The Law Library presents the complete text of the Risk Management Controls for Brokers or Dealers with Market Access (US Securities and Exchange Commission Regulation) (SEC) (2018 Edition). Updated as of May 29, 2018 The Securities and Exchange Commission (Commission or SEC) is adopting new Rule 15c3-5 under the Securities Exchange Act of 1934 (Exchange Act). Rule 15c3-5 will require brokers or dealers with access to trading securities directly on an exchange or alternative trading system (ATS), including those providing sponsored or direct market access to customers or other persons, and broker-dealer operators of an ATS that provide access to trading securities directly on their ATS to a person other than a broker or dealer, to establish, document, and maintain a system of risk management controls and supervisory procedures that, among other things, are reasonably designed to systematically limit the financial exposure of the broker or dealer that could arise as a result of market access, and ensure compliance with all regulatory requirements that are applicable in connection with market access. The required financial risk management controls and supervisory procedures must be reasonably designed to prevent the entry of orders that exceed appropriate pre-set credit or capital thresholds, or that appear to be erroneous. The regulatory risk management controls and supervisory procedures must also be reasonably designed to prevent the entry of orders unless there has been compliance with all regulatory requirements that must be satisfied on a pre-order entry basis, prevent the entry of orders that the broker or dealer

or customer is restricted from trading, restrict market access technology and systems to authorized persons, and assure appropriate surveillance personnel receive immediate post-trade execution reports. This ebook contains: - The complete text of the Risk Management Controls for Brokers or Dealers with Market Access (US Securities and Exchange Commission Regulation) (SEC) (2018 Edition) - A dynamic table of content linking to each section - A table of contents in introduction presenting a general overview of the structure

Default Investment Alternatives Under Participant Directed Individual Account Plans (US Employee Benefits Security Administration Regulation) (EBSA) (2018 Edition) The Law Library presents the complete text of the Default Investment Alternatives Under Participant Directed Individual Account Plans (US Employee Benefits Security Administration Regulation) (EBSA) (2018 Edition). Updated as of May 29, 2018
This document contains a final regulation that implements recent amendments to title I of the Employee Retirement Income Security Act of 1974 (ERISA) enacted as part of the Pension Protection Act

of 2006, Public Law 109-280, under which a participant in a participant directed individual account pension plan will be deemed to have exercised control over assets in his or her account if, in the absence of investment directions from the participant, the plan invests in a qualified default investment alternative. A fiduciary of a plan that complies with this final regulation will not be liable for any loss, or by reason of any breach, that occurs as a result of such investments. This regulation describes the types of investments that qualify as default investment alternatives under section 404(c)(5) of ERISA. Plan fiduciaries remain responsible for the prudent selection and monitoring of the qualified default investment alternative. The regulation conditions relief upon advance notice to participants and beneficiaries describing the circumstances under which contributions or other assets will be invested on their behalf in a qualified default investment alternative, the investment objectives of the qualified default investment alternative, and the right of participants and beneficiaries to direct investments out of the qualified default investment alternative. This regulation will affect plan sponsors and fiduciaries of participant directed individual account plans, the participants and beneficiaries in such plans, and the service providers to such plans. This book contains: - The complete text of the Default Investment Alternatives Under Participant Directed Individual Account Plans (US Employee Benefits Security Administration Regulation) (EBSA) (2018 Edition) - A table of contents with the page number of each section
