**How to Build Glued-lapstrake Wooden Boats** John Brooks, Ruth Ann Hill, 2004 As a child, John Brooks loved to build models and sail with his grandfather. He began building boats in commercial yards at 19, while studying boat design and building his own boats. John worked for many years honing his craftsmanship on fine yachts, small boats, custom furniture, and a harpsichord. He has been an instructor at the Wooden Boat School in Maine since the mid-1990s, teaching glued-lapstrake boatbuilding, fine interior joinery, and carving. Ruth Ann Hill grew up on the coast of Maine. A writer, boatbuilding assistant, naturalist, and graphic artist, Ruth is the author of *Discovering Old Bar Harbor* and *Acadia National Park: An Unconventional Guide* and a contributing editor for *Maine Boats & Harbors* magazine. The common garden shed is now just as likely to serve as a workshop for an artist to pursue his or her hobby; or may be used as a writer's retreat; or may even be equipped with a satellite dish, high definition television, recliners, and used as a meeting spot for Sunday afternoon football parties. In many parts of the country, spacious sheds are being fully appointed with furnishings and used as detached rooms for everyday living or as backyard offices. This book offers readers fuel for their aspirations but also provides practical information for planning and building sheds of all types. Although the basics of stick-building are covered, the book focuses more on the most common consumer option: ordering and buying a kit shed, working from blueprint plans, and customizing the shed to individual needs. Features a planning and design section to help readers create unique shed projects General technique chapter provides an in-depth overview of each step in shed construction Includes easy-to-follow plans and directions for 12 sheds covering all design options Bonus appendix includes a dozen advanced shed plans that can be special-ordered More than three times as many complete plans than any other sheds book
