SIMD Programming Manual for Linux and Windows Paul Cockshott,Kenneth Renfrew,2013-03-09 A number of widely used contemporary processors have instruction-set extensions for improved performance in multi-media applications. The aim is to allow operations to proceed on multiple pixels each clock cycle. Such instruction-sets have been incorporated both in specialist DSPchips such as the Texas C62xx (Texas Instruments, 1998) and in general purpose CPU chips like the Intel IA32 (Intel, 2000) or the AMD K6 (Advanced Micro Devices, 1999). These instruction-set extensions are typically based on the Single Instruction-stream Multiple Data-stream (SIMD) model in which a single instruction causes the same mathematical operation to be carried out on several operands, or pairs of operands, at the same time. The level of parallelism supported ranges from two floating point operations, at a time on the AMD K6 architecture to 16 byte operations at a time on the Intel P4 architecture. Whereas processor architectures are moving towards greater levels of parallelism, the most widely used programming languages such as C, Java and Delphi are structured around a model of computation in which operations take place on a single value at a time. This was appropriate when processors worked this way, but has become an impediment to programmers seeking to make use of the performance offered by multi-media instruction -sets. The introduction of SIMD instruction sets (Peleg et al.

The Satellite Communication Applications Handbook Bruce R. Elbert,2004 Since the publication of the best-selling first edition of The Satellite Communication Applications Handbook, the satellite communications industry has experienced explosive growth. Satellite radio, direct-to-home satellite television, satellite telephones, and satellite guidance for automobiles are now common and popular consumer products. Similarly, business, government, and defense organizations now rely on satellite communications for day-to-day operations. This second edition covers all the latest advances in satellite technology and applications including direct-to-home broadcasting, digital audio and video, and VSAT networks. Engineers get the latest technical insights into operations, architectures, and systems components.

Astro-Imaging Projects for Amateur Astronomers Jim Chung,2015-07-09 This is the must-have guide for all amateur astronomers who double as makers, doers, tinkerers, problem-solvers, and inventors. In a world where an amateur astronomy habit can easily run into the many thousands of dollars, it is still possible for practitioners to get high-quality results and equipment on a budget by utilizing DIY techniques. Surprisingly, it's not that hard to modify existing equipment to get new and improved usability from older or outdated technology, creating an end result that can outshine the pricey higher-end tools. All it takes is some elbow grease, a creative and open mind and the help of Chung's hard-won knowledge on building and modifying telescopes and cameras. With this book, it is possible for readers to improve their craft, making their equipment more user friendly. The tools are at hand, and the advice on how to do it is here. Readers will discover a comprehensive presentation of astronomical projects that any amateur on any budget can replicate – projects that utilize leading edge technology and techniques sure to invigorate the experts and elevate the less experienced. As the maker community continues to expand, it has wonderful things to offer amateur astronomers with a willingness to get their hands dirty. Tweaking observing and imaging equipment so that it serves a custom purpose can take your observing options to the next level, while being fun to boot.

A Manual of Pahlavi Henrik Samuel Nyberg,1964

Mathematical Tables Charles Hutton,1830

The Vicuña Iain Gordon,2010-10-29 Things have changed. In 1969 when the Convention for the Conservation of the Vicuña was drafted, in an attempt to save the vicuña from its tumbling decline towards extinction, both the science and the philosophy of wildlife conservation were radically different. It is thus a tribute to the prescience of those involved at the time that the rescue plan had, even through the harsh lens of hindsight, a distinctly Twenty First Century flavour. After all, it was predicated on the expectation that if vicuña could be saved, they would one day become a valued asset, generating revenue for the human communities that fostered their survival. Embodied in this aspiration are the main structures of modern biodiversity conservation – not only is it to be underpinned by science, but that science should be of both the natural and the social genres, woven into inter-disciplinarity, and thereby taking heed of economics, governance, ownership and the like, alongside biology. In addition, it should include, as a major strut, the human dimension, taking account of the affected constituencies with their varied stakes in alternative outcomes. This contemporary framework for thinking about biodiversity conservation is inseparable from such wider, and inherently political, notions as community-based conservation and ultimately sustainable use.

What Fire is in Mine Ears: Progress in Auditory Biomechanics: Christopher A. Shera,Elizabeth S. Olson,2011-12-14 This proceedings would be of interest to researchers and teachers (academic and industrial) interested in the auditory system (includes engineers, physicists, mathematicians, physiologists, biologists), clinical otolaryngologists and audiologists. Contributions to the 11th International Mechanics of Hearing Workshop discuss the most recent findings and theories

of peripheral auditory function. With the aim of promoting the advancement and integration of experimental and theoretical studies of the mechanics of hearing, the Workshop brings together leading researchers working at the molecular, cellular, and systems levels using biological, mathematical, and engineering techniques. The Workshop focuses on the biomechanics, biophysics, and cellular/molecular physiology of the peripheral auditory system, including the mechanics of non-mammalian auditory and vestibular systems, as well as other biological mechano-transducing systems. Summaries and transcripts of tutorial and discussion sessions are also included.

In Principle, In Practice John H. Falk,Lynn D. Dierking,Susan Foutz,2007-05-04 The science museum field has made tremendous advances in understanding museum learning, but little has been done to consolidate and synthesize these findings to encourage widespread improvements in practice. By clearly presenting the most current knowledge of museum learning, In Principle, In Practice aims to promote effective programs and exhibitions, identify promising approaches for future research, and develop strategies for implementing and sustaining connections between research and practice in the museum community.

Introduction to Satellite Communication Bruce R. Elbert,2008 Whether you are a technical or management professional, you can turn to this highly understandable and comprehensive overview of satellite technology, applications, and management. Thoroughly updated and expanded, this third edition boasts a wealth of new material, including added coverage of systems engineering as applied to satellite communications, clear explanations of all aspects of building and using a satellite systems, and discussions on digital communications and processing in modern satellite networks. The new edition also examines critical success factors and how to avoid the pitfalls in selecting satellite and ground resources. The book covers all the fundamentals of satellites, ground control systems, and earth stations, considering the design and operation of each major segment. You gain a practical understanding of the basic construction and usage of commercial satellite networks-how parts of a satellite system function, how various components interact, which role each component plays, and which factors are the most critical to success. Moreover, the book explores the economic, legal, and management issues involved in running the business of satellite communications.
