**World Drug Report 2008** United Nations Office on Drugs and Crime,2008-06-26 The Report continues to provide in depth trend analysis of the four main drug markets in its first section. In addition, to mark the one hundred year anniversary of the Shanghai Opium Commission, and one hundred years of international drug control, the Report contains an in-depth look at the development of the international drug control system. The Report also contains a small statistical annex which provides a detailed look at production, prices and consumption. As in previous years, the present Report is based on data obtained primarily from the annual reports questionnaire (ARQ) sent by Governments to UNODC in 2007, supplemented by other sources when necessary and where available. Two of the main limitations herein are: (i) that ARQ reporting is not systematic enough, both in terms of number of countries responding and of content, and (ii) that most countries lack the adequate monitoring systems required to produce reliable, comprehensive and internationally comparable data. National monitoring systems are, however, improving and UNODC has contributed to this process.

Class, Race, and Inequality in South Africa Jeremy Seekings,Nicoli Nattrass,2008-10-01 The distribution of incomes in South Africa in 2004, ten years after the transition to democracy, was probably more unequal than it had been under apartheid. In this book, Jeremy Seekings and Nicoli Nattrass explain why this is so, offering a detailed and comprehensive analysis of inequality in South Africa from the midtwentieth century to the early twenty-first century. They show that the basis of inequality shifted in the last decades of the twentieth century from race to class. Formal deracialization of public policy did not reduce the actual disadvantages experienced by the poor nor the advantages of the rich. The fundamental continuity in patterns of advantage and disadvantage resulted from underlying continuities in public policy, or what Seekings and Nattrass call the "distributional regime." The post-apartheid distributional regime continues to divide South Africans into insiders and outsiders. The insiders, now increasingly multiracial, enjoy good access to well-paid, skilled jobs; the outsiders lack skills and employment.
