In the Realm of the Diamond Queen Anna

Lowenhaupt Tsing, 2021-04-13 In this highly original and much-anticipated ethnography, Anna Tsing challenges not only anthropologists and feminists but all those who study culture to reconsider some of their dearest assumptions. By choosing to locate her study among Meratus Dayaks, a marginal and marginalized group in the deep rainforest of South Kalimantan, Indonesia, Tsing deliberately sets into motion the familiar and stubborn urban fantasies of self and other. Unusual encounters with her remarkably creative and unconventional Meratus friends and teachers, however, provide the opportunity to rethink notions of tradition, community, culture, power, and gender--and the doing of anthropology. Tsing's masterful weaving of ethnography and theory, as well as her humor and lucidity, allow for an extraordinary reading experience for students, scholars, and anyone interested in the complexities of culture. Engaging Meratus in wider conversations involving Indonesian bureaucrats, family planners, experts in international development, Javanese soldiers, American and French feminists, Asian-Americans, right-to-life advocates, and Western intellectuals, Tsing looks not for consensus and coherence in Meratus culture but rather allows individual Meratus men and women to return our gaze. Bearing the fruit from the lively contemporary conversations between anthropology and cultural studies, *In the Realm of the Diamond Queen* will prove to be a model for thinking and writing about gender, power, and the politics of identity.

Architecture and Modernity Hilde

Heynen, 2000-02-28 Bridges the gap between the history and theory of twentieth-century architecture and cultural theories of modernity. In this exploration of the relationship between

modernity, dwelling, and architecture, Hilde Heynen attempts to bridge the gap between the discourse of the modern movement and cultural theories of modernity. On one hand, she discusses architecture from the perspective of critical theory, and on the other, she modifies positions within critical theory by linking them with architecture. She assesses architecture as a cultural field that structures daily life and that embodies major contradictions inherent in modernity, arguing that architecture nonetheless has a certain capacity to adopt a critical stance vis-à-vis modernity. Besides presenting a theoretical discussion of the relation between architecture, modernity, and dwelling, the book provides architectural students with an introduction to the discourse of critical theory. The subchapters on Walter Benjamin, Ernst Bloch, Theodor Adorno, and the Venice School (Tafuri, Dal Co, Cacciari) can be studied independently for this purpose.

The Great Utopia Solomon R. Guggenheim

Museum, 1992 In this volume, which accompanies the largest exhibition ever mounted at the Guggenheim Museum, twenty-one essays by eminent scholars from Germany, Great Britain, Russia, and the United States explore the activity of the Russian and Soviet avant-garde in all its diversity and complexity. These essays trace the work of Malevich's Unovis (Affirmers of the New Art) collective in Vitebsk, which introduced Suprematism's all-encompassing geometries into the design of textiles, ceramics, and indeed whole environments; the postrevolutionary reform of art education and the creation of Moscow's Vkhutemas (Higher Artistic-Technical Workshops), where the formal and analytical principles of the avant-garde were the basis of instruction; the debates over a proletarian art and the transition to Constructivism, production art, and the artist-constructor; the organization of new artist-administered museums of artistic culture; the third path in non-objective art taken by Mikhail Larionov; the return to figuration in the mid-1920s by the young artists - and former students of the avant-garde - in Ost (the Society

of Easel Painters); the debates among photographers, in the late 1920s and early 1930s, on the superiority of the fragmented or continuous image as a representation of the new socialist reality; book, porcelain, fabric, and stage design; and the evolution of a new architecture, from the experimental projects of Zhivskul'ptarkh (the Synthesis of Painting, Sculpture, and Architecture Commission) to the multistage competition, in 1931-32, for the Palace of Soviets, which proved the inapplicability of a Modernist architecture to the Bolshevik Party's aspirations.

Dictionary of Americanisms John Russell

Bartlett, 2018-08-05 Excerpt from Dictionary of Americanisms: A Glossary of Words and Phrases Usually Regarded as Peculiar to the United States The first edition of this Dictionary was published in New York in 1848. It met with a quick sale, and soon passed out of print. Aware of its many imperfections, I began my preparations for a new edition before it had fully left the press. From that time to the day the last sheets of this edition left my hands for the printer, now ten years, I have been more or less occupied in its preparation. Nearly three years of this period I spent in the interior of the country, in the service of the United States as Commissioner on the Mexican Boundary; but even there, I failed not to note the peculiarities of the familiar language of the frontier, and carefully recorded the words and phrases I met with for future use. This experience enabled me to collect the singular words occurring in prairie and frontier life as well as those common to Texas, New Mexico, and

California. Most of these have come from the Spanish, and are now fairly engrafted on our language. The other alterations and improvements made in this edition, consist in the addition of a very large number Of words and phrases peculiar to the United States; so that it now contains probably twice as many as the first edition. The examples or illustrations from authors, showing the use of words, have also been greatly multiplied. This seemed desirable, as exam ples convey a far more correct idea of their meaning and use than a simple definition. The. Histories of words and their definitions have also been corrected and improved. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Kyoka, Japan's Comic Verse Robin D. Gill, 2009-10 Even readers with no particular interest in Japan – if such odd souls exist – may expect unexpected pleasure from this book if English metaphysical poetry, grooks, hyperlogical nonsense verse, outrageous epigrams, the (im)possibilities and process of translation between exotic tongues, the reason of puns and rhyme, outlandish metaphor, extreme hyperbole and whatnot tickle their fancy. Read together with *The Woman Without a Hole*, also by Robin D. Gill, the hitherto overlooked ulterior side of art poetry in Japan may now be thoroughly

explored by monolinguals, though bilinguals and students of Japanese will be happy to know all the original Japanese is included. This Reader is a selection from *Mad in Translation* – a thousand years of *kyōka*, comic Japanese poetry in the classic *waka* mode, a 2000-poem, 200-chapter, 740-page monster of a book. It offers a 300-page double distillation high-proof sample of the poetry and prose, with improved translations, re-considered opinions and additional snake-legs (explanation some scholars may not need). The scattershot of two-page chapters and notes have been compounded into a score of cannonball-sized thematic chapters with just enough weight to bowl over most specialists yet, hopefully, not bore the amateur and sink a potentially broad-beamed readership. Entrepreneurship, Innovation and Regional Development David Smallbone,Markku Virtanen,Arnis Sauka,2016-07-29 Entrepreneurship and innovation are arguably the main drivers of economic development today. This book explores the two in depth, at both the national and regional levels, using a variety of methodologies. The expert contributors discuss the subject from a policy perspective, with case studies from a host of countries including new member states of the EU as well as established EU member states. Split into three parts, the book focuses on: innovation, entrepreneurial activity and regional development, and entrepreneurship and SME policy.

From the Web to the Grid and Beyond René Brun,Federico Carminati,Giuliana Galli Carminati,2012-01-10 Born after World War II, large-scale experimental high-energy physics (HEP) has found itself limited ever since by available accelerator, detector and computing technologies.

Accordingly, HEP has made significant contributions to the development of these fields, more often than not driving their innovations. The invention of the World Wide Web at CERN is merely the best-known example out of many. This book is the first comprehensive account to trace the history of this pioneering spirit in the field of computing technologies. It covers everything up to and including the present-day handling of the huge demands imposed upon grid and distributed computing by full-scale LHC operations—operations which have for years involved many thousands of collaborating members worldwide and accordingly provide the original and natural testbed for grid computing concepts. This book takes the reader on a guided tour encompassing all relevant topics, including programming languages, software engineering, large databases, the Web, and grid- and cloud computing. The important issue of intellectual property regulations for distributed software engineering and computing is also addressed. Aptly, the book closes with a visionary chapter of what may lie ahead. Approachable and requiring only basic understanding of physics and computer sciences, this book is intended for both education and research.

Hadronic Structure José L. Goity, 2001 This volume contains lectures presented at the 14th Annual Hampton University Graduate Studies at the Continuous Electron Beam Accelerator Facility (HUGS at CEBAF), that took place at Jefferson Lab and Hampton University from June 1st to 18th, 1999. The programme was focused on the structure of hadrons from the low to the high energy regimes, including a balance of theory and experiment, and emphasized topics in electron scattering on the nucleon and nuclei.

Fire on the Plateau Charles F. Wilkinson, 1999–04 This book recounts my journey through the Colorado Plateau, a journey through place and time and

self.... During my explorations of more than three decades, I found a land that sears into my heart and soul, a place that has taught me and changed me. I also discovered a land of conflict and endurance, a land that has given birth to one of the great chapters in American history. --from the Introduction *The Colorado Plateau*, stretching across four states and covering nearly 80 million acres, is one of the most unique and spectacular landscapes in the world. Remote, rugged, and dry -- at once forlorn and glorious -- it is a separate place, a place with its own distinctive landscape, history, and future. In *Fire on the Plateau*, legal scholar and writer Charles Wilkinson relates the powerful story of how, over the past thirty years, he has been drawn ever more deeply into the redrock country and Indian societies of the Colorado Plateau. His work in the early 1970s as staff attorney for the newly formed Native American Rights Fund brought him into close contact with Navajo and Hopi people. His growing friendships with American Indians and increasing understanding of their cultures, along with his longstanding scholarship and experiences on federal public lands, led him to delve into the complicated history of the region. Wilkinson examines that history -- the sometimes violent conflicts between indigenous populations and more recent settlers, the political machinations by industry and the legal establishment, the contentious disputes over resources and land use -- and provides a compelling look at the epic events that have shaped the region. From centuries of habitation by native peoples to Mormon settlement, from the Big Build-Up of the post-World War II era to the increased environmental awareness of recent years, he explores the conquests of tribes and lands that have taken place, and the ways in which both have endured. Throughout, Wilkinson uses his own

personal experiences as a lawyer working with Indian people and his heartfelt insights about a land that he grew to love to tie together the threads of the story. *Fire on the Plateau* is a vital and dynamic work that is sure to strike a chord with anyone interested in the past or future of the American Southwest.

The Discipline of Architecture Andrzej Piotrowski, Julia W. Robinson, 2001 In the vast literature on architectural theory and practice, the ways in which architectural knowledge is actually taught, debated, and understood are too often ignored. The essays collected in this groundbreaking volume address the current state of architecture as an academic and professional discipline. The issues considered range from the form and content of architectural education to the architect's social and environmental obligations and the emergence of a new generation of architects. Often critical of the current paradigm, these essays offer a provocative challenge to accepted assumptions about the production, dissemination, and reception of architectural knowledge. Making the News Amber E. Boydston, 2013-08-26
Media attention can play a profound role in

whether or not officials act on a policy issue, but how policy issues make the news in the first place has remained a puzzle. Why do some issues go viral and then just as quickly fall off the radar? How is it that the media can sustain public interest for months in a complex story like negotiations over Obamacare while ignoring other important issues in favor of stories on “balloon boy?” With *Making the News*, Amber Boydstun offers an eye-opening look at the explosive patterns of media attention that determine which issues are brought before the public. At the heart of her argument is the observation that the media have two modes: an “alarm mode” for breaking stories and a “patrol mode” for covering them in greater depth. While institutional incentives often initiate alarm mode around a story, they also propel news outlets into the watchdog-like patrol mode around its policy implications until the next big news item breaks. What results from this pattern of fixation followed by rapid change is skewed coverage of policy issues, with a few receiving the majority of media attention while others receive none at all. Boydstun documents this systemic explosiveness and skew through analysis of media coverage across policy issues, including in-depth looks at the waxing and waning of coverage around two issues: capital punishment and the “war on terror.” *Making the News* shows how the seemingly unpredictable day-to-day decisions of the newsroom produce distinct patterns of operation with implications—good and bad—for national politics.
