Asphalt Rubber Glenn A. Fager,2001 From 1990 to 1995 a total of 13 projects were constructed using crumb tire rubber in the state of Kansas. These projects were built in response to a state legislature request to evaluate the feasibility of the use of crumb tire rubber in highway construction. Six projects were constructed through change orders and seven were administrated through normal bid procedures. High-density mixes, recycle mixes, and open graded mixes were employed in the experiment. Five projects were by the modified dry process and eight were by the wet process. Approximately 2,637 tons of crumb tire rubber were used in all of the 13 projects. A rating system was established to evaluate the effectiveness of each project. Almost all of the crumb tire rubber came from outside of the state; very little was used from Kansas generated sources.

The ICT Handbook for Primary Teachers David Hall,2010-01-04 The ICT Handbook for Primary Teachers will help all those involved in primary education, whether in training, teaching or leadership roles, to develop the ICT knowledge, understanding and skills required to enhance children's learning in the classroom. Covering theory and practise this essential Handbook explores and outlines the usefulness of ICT in a range of primary contexts, and advice is offered on assessing whether ICT is preferable to other approaches for 'enhancing learning'. With additional online resources, providing activities, multimedia resources and further reading, the book covers: Statutory requirements for using ICT in the curriculum at all levels Using ICT in core curriculum subjects and in cross-curricular contexts, referring to key PNS framework objectives Advice on incorporating a range of ICT resources into children's learning Different models of e-learning (handheld devices, interactive whiteboards, the internet) How ICT can be used to help pupils with special educational needs Using ICT for planning, delivery, assessment and recording This book is an indispensable guide to ICT for students on PGCE, BEd and undergraduate teaching courses, along with practising teachers, SENCOs, ICT co-ordinators and school leaders.

Design, User Experience, and Usability: Theory, Methodology, and Management Aaron Marcus,Wentao Wang,2017-06-28 The three-volume set LNCS 10288, 10289, and 10290 constitutes the proceedings of the 6th International Conference on Design, User Experience, and Usability, DUXU 2017, held as part of the 19th International Conference on Human-Computer Interaction, HCII 2017, in Vancouver, BC, Canada, in July 2017, jointly with 14 other thematically similar conferences. The total of 1228 papers presented at the HCII 2017 conferences were carefully reviewed and selected from 4340 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 168 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this three-volume set. LNCS 10288: The 56 papers included in this volume are organized in topical sections on design thinking and design philosophy; aesthetics and perception in design; user experience evaluation methods and tools; user centered design in the software development lifecycle; DUXU education and training. LNCS 10289: The 56 papers included in this volume are organized in topical sections on persuasive and emotional design; mobile DUXU; designing the playing experience; designing the virtual, augmented and tangible experience; wearables and fashion technology. LNCS 10290: The 56 papers included in this volume are organized in topical sections on information design; understanding the user; DUXU for children and young users; DUXU for art, culture, tourism and environment; DUXU practice and case studies.

Synthetic Biology: A Lab Manual Forster Anthony C,Liljeruhm Josefine,Gullberg Erik,2014-04-16 Synthetic Biology: A Lab Manual is the first manual for laboratory work in the new and rapidly expanding field of synthetic biology. Aimed at non-specialists, it details protocols central to synthetic biology in both education and research. In addition, it provides all the information that teachers and students from high schools and tertiary institutions need for a colorful lab course in bacterial synthetic biology using chromoproteins and designer antisense RNAs. As a bonus, practical material is provided for students of the annual international Genetically Engineered Machine (iGEM) competition. The manual is based upon a highly successful course at Sweden's Uppsala University and is coauthored by one of the

pioneers of synthetic biology and two bioengineering postgraduate students. An inspiring foreword is written by another pioneer in the field, Harvard's George Church: "Synthetic biology is to early recombinant DNA as a genome is to a gene. Is there anything that SynBio will not impact? There was no doubt that the field of SynBio needed 'A Lab Manual' such as the one that you now hold in your hands."

Mobility for Smart Cities and Regional Development - Challenges for Higher Education Michael E. Auer, Hanno Hortsch, Oliver Michler, Thomas Köhler, 2022-01-28 This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences (best practice) are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021), which was held online by Technische Universität Dresden, Germany, on 22–24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project-Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc
