The Oxford Handbook of the Psalms William P. Brown,2014-02-28 The Psalms-the longest and most complex book in the Bible-is a varied collection of religious poetry, the product of centuries of composition and revision. It is the most transcribed and translated book of the Hebrew Bible. Intended for both scholar and student, The Oxford Handbook of the Psalms features a diverse array of essays that treat the Psalms from a variety of perspectives. Beginning with an overview of the Psalms that touches on the history of scholarship and interpretation, the volume goes on to explore the Psalms as a form of literature and a source of creative inspiration, an artifact whose origins remain speculative, a generative presence in Judaism, Christianity, and Islam, and a still-current text that continues to be read and appropriated in various ways. Classical scholarship and traditional approaches as well as contextual interpretations and practices are well represented. The Handbook's coverage is uniquely wide-ranging, covering everything from the ancient Near Eastern background of the Psalms to contemporary liturgical usage. This volume offers a dynamic introduction into an increasingly complex field and will be an indispensable resource for all students of the Psalms.

GUIDE OF STREET TREES IN EGYPT Moustafa
Zayed, 2020-04-03 This small guide lists the trees we meet on our daily journeys in Egypt: parks and gardens, squares, along the streets and avenues, and near the beaches. Scientific name, common name, photo(s) in color of each tree and for some of its characteristics and brief description: all this information makes it possible to observe, identify and appreciate the trees commonly encountered during our travels across the country. In addition, each reader can also look for other details in specialized books, scientific journals, or websites dedicated to botany. Ce petit guide répertorie les arbres repérés lors de nos déplacements quotidiens en Égypte : parcs et jardins, places, le long des rues et avenues, et à proximité des plages. Nom scientifique, nom courant, photo(s) en couleur de chaque arbre et de certaines de ses caractéristiques, brève description : toutes ces informations permettent d'observer, identifier et apprécier les arbres couramment rencontrés lors de nos périples dans le pays. Par ailleurs chaque lecteur peut aussi rechercher d'autres détails dans des ouvrages spécialisés, des revues scientifiques, ou des sites internet dédiés à la botanique. يسرد هذا الدليل المُختمَصَر أنواع الأشجار التي نلتقي بها يوميًا في الأماكن العامة في مصر: الحدائق والمتنزهات، الميادين، على طول الشوارع والدروب، وبالقرب من الشواطئ. فعن طريق الاسم العلمي والاسم

Nutrition and Feeding of Organic Cattle, 2nd Edition Robert Blair, 2021-04-28 Organic cattle farming is on the increase, with consumer demand for organic milk and meat growing yearly. Beginning with an overview of the aims and principles behind organic cattle production, this book presents extensive information about how to feed cattle so that the milk and meat produced meet organic standards, and provides a comprehensive summary of ruminant digestive processes and nutrition. Since the publication of the first edition, global consumers have increasingly become concerned with the sustainability of meat production. Here, Robert Blair considers the interrelationships of sustainable practices and profitability of organic herds, reviewing how to improve forage production and quality, and minimizing the need for supplementary feeding using off-farm ingredients.

Smallholders and Stockbreeders P.

Boomgaard, David E.F. Henley, 2021-11-15 Historians of Southeast Asia have traditionally preferred to write about politics and culture rather than economics and ecology, and where they have looked at the history of agriculture they have most often concentrated on cash crops like sugar, coffee and rubber which figure prominently in colonial records. *Smallholders and stockbreeders*, by contrast, provides a rare survey of the history of foodcrop farming, and a unique look at the history of animal husbandry, in the Southeast Asian region. Thirteen contributions by an international selection of expert authors cover topics ranging from the agricultural economy of precolonial Java to the growth of rice production in the Mekong Delta since 1950, and from the breeding of horses on the northern borderlands of mainland Southeast Asia to the production and consumption of beef in the Philippines. New light is shed on old questions regarding the directions in which Southeast Asian agriculture has evolved over the centuries, and new questions raised regarding the cultural, demographic, economic and political determinants of farming practices. While the geographical and chronological scales of analysis vary, most chapters deal with relatively large areas and with developments over periods of 100 years or more. Besides production for subsistence, commercial aspects of livestock and foodcrop farming are also given due attention and prove to have been important in many parts of the region from very early periods. *Smallholders and stockbreeders* is essential reading for anyone

interested in the agricultural history of Southeast Asia, whether for its own sake, or in connection with other aspects of regional history, or for purposes of comparison with other parts of the world.

Diseases at the Wildlife - Livestock Interface
Joaquín Vicente, Kurt C. Vercauteren, Christian Gortázar, 2021-04-29 Shared diseases among wildlife, livestock and humans, often transboundary, are relevant to public health and global economy, as being highlighted currently relative to the global COVID19 pandemic. Diseases at these interfaces also impact the conservation of biodiversity and must be considered when managing wildlife. While wildlife and domestic livestock have coexisted in dynamic systems for thousands of years, spillover disease risks are higher today than in the past due to global patterns of increasing close contact and interactions among wildlife, livestock and humans in the context of complex, diverse and numerous circumstances. Multidisciplinary studies of animal interfaces, especially those involving wildlife, therefore, must be brought to the forefront so that knowledge gaps can be realized and filled to inform managers and policy makers. In the first part of the book authors illustrate and discuss ecological and epidemiological concepts related to the interfaces, with a vision towards socio-ecological system health. In addition, the history of past animal interfaces provides the necessary perspective to focus current questions, better understand present situations, and informs how we can best approach the future. The second part

discusses the myriad of similar and differing wildlife- livestock interfaces found around the world from a regional point of view. The third part focuses on how to assess the spatial and temporal overlap between livestock and wildlife, and authors present new technical innovations about how inter-transmissions between wild and domestic populations can be quantified. An overview of main modeling approaches available to quantify multi-host disease transmission at the wildlife/livestock interface, illustrated with specific-case studies, is also presented. Finally, the need for interdisciplinary approaches and a dedicated thematic field to approach the wildlife/livestock interfaces and create opportunities to promote wildlife-livestock coexistence is emphasized. The concluding chapter presents perspectives and directions to better understanding disease dynamics at the wildlife/livestock interface, global change and implications for the future. The changing distribution of interfaces, ongoing human and environmental changes (e. g. climate warming, changes in animal production systems, etc.) and their likely impacts and consequences for the interfaces and disease transmission processes are all discussed.
