Cyborgs, Santa Claus and Satan Fraser A. Sherman, 2015-09-03 In the three decades since the first SF film produced for television—1968's *Shadow on the Land*—nearly 600 films initially released to television have had science fiction, fantasy, or horror themes. Featuring superheroes, monsters, time travel, and magic, these films range from the phenomenal to the forgettable, from low-budget to blockbuster. Information on all such American releases from 1968 through 1998 is collected here. Each entry includes cast and credits, a plot synopsis, qualitative commentary, and notes of interest on aspects of the film. Appendices provide a list of other films that include some science fiction, horror, or fantasy elements; a film chronology; and a guide to alternate titles.

The Water Mirror Kai Meyer,2012-10-02 In Venice, magic is not unusual. Merle is apprenticed to a magic mirror maker, and Serafin—a boy who was once a master thief—works for a weaver of magic cloth. Merle and Serafin are used to the mermaids who live in the canals of the city and to the guards who patrol the streets on living stone lions. Merle herself possesses something magical: a mirror whose surface is water. She can reach her whole arm into it and never get wet. But Venice is under siege by the Egyptian Empire; its terrifying mummy warriors are waiting to strike. All that protects the Venetians is the Flowing Queen. Nobody knows who or what she is—only that her power flows through the canals and keeps the Egyptians at bay. When Merle and Serafin overhear a plot to capture the Flowing Queen, they are catapulted into desperate danger. They must do everything they can to rescue the Queen and save the city—even if it means getting help from the Ancient Traitor himself.

Thomas Pynchon and the Dark Passages of History David Cowart,2011 For David Cowart, Thomas Pynchon's most profound teachings are about history- history as myth, as rhetorical construct, as false consciousness, as prologue, as mirror, and as seedbed of national and literary identities. In one encyclopedic novel after another, Pynchon has reconceptualized historical periods that he sees as culturally definitive. This book offers a deft analysis of the problems of history as engaged by our greatest living novelist and argues for the continuity of Pynchon's historical vision. -- from Back Cover

The Dark Matter of Words Timothy Walsh,1998 Timothy Walsh's study of the function and significance of absence in literature demonstrates its centrality in terms of both literary technique and philosophical consequence. Textual gaps, narrative lacunae, and strategic vagueness, together with the uncertainties that such devices inevitably generate, have been essential elements of literature from Lao-Tzu to Lawrence, from Chaucer to Faulkner and beyond. Walsh finds that poststructural approaches to indeterminacy tend to overlook the specific and productive roles that absence and uncertainty often play within the overall design of a work. The aesthetic generation of uncertainty, he demonstrates, is not a roadblock on the path to meaning or a sign of some radical and suppressed internal contradiction; rather, it is as basic an artistic aim as the desire to evoke sympathy,

laughter, or outrage. Coining the phrase structured absence to explain a central tenet in his discussion of the mechanics of uncertainty, Walsh analyzes various literary devices and tropes involved in generating a felt sense of absence and a purposeful uncertainty. Structured absences, he demonstrates, combine to form intricate patterns and networks, which explains how the dynamic potential of uncertainty can increase exponentially through a deft orchestration of absence. Walsh argues that the use of absence in works of art--of silence, shadow, blankness, and void--is a principal means by which the inherent biological limitations of human consciousness and of human language are encoded in aesthetic constructs. Because of the limitations of our senses and because we often are more attuned to what lies beyond the threshold of perceptual limits, the lacunae in artistic works represent attempts to replicate the real and inescapable limits of human experience.

Reflections Joshua B. Seth, 2014-05-08 This book is the second in the Reflection's series with the first; a recovery workbook for anorexia and bulimia. Love the Wild Swan Judith Edwards, 2016-10-04 Love the Wild Swan is the culmination of thirty years of clinical and teaching experience, undertaken by child and adolescent psychoanalytic psychotherapist Judith Edwards. Along with new material, the book consists of previously published papers spanning Edwards's entire career, which have been carefully selected to chart the journey that every clinician and human being makes, from babyhood to adult life. Edwards offers an example of how the evolution of meanings occur and how lifelong learning about the self and the other takes place. The book is divided into four parts, with sections on observation, clinical work, teaching theory, and links between these ideas and ongoing life in the form of the arts, through poetry, film and sculpture. Love the Wild Swan will be of interest to practitioners and clinicians, as well as appealing to anyone in the field of mental health who wishes to reflect on the nature of human development and growth.
