PoC or GTFO Manul Laphroaig,2017-10-31 This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like Reliable Code Execution on a Tamagotchi, ELFs are Dorky, Elves are Cool, Burning a Phone, Forget Not the Humble Timing Attack, and A Sermon on Hacker Privilege. Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

An Introduction to Mathematical Modeling Edward A. Bender,2012-05-23 Employing a practical, learn by doing approach, this first-rate text fosters the development of the skills beyond the pure mathematics needed to set up and manipulate mathematical models. The author draws on a diversity of fields — including science, engineering, and operations research — to provide over 100 reality-based examples. Students learn from the examples by applying mathematical methods to formulate, analyze, and criticize models. Extensive documentation, consisting of over 150 references, supplements the models, encouraging further research on models of particular interest. The lively and accessible text requires only minimal scientific background. Designed for senior college or beginning graduate-level students, it assumes only elementary calculus and basic probability theory for the first part, and ordinary differential equations and continuous probability for the second section. All problems require students to study and create models, encouraging their active participation rather than a mechanical approach. Beyond the classroom, this volume will prove interesting and rewarding to anyone concerned with the development of mathematical models or the application of modeling to problem solving in a wide array of applications.

The INDIAN CHIEF Annotated Gustave AIMARD,2019-02-28 The Jesuits founded in Mexico missions round which, with the patience that constantly distinguished them, an unbounded charity, and a perseverance which nothing could discourage, they succeeded in collecting a large number of Indians, whom they instructed in the principal and most touching dogmas of their faith--whom they baptized, instructed, and induced to till the soil. These missions, at first insignificant and a great distance apart, insensibly increased. The Indians, attracted by the gentle amenity of the good fathers, placed themselves under their protection; and there is no doubt that if the Jesuits, victims to the jealousy of the Spanish viceroys, had not been shamefully plundered and expelled from Mexico, they would have brought around them the majority of the fiercest Indios Bravos, have civilised them, and made them give up their nomadic life. It is to one of these missions we purpose conducting the reader, a month after the events we have narrated in a preceding work.[1] The mission of Nuestra Señora de los Ángeles was built on the right bank of the Rio San Pedro, about sixty leagues from Pitic. Nothing can equal the grandeur and originality of its position. Nothing can compare, in wild grandeur and imposing severity, with the majestically terrible landscape which presents itself to the vision, and fills the heart with terror and a melancholy joy, at the sight of the frightful and gloomy rocks which tower over the river like colossal walls and gigantic parapets, apparently formed by some convulsion of nature; while in the midst of this chaos, at the foot of these astounding precipices, past which the river rushes in impetuous cascades, and in a delicious valley covered with verdure, stands the house, commanded on three sides by immense mountains, which raise their distant peaks almost to the heavens.
