Minerals, Collecting, and Value across the US-Mexico Border Elizabeth Emma Ferry, 2013-06-19 "A jewel to those interested in ore mining, mineral collecting and mineralogy, or the anthropology of value." —American Ethnologist Anthropologist Elizabeth Emma Ferry traces the movement of minerals as they circulate from Mexican mines to markets, museums, and private collections on both sides of the United States-Mexico border. She describes how and why these byproducts of ore mining come to be valued by people in various walks of life as scientific

specimens, religious offerings, works of art, and luxury collectibles. The story of mineral exploration and trade defines a variegated transnational space, shedding new light on the complex relationship between these two countries—and on the process of making value itself. “A novel contribution to the anthropology of natural resources.” —Journal of Latin American and Caribbean Anthropology

The Public Papers of Governor Keen Johnson, 1939-1943 Keen Johnson, 2014-10-17 Keen Johnson was governor of Kentucky from 1939 to 1943 -- years that spanned the end of the Depression and the initial involvement of this country in the Second World War. The account of Johnson's administration is chronicled here through a collection of his public papers. The material, organized by subject and arranged chronologically within each area, presents a rather clear picture of Governor Johnson's plans and concerns for Kentucky and of the actions he took as chief executive on behalf of the state. In contrast to contemporary procedures concerning the preservation of governors' papers in university and state archives, many of the Johnson papers were difficult to locate and, apart from a few complete speech manuscripts, were reconstructed in large part from cards containing outlines and notes for speeches, along with many state and local newspaper accounts of speeches he made and of events in which he participated. Many speeches have been

extensively footnoted by the editor to provide the reader with supplementary information. Also included in this volume is a perceptive evaluation of the Johnson administration by H. Clyde Reeves, who served in it as a commissioner of revenue. The appendix offers as complete a listing as was possible to reconstruct of the speeches delivered by Governor Johnson during his term of office.

Blue John's Cavern Tracy Diane,2017-05-10 Traveling through caves, jumping through time.

Nothing interesting ever happens in Diamond Falls, West Virginia, and that's doubly true for local teenagers Emma and Brody. Little do they know that their neighbor, a famous geologist, is about to show them the wildest time of their lives. When Mr. M's prized rock and mineral collection is destroyed before it can be displayed at the state museum, Emma and Brody jump at the chance to find new samples. The geologist accepts the offer, and promptly sends them back to the year 1775 to help! Back in time and across the pond in Castleton, Derbyshire, England, Emma and Brody team with a mysterious young girl named Max to recover one of the rarest minerals in the world: Blue John Fluorite. Tapping into courage they never knew they had, the formerly ordinary West Virginians must protect a cave, avoid gun-toting soldiers, and return to the present before they're trapped forever. Blue John's Cavern is the first book in the middle grade adventure/sci-fi series Crystal Cave Adventures.
