Poison Study (Study #1) Maria V. Snyder, 2018-12-10 Pilih satu: Mati dengan cara cepat atau mati perlahan-lahan.... Yelena sudah melakukan pembunuhan, dan karenanya akan dieksekusi. Namun dia mendapatkan tawaran yang menggiurkan dari Valek, tangan kanan sang Komandan: menjadi pencicip makanan Komandan. Yelena akan menyantap makanan ternikmat, tidur di istana..., dan tetap berisiko mati saat melakukan itu semua. Yelena, tentu saja memilih untuk terus hidup dengan menjadi pencicip makanan. Tapi Valek dengan sengaja memberikan racun di makanan Yelena. Itu adalah strategi Valek agar Yelena tidak berbuat jahat kepada Komandan. Yelena masih bisa terus hidup, asalkan setiap pagi dia menemui Valek untuk mendapat penawarnya. Malapetaka terus merundung Yelena. Begitu banyak yang ingin menghabisinya, tapi Yelena sering terhindar dari kematian karena ternyata dirinya pun mewarisi sihir, yang tak pernah dia ketahui. Sesuai Kode Tingkah Laku, penyihir yang ditemukan di Ixia akan dihabisi, berbeda dengan Sitia, tempat para penyihir bebas berkeliaran. Belum ada yang mengetahui tentang sihir Yelena, tapi dia punya satu kendala: dia belum dapat mengendalikan sihirnya. Akankah identitas Yelena terkuak? Apakah dia akan, sekali lagi, dihukum mati?

Domestic Violets Matthew Norman, 2011-08-09 "Hysterical and often touching. . . . *Domestic Violets* is a fast, fun, hilarious read. —Jessica Anya Blau, critically-acclaimed author of *The Summer of Naked Swim Parties* and *Drinking Closer to Home* In the tradition of Jonathan Tropper and Tom Perrotta comes Matthew Norman's *Domestic Violets*—a darkly comic family drama about one man's improbable trials of love, loss, and ambition; of attraction, impotence, and infidelity; and of mid-life malaise, poorly-planned revenge, and the Pulitzer Prize for Fiction.

Cross-Cultural Research Methods in Psychology David Matsumoto, Fons J. R. van de Vijver, 2010-10-11 Cross-cultural research is now an undeniable part of mainstream psychology and

has had a major impact on conceptual models of human behavior. Although it is true that the basic principles of social psychological methodology and data analysis are applicable to cross-cultural research, there are a number of issues that are distinct to it, including managing incongruities of language and quantifying cultural response sets in the use of scales. *Cross-Cultural Research Methods in Psychology* provides state-of-the-art knowledge about the methodological problems that need to be addressed if a researcher is to conduct valid and reliable cross-cultural research. It also offers practical advice and examples of solutions to those problems and is a must-read for any student of culture.

Trepanation, Trephining and Craniotomy José M González-Darder,2019-09-04 This book takes readers on a journey around the world and through time, accompanied by a modern neurosurgeon who reviews historical techniques and instruments used for cranial opening. The author draws on original medical and surgical books to provide a comprehensive history of these techniques and tools. To complement the general overview and offer readers a more 'hands-on' sense of context and atmosphere, extensive historical references, stories, media news and illustrative cases have been included for each historical and geographical scenario. In addition, original illustrations and plates of these archaic instruments and techniques are supplied. Neurosurgical surgeons, nurses, technicians, medical historiographers, paleo-pathologists and researchers interested in surgical techniques for cranial opening will find the volume a valuable guide, intended to increase the historical and cultural awareness of this core topic in neurological surgery.

Exercise, Autophagy and Chronic Diseases Ning

Chen,2021-09-30 This book establishes a bridge between exercise-

mediated functional status of autophagy and non-communicable chronic diseases for elucidating and clarifying the corresponding signal pathways and underlying mechanisms. The book consists of 13 chapters focusing on the in-depth discussion on signal pathways for regulating the functional status of autophagy for the prevention, treatment and rehabilitation of chronic diseases, the optimization of exercise intervention strategies for common and frequently-occurring chronic diseases, and the development of exercise mimetic pills for the persons with disability for exercise performance, or the persons without willing to exercise. This book is interesting and will be useful to a wide readership in the various fields of exercise science, exercise fitness, sports medicine, preventive medicine, and functional foods.

The New Global Frontier George Martine, 2012-05-23 The worlds developing countries will be experiencing massive increases in their urban populations over the 21st century. If managed intelligently and humanely, this growth can pave the way to sustainable development; otherwise, it will favour higher levels of poverty and environmental stress. The outcome depends on decisions being made now. The principal theme that runs through this volume is the need to transform urbanization into a positive force for development. Part I of this book reviews the demography of the urban transition, stressing the importance of beneficial rural-urban connections and challenging commonly held misconceptions. Part II asks how urban housing, land and service provision can be improved in the face of rapid urban expansion, drawing lessons from experiences around the world. Part III analyses the challenges and opportunities that urbanization presents for improving living environments and reducing pressures on local and global ecosystems. These social and environmental challenges must be met in the context of fast-changing demographic circumstances; Part IV explores the range of opportunities that these transformations represent. These challenges and opportunities vary greatly across Africa, Asia and

Latin America, as detailed in Part V. Published with IIED and UNFPA

Ever Faithful David Sartorius, 2014-01-10 Known for much of the nineteenth century as the ever-faithful isle, Cuba did not earn its independence from Spain until 1898, long after most American colonies had achieved emancipation from European rule. In this groundbreaking history, David Sartorius explores the relationship between political allegiance and race in nineteenth-century Cuba. Challenging assumptions that loyalty to the Spanish empire was the exclusive province of the white Cuban elite, he examines the free and enslaved people of African descent who actively supported colonialism. By claiming loyalty, many black and mulatto Cubans attained some degree of social mobility, legal freedom, and political inclusion in a world where hierarchy and inequality were the fundamental lineaments of colonial subjectivity. Sartorius explores Cuba's battlefields, plantations, and meeting halls to consider the goals and limits of loyalty. In the process, he makes a bold call for fresh perspectives on imperial ideologies of race and on the rich political history of the African diaspora.

Social Representations for the Anthropocene: Latin American Perspectives Clarilza Prado de Sousa, Serena Eréndira Serrano Oswald, 2021-04-30 The Anthropocene has become a field of studies in which the influence of human activity on the Earth System and nature is both the main threat and the potential solution. Social Representations Theory has been evolving since the 1960s. It links knowledge and practice in everyday life and is an effective way to deal with systemic crises based on common sense. This book assembles key contributions by Latin American scholars working with social representations in the social sciences that are of conceptual relevance to the study of the Anthropocene and that investigate the societal consequences of complex interrelations between common sense and topics of global relevance, such as the contradictions of sustainable development, the construction of risks beyond risk-perception, health,

negotiation and governance in the field of education, gender equality, the usefulness of longitudinal and systemic ethnography and case studies, and agency and the link between inequality, crises and risk society in the context of COVID-19, presenting theoretical and methodological innovations from Spanish, Portuguese and French research that have rarely been available in English. • This is the first book to address the relevance of Social Representations Theory for the Anthropocene as a societal era • It presents the multidisciplinary scope of Social Representations • This book covers emerging research contributions in Social Representations Theory from Latin America • This book presents innovative research and commentaries by established researchers in the field • This multidisciplinary book should be in the libraries of many disciplines in the social sciences and humanities

Climate Change and Cities Cynthia Rosenzweig, William D. Solecki, Patricia Romero-Lankao, Shagun Mehrotra, Shobhakar Dhakal, Somayya Ali Ibrahim, 2018-03-29 Climate Change and Cities bridges science-to-action for climate change adaptation and mitigation efforts in cities around the world.

Culture of Class Matthew Benjamin Karush, 2012-05-15 Following the mass arrival of European immigrants to Argentina in the early years of the twentieth century new forms of entertainment emerged including tango, films, radio and theater. While these forms of culture promoted ethnic integration they also produced a new kind of polarization that helped Juan Peron to build the mass movement that propelled him to power.

Inclusive Mathematics Education David Kollosche, Renato Marcone, Michel Knigge, Miriam Godoy Penteado, Ole Skovsmose, 2019-03-25 The book provides an overview of state-of-the-art research from Brazil and Germany in the field of inclusive mathematics education. Originated from a research cooperation between two countries where inclusive education in mathematics has been a major challenge, this volume seeks to make recent research findings available to the international community of

mathematics teachers and researchers. In the book, the authors cover a wide variety of special needs that learners of mathematics may have in inclusive settings. They present theoretical frameworks and methodological approaches for research and practice.

Lessons for Education from COVID-19 A Policy Maker's Handbook for More Resilient Systems OECD, 2020-12-15 The COVID-19 pandemic has shaken long-accepted beliefs about education, showing that learning can occur anywhere, at any time, and that education systems are not too heavy to move. When surveyed in May 2020, only around one-fifth of OECD education systems aimed to reinstate the status quo. Policy makers must therefore maintain the momentum of collective emergency action to drive education into a new and better normal.

Psychological Warfare Paul Myron Anthony Linebarger, 2020-04-09 This book is the product of experience rather than research, of consultation rather than reading. It is based on my five years of work, both as civilian expert and as Army officer, in American psychological warfare facilities—at every level from the Joint and Combined Chiefs of Staff planning phase down to the preparing of spot leaflets for the American forces in China. The Oxford Handbook of Diversity and Work Quinetta M.

Roberson, 2013-01-31 Greater workforce diversity and business trends make the management of such diversity an important challenge for organizational leaders. The Oxford Handbook of Diversity and Work offers a comprehensive review of current theory and research and stimulates thoughtful and provocative conversation about future study of diversity in the workplace.

Diversity at Work Bernardo M. Ferdman, Barbara R.

Deane, 2013-11-18 Diversity at Work: The Practice of Inclusion How can organizations, their leaders, and their people benefit from diversity? The answer, according to this cutting-edge book, is the practice of inclusion. Diversity at Work: The Practice of Inclusion (a volume in SIOP's Professional Practice Series) presents detailed solutions for the challenge of inclusion—how to fully connect with, engage, and empower people across all types of differences. Its editors and chapter authors—all topic experts ranging from internal and external change agents to academics—effectively translate theories and research on diversity into the applied practice of inclusion. Readers will learn about the critical issues involved in framing, designing, and implementing inclusion initiatives in organizations and supporting individuals to develop competencies for inclusion. The authors' diverse voices combine to provide an innovative and expansive model of the practice of inclusion and to address its key aspects at the individual, group, and organizational levels. The book, designed to be a hands-on resource, provides case studies and illustrations to show how diversity and inclusion operate in a variety of settings, effectively highlighting the practices needed to benefit from diversity. This comprehensive handbook: Explains how to conceptualize, operationalize, and implement inclusion in organizations. Connects inclusion to multiple dimensions of diversity (including gender, race, ethnicity, nationality, social class, religion, profession, and many others) in integrative ways, incorporating specific and relevant examples. Includes models, illustrations, and cases

showing how to apply the principles and practices of inclusion. Addresses international and multicultural perspectives throughout, including many examples. Provides practitioners with key perspectives and tools for thinking about and fostering inclusion in a variety of organizational contexts. Provides HR professionals, industrial-organizational psychologists, D&I practitioners, and those in related fields—as well as anyone interested in enhancing the workplace—with a one-stop resource on the latest knowledge regarding diversity and the practice of inclusion in organizations. This vital resource offers a clear understanding of and a way to navigate the challenges of creating and sustaining inclusion initiatives that truly work.

Discrimination at Work Robert L. Dipboye, Adrienne Colella, 2013-06-17 This volume brings together top scholars in industrial and organizational psychology with social psychologists to explore the research and theory relating to various areas of workplace discrimination. Many of the contributors to this book participated in a conference on workplace discrimination held at Rice University in May 2000. The idea came from the realization that there had been no attempt to bring together the various literatures on the topic. Discrimination and issues of employment diversity are significant topics today in IO psychology, business, and human resource management. This edited volume examines the following components of this important discussion: how to explain discrimination in organizations; understanding discrimination against specific groups; and implications for practical efforts to reduce discrimination. This book brings together, in one volume, a review of the research on discrimination based on race, age, sexual orientation, gender, physical appearance, disability, and personality. In addition, it

explores the multilevel antecedents and potential bases for a general model of discrimination in the workplace. While social psychological research and theory have provided invaluable insights, an understanding of discrimination in the workplace and solutions will require incorporating factors at the organizational level in addition to factors at the individual and group levels. Although a definitive model is not reached, the aim of this text is to facilitate future research and theory.
