Nonlinear Functional Analysis and Its Applications Radu Precup,2021-04-14 This book consists of nine papers covering a number of basic ideas, concepts, and methods of nonlinear analysis, as well as some current research problems. Thus, the reader is introduced to the fascinating theory around Brouwer's fixed point theorem, to Granas' theory of topological transversality, and to some advanced techniques of critical point theory and fixed point theory. Other topics include discontinuous differential equations, new results of metric fixed point theory, robust tracker design problems for various classes of nonlinear systems, and periodic solutions in computer virus propagation models.

Charters of St Paul's, London S.E Kelly,Susan

Kelly,2004-12-23 St Paul's was the principal church of London from its foundation in A. D. 604. This volume is an edition of all the surviving documentary material from St Paul's from the seventh century to 1066, with expert analysis and commentary on the history of the bishops and the cathedral community within the city and diocese, considered against the background of London's history during this period. The medieval archives of St Paul's suffered at times from neglect, and as a result the majority of the Anglo-Saxon charters of the bishop and chapter are preserved only as fragments in the notebooks of two seventeenth-century scholars who studied a crucial manuscript before it disappeared at the time of the Commonwealth. These excerpts are here edited with full diplomatic and historical commentary, which makes it possible to resurrect to some extent the full documents. The edition of the charters is prefaced by an extended introduction which provides an important new synthesis of the history of London and St Paul's in the Anglo-Saxon period, complete with an extensive bibliography.
