*Digital Whoness* Rafael Capurro, Michael Eldred, Daniel Nagel, 2013-05-02 The first aim is to provide well-articulated concepts by thinking through elementary phenomena of today's world, focusing on privacy and the digital, to clarify who we are in the cyberworld — hence a phenomenology of digital whoness. The second aim is to engage critically, hermeneutically with older and current literature on privacy, including in today's emerging cyberworld. Phenomenological results include concepts of i) self-identity through interplay with the world, ii) personal privacy in contradistinction to the privacy of private property, iii) the cyberworld as an artificial, digital dimension in order to discuss iv) what freedom in the cyberworld can mean, whilst not neglecting v) intercultural aspects and vi) the EU context.

Central Bank Risk Management, Fintech, and Cybersecurity Mr. Ashraf Khan, Majid Malaika, 2021-04-23 Based on technical assistance to central banks by the IMF's Monetary and Capital Markets Department and Information Technology Department, this paper examines fintech and the related area of cybersecurity from the perspective of central bank risk management. The paper draws on findings from the IMF Article IV Database, selected FSAP and country cases, and gives examples of central bank risks related to fintech and cybersecurity. The paper highlights that fintech- and cybersecurity-related risks for central banks should be addressed by operationalizing sound internal risk management by establishing and strengthening an integrated risk management approach throughout the organization, including a dedicated risk management unit, ongoing sensitizing and training of Board members and staff, clear reporting lines, assessing cyber resilience and security posture, and tying risk management into strategic planning.. Given the fast-evolving nature of such risks, central banks could make use of timely and regular inputs from external experts.

**Research and Innovation Forum 2021** Anna Visvizi, Orlando Troisi, Kawther Saeedi, 2021 This book features research presented and discussed during the Research and Innovation Forum (Rii Forum) 2021. The Covid-19 pandemic and its social, political, and economic implications had confirmed that a more thorough debate on these issues and topics was needed. For this reason, the Rii Forum 2021 was devoted to the broadly defined question of the short- and long-term impact of the pandemic on our societies. This volume serves as an essential resource to understand the diverse ways in which Covid-19 impacted our societies, including the capacity to innovate, advances in technology, the evolution of the healthcare systems, business model innovation, the prospects of growth, the stability of political systems, and the future of education. .

**China Fast Forward** Bill Dodson, 2012-07-25 Will China Surpass the United States as an innovationnation? China is tirelessly working to overcome its technological deficiencies by driving R&D initiatives in government and business and adapting Western Internet platforms for domestic use. It is extending its technological reach through a major drive to rival India as a services outsourcing leader and projecting its high-tech brands into the companies and homes of other countries. But whether China succeeds will depend on how it handles such issues as demography, energy dependency, and resource limitations. The environmental challenges posed by China's vast manufacturing sector are well documented, but what isn't widely realized is that China is actually outstripping the West in all manner of green initiatives, renewable energy investments, research and development funding, and other areas essential to

improving the health of the planet. However, omnipresent government intervention, environmental degradation, natural resource exhaustion, and other issues threaten to derail China's rise to superpower status. As the country meets global challenges on a scale that few nations can match, *China Fast Forward* takes a look at what lies ahead and why China's success is important to us all. In this book, Bill Dodson explores China's reincarnation from a closed, agrarian nation into a modern, high-tech superpower bent on literally cleaning up its act. Presents an on-the-ground survey and analysis of China's renewable and clean energy sector that identifies the kinds of projects and technologies Chinese enterprises and local governments are hungry for. Includes a discussion on how successful Chinese companies are developing their brands to go head-to-head with the world's best-known companies. Discusses how central government conflicts of interest are actually foiling corporate and official drives to innovation across a range of sectors. Taking a look inside China's march toward becoming a sustainable superpower through innovation, *China Fast Forward* presents a balance sheet of the country's technological and social progress on its path to becoming a world leader.

This document sets out the Home Office's approach to tackling cyber crime, showing how to tackle such crimes directly through the provision of a law enforcement response, and indirectly through cross-Government working and through the development of relationships with industry, charities and other groups, as well as internationally. The publication is divided into five chapters and looks at the following areas, including: the broader cyber security context; cyber crime: the current position; the Government response and how the Home Office will tackle cyber crime.

**Information Dominance** Martin C. Libicki, 1997 Information dominance may be defined as superiority in the generation,

manipulation, and use of information sufficient to afford its possessors military dominance. It has three sources: Command and control that permits everyone to know where they (and their cohorts) are in the battlespace, and enables them to execute operations when and as quickly as necessary; Intelligence that ranges from knowing the enemy's dispositions to knowing the location of enemy assets in real-time with sufficient precision for a one-shot kill; information warfare that confounds enemy information systems at various points (sensors, communications, processing, and command), while protecting one's own. Technical means, nevertheless, are no substitute for information dominance at the strategic level: knowing oneself and one's enemy; and, at best, inducing them to see things as one does.

*China Inside Out* Bill Dodson, 2011-01-25 An in-depth look at the forces and trends changing China and its place in the world China has dominated the news for nearly a decade and will continue to grab headlines as it moves inexorably toward becoming the world's largest economy. It already has the largest middle class in the world; the most Internet users; the largest army; and is the world's largest polluter. Yet all this growth causes problems as China adapts to the laws of other lands in which it has investments; learns how to meet international guidelines and safety standards for its products; stretches its resources to the limit; and struggles to maintain stability and control over an increasingly restive population. *China Inside Out* explores the social and economic forces unleashed by China's relentless drive to modernization. Bill Dodson presents the stories of average Chinese workers, along with interviews with experts interlaced with his own experiences. The end result is an insider's view of the forces reshaping China as it takes an increasingly prominent role in the new world order. Looks at the trends reshaping China and reveals how China's place in the world is evolving Written by an industry analyst, advisor, and business manager in China, who is also a columnist for the *China Economic Review* Explains important changes for investors and business leaders interested in China For business leaders, investors, and China watchers, *China Inside Out* offers a truly in-depth examination of China's changing role in the world.

**The China Price** Alexandra Harney,2008-03-27 In this landmark work of investigative reporting, former Financial Times correspondent Alexandra Harney uncovers a story of immense significance to us all: how China's factory economy gains a competitive edge by selling out its workers, environment, and future. Harney's firsthand reporting brings us face-to-face with a world in which intense pricing pressure from Western companies combines with ubiquitous corruption and a lack of transparency to exact a staggering toll in human misery and environmental damage. This eye-opening expose offers, for the first time, an intimate look at the defining business story of our time.
