Mr.Udaibir S. Das,Mr.Michael G

Papaioannou,Christoph Trebesch,2012-08-01 This paper provides a comprehensive survey of pertinent issues on sovereign debt restructurings, based on a newly constructed database. This is the first complete dataset of sovereign restructuring cases, covering the six decades from 1950–2010; it includes 186 debt exchanges with foreign banks and bondholders, and 447 bilateral debt agreements with the Paris Club. We present new stylized facts on the outcome and process of debt restructurings, including on the size of haircuts, creditor participation, and legal aspects. In addition, the paper summarizes the relevant empirical literature, analyzes recent restructuring episodes, and discusses ongoing debates on crisis resolution mechanisms, credit default swaps, and the role of collective action clauses.

**Going Broke** Stuart Vyse,2008-01-29 Winner of the prestigious William James Book Award and an authority on irrational behavior, Stuart Vyse offers a unique psychological perspective on the financial behavior of the many Americans today who find they cannot make ends meet, illuminating the causes of our wildly self-destructive spending habits. Bringing together fascinating studies of

consumer behavior, he argues that the mountain of debt burying so many of us is the inevitable byproduct of America's turbo-charged economy and, in particular, of social and technological trends that undermine our self-control. *Going Broke* illuminates everything from the rise of the credit card, to the increase in state lotteries and casino gambling, to the expansion of new shopping opportunities provided by toll-free numbers, home shopping networks, big-box stores, and the Internet, revealing how vast changes in American society over the last 30 years have greatly complicated our relationship with money.

International Marketing Daniel W. Baack, Eric G. Harris, Donald Baack, 2013 *International Marketing* presents an innovative, integrated approach to the course, in which marketing concepts are explored in depth within the international context. The authors identify five key factors that impact any international marketing venture-culture, language, political/legal systems, economic systems, and technological/operational differences-and discuss them in relation to the core marketing concepts of markets, products, pricing, distribution (place), and promotion. Uniquely, the book provides discussions of sustainability and bottom of the pyramid concepts within each chapter, and is

richly illustrated with examples from both multinational companies as well as smaller local concerns. Setting the path for the future direction of this course, the authors provide instructors and students with the first truly international marketing textbook.

Financial Literacy and the Limits of Financial

Decision-Making Tina Harrison, 2016-09-20 This book presents selected papers on the factors that serve to influence an individual's capacity in financial decision-making. Initial chapters provide an overview of the cognitive factors affecting financial decisions and suggest a link between limited cognitive capacity and the need for financial education. The book then expands on these cognitive limitations to explore the tendency for overconfidence in decision-making and the interplay between rational and irrational factors. Later contributions show how credit card companies benefit from limitations in consumer financial literacy, how gender and cognition intersect to play an important role in financial decision-making, and how to improve financial capacity through financial literacy and education campaigns, including those addressing developed marketplaces. This comprehensive collection of papers will be of value to all readers who seek to better understand the multi-factorial and complex nature of personal financial management in today's economic climate.
