*Polyphony and the Modern* Jonathan Fruoco, 2021-05-10 Polyphony and the Modern asks one fundamental question: what does it mean to be modern in one's own time? To answer that question, this volume focuses on polyphony as an index of modernity. In *The Principle of Hope*, Ernst Bloch showed that each moment in time is potentially fractured: people living in the same country can effectively live in different centuries – some making their alliances with the past and others betting on the future – but all of them, at least technically, enclosed in the temporal moment. But can a claim of modernity also mean something more ambitious? Can an artist, by accident or design, escape the limits of his or her own time, and somehow precociously embody the outlook of a subsequent age? This book sees polyphony as a bridge providing a terminology and a stylistic practice by which the period barrier between Medieval and Early Modern can be breached. **Studies in the Transmission of Latin Texts** S. P. Oakley,2020-07-24 This volume offers a comprehensive study of all the known manuscripts and incunables of two works: the history of Alexander the Great written by Quintus Curtius Rufus, probably in the first century AD, and the translation into Latin by Lucius Septimius of the spoof history of the Trojan War, allegedly written at the time of that war by a certain Dictys Cretensis. Drawing on in excess of 200 witnesses, the analysis reveals how the text of Curtius in all our extant manuscripts descends from one damaged copy that survived from the Roman Empire into the Middle Ages, and how the text of Dictys survived in two such copies. It demonstrates that clear and decisive results can be achieved by application of the so-called stemmatic method, and how the application of those results will lead to several improvements to our standard text of Dictys. As well as determining which manuscripts future editors should use in editing these texts and examining them in detail, it also offers equally full discussion of those which will not be needed, establishing many localizations and derivations. The result is a large body of material that will help deepen our knowledge of the transmission of classical Latin texts, especially in the Renaissance, as well as our knowledge of scribal practice and of techniques that can be deployed in the genealogical study of manuscripts and incunables.

Handbook for Teaching Introductory Psychology Michelle Rae Hebl,Charles L. Brewer,Ludy T. Benjamin, Jr.,2001-08-01 Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology

instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology (TOP), the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, Issues and Approaches in Teaching Introductory Psychology, contains 52 articles on critical issues, such as: how to approach the course; understanding students' interests, perceptions, and motives; students' existing knowledge of psychology (including their misconceptions); a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory, as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology.

**Count God In** Loren F. Bliese, 2018-03-09 This study of Song of Songs uncovers many patterns related to the numerical value twenty-six and related numbers for the divine name YHWH. Patterns are so unique that they clearly show authorial intent. They involve the numerical value of root forms of words, their sequences, and their totals in the book. The beloved man is highlighted by special patterns, which indicate that a typology for God is intended. Deer names in the refrain have number patterns that confirm intention for

being circumlocutions for divine names. The disputed presence of the divine name YH in 8:6 is confirmed by the value of its full word. One of the most striking patterns found with the help of a computer is that the totals of root words are all arranged to point to theological numbers in a beautiful intricacy. Besides describing these patterns, this study discusses numerical competence within a proposed Hebrew literary circle, and what steps they might have gone through to create these amazing phenomena. These theological numbers confirm intentionality for allusions to the Hebrew Bible and support a hermeneutic of spiritual applications. A literary analysis of each poem focuses on the use of numbers among other features of prominence.

**Tatian's Diatessaron** James W. Barker, 2021-10-28 In the late-second century, Tatian the Assyrian constructed a new Gospel by intricately harmonizing Matthew, Mark, Luke, and John. Tatian's work became known as the Diatessaron, since it was derived 'out of the four' eventually canonical Gospels. Though it circulated widely for centuries, the Diatessaron disappeared in antiquity. Nevertheless, numerous ancient and medieval harmonies survive in various languages. Some texts are altogether independent of the Diatessaron, while others are definitely related. Yet even Tatian's known descendants

differ in large and small ways, so attempts at reconstruction have proven confounding. In this book James W. Barker forges a new path in Diatessaron studies. Covering the widest array of manuscript evidence to date, Tatian's Diatessaron reconstructs the compositional and editorial practices by which Tatian wrote his Gospel. By sorting every extant witnesses according to its narrative sequence, the macrostructure of Tatian's Gospel becomes clear. Despite many shared agreements, there remain significant divergences between eastern and western witnesses. This book argues that the eastern ones preserve Tatian's order, whereas the western texts descend from a fourth-century recension of the Diatessaron. Victor of Capua and his scribe used the recension to produce the Latin Codex Fuldensis in the sixth century. More controversially, Barker offers new evidence that late medieval texts such as the Middle Dutch Stuttgart harmony independently preserve traces of the western recension. This study uncovers the composition and reception history behind one of early Christianity's most elusive texts.

Shakespeare and the Versification of English Drama, 1561-1642 Professor Marina Tarlinskaja, 2014-09-28 Surveying the development and varieties of blank verse in the English playhouses, this book is a natural history of iambic pentameter in English. Marina Tarlinskaja's statistical analysis of versification focuses on Shakespeare, but places his work in the literary context of the times. Her results offer new ways to think about the dating of plays, the attribution of anonymous texts, and how collaborators divided their task in co-authored dramas.
