The Spiritual Exercises and the Ignatian Mystical Horizon Harvey D. Egan, 2020-11-30 This book is a revision and condensation of a doctoral dissertation which its author wrote under the direction of the well-known Father Karl Rahner at the University of Münster. It focuses on the importance of St. Ignatius' small book, the *Spiritual Exercises*, as a source of theological investigation. Thus it stems from Rahner's own "conviction," as he states in his foreword, "that the real theological (and not only the spiritual) significance of Ignatius' *Spiritual Exercises* . . . presents a non-yet accomplished task to today's theology." Absorbing, synthesizing, and completing past studies on the Exercises, Father Egan summarizes the finding of modern scholars such as Przwara, Fessard, Karl Rahner, Hugo Rahner, Marxer, Cusson, Gil, Bakker, and Gonzalez de Mendoza—all hitherto relatively unavailable in English—and then presents his own fresh viewpoint. His quest is for Ignatius' mystical horizon, "the lived internal unity, . . . the roots of all of Ignatius' experiences, knowledge, and love." Applying the contemporary methodology in theology to the study of the Ignatian Exercises, the author offers a penetrating and comprehensive treatment of Ignatius' "consolation without previous cause," of the "Three Times of Election," including intellectual and affective discernment, the trinitarian dimensions of the Exercises, and other important Ignatian themes. The book is scholarly and extensively documented and seems to be the most comprehensive and up to date theological commentary in English on the Exercises. One experienced critic has called it "one of the greatest contributions to the present commentary on the Exercises."

Local Approach to Fracture Jacques Besson, Dominique Moinereau, Dirk Steglich, 2006

Improving the structural integrity together with the performance (weight, time to failure,...) of structures requires a persisting effort in the field of mechanics of materials and structures. This can be achieved by a better understanding of the relationships between microscopic mechanisms and the macroscopic material behavior and structural response with respect to damage and fracture. This improvement strategy of materials, structures and assessment methods can be described as local approach to fracture. The local approach to fracture is an active research field. Initially developed in the context of steel structures (pressure vessels), its application domain has become wider and now deals with various kinds of materials (metallic alloys, metal matrix composites, polymers, elastomers, concrete) as well as various physical deformation and damage mechanisms (plasticity, creep, fatigue, ductile fracture, brittle fracture, ...). This volume contains the proceedings on an international conference dedicated to these issues.

THERMEC 2011 T. Chandra, M. Ionescu, Diego Mantovani, 2012-01-03 Volume is indexed by Thomson Reuters CPCI-S (WoS). These are the proceedings of the 7th International Conference on Processing and Manufacturing of Advanced Materials - THERMEC 2011 - which was held during the 1-5 August 2011 in Quebec City, Canada. The conference brought together researchers and engineers/technologists working on various aspects of the processing, fabrication, structure/property evaluation and applications of both ferrous and non-ferrous materials; including biomaterials and smart/intelligent materials. The contents are thus and excellent and up-to-date guide to these subjects.

Made in Europe Klaus Nathaus, 2016-01-22 This edited collection studies the production and dissemination of popular music, tourism, cinema,

fashion, broadcasting programmes, advertising and coffee in Western Europe in the twentieth century. Focussing on the supply side of popular culture, it addresses a field of study that is neglected in European historiography. Moreover, it provides a theoretical and methodological discussion that takes into account the inherent dynamics of content production and the role of cultural intermediaries in the change of cultural repertoires. Taking key developments in the culture industries in the USA as a point of reference, the book highlights particularities of cultural production in Europe. It identifies a greater autonomy of creatives, stronger influence of critics and a lesser concern with audience research as three characteristics of the production regime in Western Europe. It takes into view the transfer of popular culture across the Atlantic and between European countries and offers new insights into research on the cultural Americanisation of Europe. This book was originally published as a special issue of the European Review of History.

Fulfilling the Trust Saat Norshahril, 2000-02-21 Muslims constitute about half a million or 15 percent of Singapore's multiracial and multireligious population. In 1968, the Singapore Parliament passed the Administration of Muslim Law Act (AMLA), which led to the formation of Muis or the Majlis Ugama Islam Singapura (Islamic Religious Council of Singapore). The formation of Muis has brought about better administration of Muslim affairs in Singapore in meeting the religious needs of the Muslim community in areas like the issuance of fatwa (religious rulings), provision of halal food, management of haj (religious pilgrimage), collection and disbursement of zakat (charity tithe), running of madrasahs (religious schools) and having access to sound Islamic education. This was achieved with Muis having earned the trust and confidence of the community and ensuring the mutual facilitation of the community's, state's and society's needs. Fulfilling the Trust: 50 Years of Shaping Muslim Religious Life in Singapore is the first book that comprehensively studies the development of Muis'

policies over the last 50 years since its founding in 1968. It offers an insight into the multi-faceted considerations and the overall context of the development of such policies, providing a wide-ranging and evaluative analyses of their evolution in the various work domains. The book argues that in order to better appreciate Muis' policies, one has to also understand the critical junctures, socio-historical context, diverse stakeholders and decision-makers' perspectives that led Muis to respond to issues and challenges in a certain way. This book is a valuable contribution to the community's cultural and experiential heritage, providing an indispensable resource for anyone or any institution wishing to pursue a constructive role for religious communities to equally contribute towards the betterment of a thriving plural society ensconced within a secular-based polity.

Transactional Agents Khaled Nagi,2003-06-30 The term "agent" is one of those catchwords that mean widely differing things to different people. To telecommunications people it is little more than a mobile piece of code that may be executed at any place. At the other extreme, AI people often associate with agents human-like traits such as social behavior. In between, software people view agents as fairly self-contained pieces of software that, at the low end, pretty much act like objects and, at the high end, more or less automatically decide when and how to react to stimuli or proactively initiate effects that can be observed from their environment. Software agents are particularly important when it comes to distributed environments. There, much of the communication takes place asynchronously, that is the sequence of events cannot be planned ahead in all detail. Instead, agents are given rules as to how to interpret the current situation and, given a common goal, so that they adjust their response accordingly.

Origins and early years Gilbert Norman Tucker,1952

No Truck with the Chilean Junta! Ann Jones, 2014-08-01 When lorry drivers in Northampton slapped stickers on their cabs declaring 'No truck with the Chilean Junta!' they were doing more than threatening to boycott. They were asserting their own identity as proud unionists and proud internationalists. But what did trade unionists really know of what was happening in Chile? And how could someone else's oppression become a means to solidify your own identity? The labour movements of Britain and Australia used 'Chile' as an impetus for action and to give meaning to their own political expression, though it was not all smooth sailing. Throughout the 1970s, social movements and unions alternately clashed and melded, and those involved with 'Chile' were also caught within the unhappy marriage of the cross-cultural left. This book draws together the events and stories of these complex times.

The New Brand Spirit Christian Conrad, Marjorie Ellis Thompson, 2016-03-03 Effective sustainability communication can deliver business value. Get it wrong, however, and the reputational damage will be costly. Stakeholders, and the general public as well as activists, are unforgiving of companies whose products, services, business practices or culture fall short of their socially responsible rhetoric. Based on close to one hundred in-depth interviews with leading experts, Christian Conrad and Marjorie Thompson's *The New Brand Spirit* helps corporate communications and marketing professionals tackle this conundrum by providing a first-hand view of eight distinct and relevant stakeholder perspectives. Nineteen comprehensive and well-researched best practice cases from sustainability leaders like IBM, Unilever, Marks & Spencer and Puma will inspire all those tasked with communicating sustainability with practical and applicable tools and lessons learned. The result is a book that will enable senior

executives, corporate communication professionals and brand managers to decide when, to whom and how to communicate sustainability related messages - and when not to.

Social Work and the Making of Social Policy

Klammer, Ute, Leiber, Simone, 2020-12-16 Bringing together international case studies, this book offers theoretical and empirical insights into the interaction between social work and social policy. Moving beyond existing studies on policy practice, the book employs the policy cycle as a core analytical frame and focuses on the influence of social work(ers) in the problem definition, agenda setting, policy formulation and implementation of social policy. Twenty-three contributors offer examples of policy making from seven different countries and demonstrate how social work practitioners can become political actors, while also encouraging policy makers to become aware of the potential of social work for the social policy-making process.

The Challenge of God Colby Dickinson, Hugh

Miller, Kathleen McNutt, 2020-01-23 In view of the double vocative that characterizes the relation of Creator to creature, this book offers critiques of modern and postmodern philosophy for the ways in which they have separated philosophy, theology, and spirituality. This collection examines the complicated relationship of God to Being and the meaning of Revelation, as well as highlighting the context and the role of the Spiritual Exercises of Ignatius Loyola. Discussions include the Catholic Principle and its relevance in contemporary times, and Christian epic visionaries such as Dante, Milton, Blake, and Joyce, providing scholars a forum to debate their theological identity and its meaning for future studies. This volume contributes a unique engagement from many

perspectives with the Catholic intellectual tradition in its philosophical, theological, spiritual, literary, and artistic dimensions.
