Capital Account Openness in Low-income Developing Countries Mrs. Sarwat Jahan, Daili Wang, 2017-01-18 The relevance of recording and assessing countries' capital flow management measures is well-recognized, but very few studies have focused on low-income developing countries (LIDCs). A key constraint is the lack of an appropriate index to measure the openness of capital account and its change over time. This paper fills the gap by constructing a de jure index based on information contained in the IMF's Annual Report on Exchange Arrangements and Exchange Restrictions. It provides an aggregate index to capture the overall openness of the capital account, and also provides a breakdown of openness for various subcategories of capital flows. The new database covers 164 countries with information on 12 types of asset categories over the period 1996-2013. The index provides the largest coverage of LIDCs among all existing indices and also provides granularity on openness across asset types, direction of flows and residency. The paper examines the link between de jure capital account openness with de facto capital flows and outlines potential applications of this database.

Finance and Employment in Developing Countries: The Working Capital Channel Mai Chi Dao, Lucy Qian Liu, 2017-08-15 We study the effect of external financing constraint on job creation in emerging markets and developing countries (EMDC) at the firm level by looking at a specific transmission channel - the working capital channel. We develop a simple model to illustrate how the need for working capital financing of a firm affects the link between financial constraint and the firm's job creation. We show that the effect of relaxing financial constraint on job creation is greater the smaller the firm scale and the more labor-intensive its production structure. We use the World Bank Enterprise Surveys data to test the main predictions of the model, and find strong evidence for the working capital channel of external finance on firm employment.

Collected Works (12+ illustrated edition) of Karl Marx: Capital, The Communist Manifesto, Critique of Hegel's Philosophy of Right Karl Marx, 2021-01-08 Karl Heinrich Marx was a German philosopher, economist, historian, sociologist, political theorist, journalist and socialist revolutionary. It is hard to think of many who have had as much influence in the creation of the modern world. In addition to his overtly philosophical early work, his later writings have many points of contact with contemporary philosophical debates, especially in the philosophy of history and the social

sciences, and in moral and political philosophy. Historical materialism – Marx's theory of history – is centered around the idea that forms of society rise and fall as they further and then impede the development of human productive power. Marx's economic analysis of capitalism is based on his version of the labour theory of value, and includes the analysis of capitalist profit as the extraction of surplus value from the exploited proletariat. Marx sees the historical process as proceeding through a necessary series of modes of production, characterized by class struggle, culminating in communism. Capital Cities around the World Roman Adrian Cybriwsky, 2013-05-23 This informative resource is a fascinating compilation of the history, politics, and culture of every capital city from around the world, making this the only singular reference on the subject of its kind. Every country, even the world's youngest nations, has a capital city—a centralized location which houses the seat of government and acts as the hub of culture and history. But, what role do capital cities play in the global arena? Which factors have influenced the selection of a municipal center for each nation? This interesting encyclopedia explores the topic in great depth, providing an overview of each country's capital—its history and early inhabitants, ascension to prominence, infrastructure within the government, and influence on the world around them. The author considers the culture and society of the area, discussing the ethnic and religious groups among those who live there, the major issues the residents face, and other interesting cultural facts. *Capital Cities around the World: An Encyclopedia of Geography, History, and Culture* features the capital cities of 200 countries across the globe. Organized in alphabetical order by country, each profile combines social studies, geography, anthropology, world history, and political science to offer a fascinating survey of each location.

Rule of Law vs Majoritarian Democracy Giuliano Amato,Benedetta

Barbisan,Cesare Pinelli,2021-08-26 What is more paradoxically democratic than a people exercising their vote against the harbingers of the rule of law and democracy? What happens when the will of the people and the rule of law are at odds? Some commentators note that the presence of illiberal political movements in the public arena of many Western countries demonstrates that their democracy is so inclusive and alive that it comprehends and countenances even undemocratic forces and political agendas. But what if, on the contrary, these were the signs of the deconsolidation of democracy instead of its good health? What if democratically elected regimes were to ignore constitutional principles representing the rule of law and the limits of their power? With contributions from judges and scholars from different

backgrounds and nationalities this book explores the framework in which this tension currently takes place in several Western countries by focusing on four key themes: - The Rule of Law: presenting a historical and theoretical reconstruction of the evolution of the Rule of Law; - The People: dealing with a set of problems around the notion of 'people' and the forces claiming to represent their voice; - Democracy and its enemies: tackling a variety of phenomena impacting on the traditional democratic balance of powers and institutional order; - Elected and Non-Elected: focusing on the juxtaposition between judges (and, more generally, non-representative bodies) and the people's representation.
