How the Coming Global Crash Will Create a Historic Gold Rush Dean Heskin,Jerome R. Corsi, Ph.D.,2023-05-24 How the Coming Global Crash Will Create a Historic Gold Rush demonstrates the causal relationship between a deep economic crisis and a historical increase in the price of gold. Through the last years of his presidency, Jimmy Carter struggled with the legacy of the OPEC oil embargo causing large lines at the gas pump to pay surging gasoline costs. After the 1973 embargo, the price of oil quadrupled, forcing the United States into a deep recession that lasted into 1975. Gold surged during this period of stagflation, the unusual economic condition in which stagnant economic growth and high inflation coincide. In 1980, when Ronald Reagan was elected president, gold hit a high of \$843/ounce. In 2008-2009, the collapse of the subprime mortgage market and the bursting of the real estate bubble caused a Great Recession in which prestigious financial institutions failed across the globe and serious investors poured their money into gold to maintain their total asset value. In 2010, gold's price hit a high of \$1,426/ounce. In the wake of the economic collapse caused by the COVID-19 lockdown, gold hit a yearly high of \$2,058.40 in 2020, on the way to an all-time high of \$2,074.60 on March 8, 2022. The global economy faces an economic meltdown in 2023, the magnitude of which we have not seen since the Great Depression in the 1930s. When the bubble in hedge funds and derivative contracts bursts, financial institutions worldwide will have to absorb billions and possibly even trillions of dollars in losses, an amount of money almost inconceivable in any other era of global financial history. In this book, Dean Heskin and Jerome R. Corsi explain the reality of 2022-2023: the dollar may collapse, and mounting unemployment and plummeting property values may accelerate the near disappearance of the middle class. In the dystopian world we are entering, gold and silver may be the only "money" that will hold its value.

Lights Out Thomas Gryta,Ted Mann,2020 How could General Electric--perhaps America's most iconic corporation--suffer such a swift and sudden fall from grace? This is the definitive history of General Electric's epic decline, as told by the two Wall Street Journal reporters who covered its fall. Since its founding in 1892, GE has been more than just a corporation. For generations, it was job security, a solidly safe investment, and an elite business education for top managers. GE electrified America, powering everything from lightbulbs to turbines, and became fully integrated into the American societal mindset as few companies ever had. And after two decades of leadership under legendary CEO Jack Welch, GE entered the twenty-first century as America's most valuable corporation. Yet, fewer than two decades later, the GE of old was gone. Lights Out examines how Welch's handpicked successor, Jeff Immelt, tried to fix flaws in Welch's profit machine, while stumbling headlong into mistakes of his own. In the end, GE's traditional win-at-all-costs driven culture seemed to lose its direction, which ultimately caused the company's decline on both a personal and organizational scale. Lights Out details how one of America's all-time great companies has been reduced to a cautionary tale for our times.

Banker To The Poor Muhammad Yunus,2007-03-31 The inspirational story of how Nobel Prize winner Muhammad Yunus invented microcredit, founded the Grameen Bank, and transformed the fortunes of millions of poor people around the world. Muhammad Yunus was a professor of economics in Bangladesh, who realized that the most impoverished members of his community were systematically neglected by the banking system -- no one would loan them any money. Yunus conceived of a new form of banking -- microcredit -- that would offer very small loans to the poorest people without collateral, and teach them how to manage and use their loans to create successful small businesses. He founded Grameen Bank based on the belief that credit is a basic human right, not the privilege of a fortunate few, and it now provides \$24 billion of micro-loans to more than nine million families. Ninety-seven percent of its clients are women, and repayment rates are over 90 percent. Outside of Bangladesh, micro-lending programs inspired by Grameen have blossomed, and serve hundreds of millions of people around the world. The definitive history of micro-credit direct from the man that conceived of it, Banker to the Poor is the moving story of someone who dreamed of changing the world -- and did.

The Frugal Homeowner's Guide to Buying, Selling & Improving Your Home Julie Garton-Good,1999 Is this the best time to refinance my house? How can I find an affordable mortgage? If I remodel my home will I be able to recoup my costs when I sell? These are just a few of the many, many questions answered in The Frugal HomeOwner's Guide to Buying, Selling, and Improving Your Home. In an easy-to-follow QandA format, author and Home Affordability Expert Julie Garton-Good tackles homeowners' most common questions and provides prudent, frugal answers.

Good Economics for Hard Times Abhijit V. Banerjee,Esther Duflo,2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.
