

Credence 14

John Gardner Hawley,John Gibbons,John Fickey Geeting,Henry C. Geeting

Credence Penelope Douglas,2024-02-13 Three of them, one of her, and a remote cabin in the woods. Let the hot, winter nights ensue in this steamy dark romance from New York Times bestselling author Penelope Douglas, now with bonus material. Tiernan de Haas doesn't care about anything anymore. The only child of a film producer and his starlet wife, she's grown up with wealth and privilege but not love or guidance. And when her parents suddenly pass away, she knows she should be devastated. But she's always been alone, hasn't she? Jake Van der Berg, her father's stepbrother and her only living relative, assumes guardianship of Tiernan. Sent to live in the mountains of Colorado with Jake and his two sons, Noah and Kaleb, Tiernan quickly learns that these men now have a say in what she chooses to care and not care about anymore. As the men take Tiernan under their wing, she slowly finds her place among them. Because lines blur and rules become easy to break when no one else is watching. One of them has her. The other one wants her. But he's going to keep her.

Official Index to the Times ,1920 Indexes the Times, Sunday times and magazine, Times literary supplement, Times educational supplement, Times educational supplement Scotland, and the Times higher education supplement.

Accuracy and the Laws of Credence Richard Pettigrew,2016 Richard Pettigrew offers an extended investigation into a particular way of justifying the rational principles that govern our credences (or degrees of belief). He draws on decision theory in order to justify the central tenets of Bayesian epistemology, and sets out a veritistic account of epistemic utility.

Reasons without Persons Brian Hedden,2015-06-18 Brian Hedden defends a radical view about the relationship between rationality, personal identity, and time. On the standard view, personal identity over time plays a central role in thinking about rationality. This is because, on the standard view, there are rational norms for how a person's attitudes and actions at one time should fit with her attitudes and actions at other times, norms that apply within a person but not across persons. But these norms are problematic. They make what you rationally ought to believe or do depend on facts about your past that aren't part of your current perspective on the world, and they make rationality depend on controversial, murky metaphysical facts about what binds different instantaneous snapshots (or 'time-slices') into a single person extended in time. Hedden takes a different approach, treating the relationship between different time-slices of the same person as no different from the relationship between different people. For purposes of rational evaluation, a temporally extended person is akin to a group of people. The locus of rationality is the time-slice rather than the temporally extended agent. Taking an impersonal, time-slice-centric approach to rationality yields a unified approach to the rationality of beliefs, preferences, and actions where what rationality demands of you is solely determined by your evidence, with no special weight given to your past beliefs or actions.
