**Internet Privacy** Johannes Buchmann,2014-02-18 A thorough multidisciplinary analysis of various perspectives on internet privacy was published as the first volume of a study, revealing the results of the achatech project Internet Privacy - A Culture of Privacy and Trust on the Internet. The second publication from this project presents integrated, interdisciplinary options for improving privacy on the Internet utilising a normative, value-oriented approach. The ways in which privacy promotes and preconditions fundamental societal values and how privacy violations endanger the flourishing of said values are exemplified. The conditions which must be fulfilled in order to achieve a culture of privacy and trust on the internet are illuminated. This volume presents options for policy-makers, educators, businesses and technology experts how to facilitate solutions for more privacy on the Internet and identifies further research requirements in this area.

**Digital Whoness** Rafael Capurro,Michael Eldred,Daniel Nagel,2013-05-02 The first aim is to provide well-articulated concepts by thinking through elementary phenomena of today's world, focusing on privacy and the digital, to clarify who we are in the cyberworld — hence a phenomenology of digital whoness. The second aim is to engage critically, hermeneutically with older and current literature on privacy, including in today's emerging cyberworld. Phenomenological results include concepts of i) self-identity through interplay with the world, ii) personal privacy in contradistinction to the privacy of private property, iii) the cyberworld as an artificial, digital dimension in order to discuss iv) what freedom in the cyberworld can mean, whilst not neglecting v) intercultural aspects and vi) the EU context.

**Taking Night** Ashley Bennion,2015-11-17 It's been a decade since the antidote discovered by Shay Andrews' parents stopped the world's deadliest virus. She was only six, too young to remember it, but its darkness lingers in the daily vitalimin boosters - one red, one yellow - and a yearly vaccine that are strictly enforced by Edict law. For Shay, everything is about to change. A side effect of the yearly burn vax is no one dreams anymore, ever. So when Shay starts dreaming again, she's terrified. And rightly so; if anyone found out, she could be mistaken for an Abstainer and thrown into an internment camp for the rest of her life. What if everything you've been taught is a lie? When her dreams become nightmares, she struggles to navigate between her real life and a chilling dream world where nothing is as it seems. As everything she's ever known gets thrown upside down she's left facing the toughest question of all: How far will she go to uncover the truth?

**ECO-COMPASS** Xiaosu Yi,Konstantinos Tserpes,2019-04-25 Today, mainly man-made materials, such as carbon and glass fibers, are used to produce composite parts in aviation. Renewable materials, such as natural fibers or bio-sourced resin systems, have not yet found their way into aviation. The project ECO-COMPASS aims to evaluate the potential applications of ecologically improved composite materials in the aviation sector in an international collaboration of Chinese and European partners. Natural fibers such as flax and ramie will be used for different types of reinforcements and sandwich cores. Furthermore, bio-based epoxy resins to substitute bisphenol-A based epoxy resins in secondary structures are under investigation. Adapted material protection technologies to reduce environmental influence and to improve fire resistance are needed to fulfil the demanding safety requirements in aviation. Modelling and simulation of chosen eco-composites aims for an optimized use of materials while a Life Cycle Assessment aims to prove the ecological advantages compared to synthetic state-of-the-art materials. This Special Issue provides selected papers from the project consortium partners.
