Enterprise JavaBeans Richard Monson-Haefel, 2004 Enterprise JavaBeans, Fourth Edition, is the definitive guide to EJB 2.1. It shows you how to build complex, mission-critical systems using snap-together software components that model business objects and processes. EJB 2.1 makes several important steps forward in EJB technology: message-driven beans are much more flexible, a time service has been added, and EJBs have been integrated with web services. Enterprise JavaBeans delivers on a promise that was astonishing a few years ago: not only can EJBs run without modification on any operating system, they can run on any J2EE application server. However, after writing EJBs, you have to deploy them in an application server, and deploying EJBs can be a painful task. This edition includes the Jboss Workbook, which shows you how to deploy the examples on the open source JBoss Application Server. If you've done any enterprise software development in the past few years, you already know the extent to which EJB has changed the field. Use this book to catch up on the latest developments. If you're new to enterprise software development, or if you haven't been working with EJB, this book will bring you up to speed on this exciting technology for building business systems.

The Basics of Media Writing Scott A. Kuehn,Andrew Lingwall,2016-12-08 The Basics of Media Writing: A Strategic Approach helps readers develop the essential writing skills and professional habits needed to succeed in 21st-century media careers. This research-driven, strategy-based media writing textbook digs deeply into how media professionals think and write in journalism, public relations, advertising, and other forms of strategic communication. Authors Scott A. Kuehn and Andrew Lingwall have created two comprehensive writing models to help students overcome their problems in finding and developing story topics by giving them “starting points” to begin writing. The Professional Strategy Triangle model shows students how to think critically about the audience, the situation, and the message before starting a news story or persuasive piece and the FAJA four-point model asks students a series of questions about their story type (Fact, Analysis, Judgment, or Action) to guide them to the right angle or organizational structure for their message. Rooted in classical rhetorical methods, this step-by-step technique enables readers to strategically approach each writing task, no matter the format.

Planning and Organizing Personal and Professional Development Chris Sangster,2017-07-05 Chris Sangster's book is a practical, step-by-step guide to personal and professional development that covers the strategy, techniques and philosophy behind the process. Lifelong learning, the shift from trainer-centred delivery to learner-centred development and the opportunities provided by new technologies, place considerable onus on individuals to take responsibility for their own learning. This guide will help trainers and facilitators to enable learners to do just that. There are, at least, three different participants involved in any meaningful and sustainable process of

personal development at work - the learner, his or her line manager and mentor(s), and the training (or development support) function. Chris Sangster provides a route map for each of these three roles. He offers a simple, compelling triangular model to illustrate the interaction of each and places particular emphasis on 'learning outcomes' - as opposed to inputs, focusing attention and objective measurement on learning that manifests itself through application, achievement and changes in behaviour. Whether you are looking for a complete and holistic process for developing your people or a highly readable guide to unravelling the myths of development - such as the confusion between personal and professional development - this book has it all.
