Jan Nattier

**The "bolometer"** Samuel Pierpont Langley, 1881

**Fanged Noumena** Nick Land, 2011-04-01 A dizzying trip through the mind(s) of the provocative and influential thinker Nick Land. During the 1990s British philosopher Nick Land's unique work, variously described as "rabid nihilism," "mad black deleuzianism," and "cybergothic," developed perhaps the only rigorous and culturally-engaged escape route out of the malaise of "continental philosophy" —a route that was implacably blocked by the academy. However, Land's work has continued to exert an influence, both through the British "speculative realist" philosophers who studied with him, and through the many cultural producers—writers, artists, musicians, filmmakers—who have been invigorated by his uncompromising and abrasive philosophical vision. Beginning with Land's early radical rereadings of Heidegger, Nietzsche, Kant and Bataille, the volume collects together the papers, talks and articles of the mid-90s—long the subject of rumour and vague legend (including some work which has never previously appeared in print)—in which Land developed his futuristic theory-fiction of cybercapitalism gone amok; and ends with his enigmatic later writings in which Ballardian fictions, poetics, cryptography, anthropology, grammatology and the occult are smeared into unrecognisable hybrids. *Fanged Noumena* gives a dizzying perspective on the entire trajectory of this provocative and influential thinker's work, and has introduced his unique voice to a new generation of readers.

**The Anthropology of Music** Alan P. Merriam, 1964 In this highly praised and seminal work, Alan Merriam demonstrates that music is a social behavior—one worthy and available to study through the methods of anthropology. In it, he convincingly argues that ethnomusicology, by definition, cannot separate the sound-analysis of music from its cultural context of people thinking, acting, and creating. The study begins with a review of the various approaches in ethnomusicology. He then suggests a useful and simple research model: ideas about music lead to behavior related to music and this behavior results in musical sound. He explains many aspects and outcomes of this model, and the methods and techniques he suggests are useful to anyone doing field work. Further chapters provide a cross-cultural round-up of concepts about music, physical and verbal behavior related to music, the role of the musician, and the learning and composing of music. *The Anthropology of Music* illuminates much of interest to musicologists but to social scientists in general as well.

**Boundary-Layer Theory** Hermann Schlichting (Deceased), Klaus Gersten, 2016-10-04 This new edition of the near-legendary textbook by Schlichting and revised by Gersten presents a comprehensive overview of boundary-layer theory and its application to all areas of fluid mechanics, with particular emphasis on the flow past bodies (e.g. aircraft aerodynamics). The new edition features an updated reference list and over 100 additional changes throughout the book, reflecting the latest advances on the subject.

**History of Kane County, Ill** Rodolphus Waite Joslyn, Frank Wilber Joslyn, 1908 The first volume highlights communities and history of numerous villages, cities and townships of Kane County. The second volume contains biographies of many Kane County residents.

**Basic Ship Propulsion** J. P. Ghose, 2004

**Drilling Engineering** Neal Jay Adams, 1985

**Once Upon a Future Time** Jan Nattier, 1991 An in-depth study of Buddhist theories of the decline and disappearance of their own religion. Nattier's work challenges previous assumptions on this topic and focuses on the critical study of the Kausambi Story, a Buddhist prophecy of decline, in its Tibetan, Central Asian, and Chinese variants.
