife, Lynne, were profiled as Real Heroes on the Today show. Their determination to beat the disease had already led to major overhauls in the way ALS research was conducted. In partnership with the Muscular Dystrophy Association, Augie had set up a foundation and lab to coordinate and oversee ALS research and testing across the globe. By centralizing operations and championing an entrepreneurial approach to medical research, Augie and his team accomplished remarkable results in less than two years. Part inspiration, part business

innovation, Augie's Quest illustrates how one person can make a meaningful difference. Praise for Augie Nieto: George H. W. Bush, former U.S. president: Your contributions to the fitness industry are well known, and your dedication an inspiration. Lance Armstrong, seven-time Le Tour de France champion: I think it says a lot about Augie, the fact that everybody came together regardless of whether or not it's for competing gyms or competing companies that make equipment. They all say, this is one of our own; this is a guy who's committed his life to our industry and has been dealt a serious blow. We're going to be there for him, we're going to say, we're here for you and we're part of the Quest. Arnold Schwarzenegger, governor of California: Your success has been incredible. But you are so much more than just a successful businessman. You are the greatest husband, a great father, and a terrific friend. So,

Presumption of Guilt Martin Schönteich, Open Society Justice Initiative, Robert O. Varenik, 2014 In India, a man spent 54 years behind bars in pretrial detention, waiting for a trial that would never happen because his file had been lost. In Nigeria, one study estimated that the average detainee waits

over three years for his day in court. In Russia, pretrial detainees have begged for the chance to plead guilty, just so they can receive medical care. And in the United States, juvenile pretrial detainees have been forced to fight each other for their guards' amusement. Around the world, millions are effectively punished before they are tried. Legally entitled to be considered innocent and released pending trial, many accused are instead held in pretrial detention, where they are subjected to torture, exposed to life threatening disease, victimized by violence, and pressured for bribes. It is literally worse than being convicted: pretrial detainees routinely experience worse conditions than sentenced prisoners. The suicide rate among pretrial detainees is three times higher than among convicted prisoners, and ten times that of the outside community. Pretrial detention harms individuals, families, and communities; wastes state resources and human potential; and undermines the rule of law. The arbitrary and excessive use of pretrial detention is a massive and widely ignored pattern of human rights abuse that affects-by a conservative estimate-15 million people a year. The right to be presumed innocent until proven guilty is universal, but at this moment some 3.3 million people are behind bars, waiting for a

trial that may be months or even years away. No right is so broadly accepted in theory, but so commonly violated in practice. It is fair to say that the global overuse of pretrial detention is the most overlooked human rights crisis of our time. *Presumption of Guilt* examines the full consequences of the global overuse of pretrial detention. Combining statistical analysis, first-person accounts, graphics, and case studies of successful reforms, the report is the first to comprehensively document this widespread but frequently ignored form of human rights abuse. Our Black Year Maggie Anderson, 2012-02-14 On January 1, 2009, Maggie and John Anderson, a successful African American couple raising two daughters in a Chicago suburb, engaged in a social experiment to reinvest in the black community and buy from only black-owned businesses for a year. Throughout that time the Andersons combed Chicago in search of a black-owned supermarket, dry cleaner, gas station, pharmacy, and clothing store. *Our black year* is the story of what they learned.

Maggie examines the commercial exploitation of black neighborhoods through the lens of her year supporting black-owned businesses. She discovers that black businesses lag behind businesses of all other racial and ethnic groups in every measure of success, and argues that the social crises that disproportionately impact black people and underserved black neighborhoods could be countered through conscious consumerism--supporting businesses that empower struggling communities. At once a personal journey and an investigation into the causes of a persistent economic suffering, this is a hard-hitting call to action to close a gaping hole in the American economy--one purchase at a time--

Engaging North Korea Stephan Haggard, Marcus Noland, 2011 This monograph reviews the efficacy of economic statecraft vis- -vis North Korea, with a particular focus on the use of sanctions and inducements on the part of the United States in seeking to achieve nonproliferation and wider foreign policy objectives. Two structural constraints operate: North Korea's particularly repressive state, with a narrowing governing coalition; and the country's changing economic relations. As an empirical

matter, there is little evidence that sanctions had effect, or did so only in conjunction with inducements. However, inducements did not yield significant results either, in part because of severe credibility and sequencing problems in the negotiations.

The World Food Economy Douglas D. Southgate, Jr., Douglas H. Graham, Luther G. Tweeten, 2006-11-03 The questions of population growth and food supply have long been of central concern to economists. The World Food Economy seeks to examine the lessons of the past for

wealthy nations, where agricultural output has steadily risen for decades, as well as for developing nations where the advances of the “Green Revolution” in the 1960s have introduced new problems in addition to solutions. This text assesses the challenge of satisfying food demand during the twenty-first century as consumers and producers in every part of the world—rich and poor alike—feel the effects of expanded global commodity trade, food aid, and national legislation in response to globalization. Examines increases in agricultural output and productivity in both the developed and developing worlds Analyzes the centrality of agricultural development to general economic progress and explores cases where governments attempt to foster economic expansion while neglecting food production Assesses the challenge of satisfying food demand during the twenty-first century, given the effects of globalization on international trade and national legislation.
