User-Centered Interaction Paradigms for Universal Access in the Information Society Christian

Stary, Constantine Stephanidis, 2004-10-29 The 8th ERCIM Workshop “User Interfaces for All” was held in Vienna, Austria, on 28–29 June 2004, building upon the results of the seven previous workshops held in

Heraklion, Crete, Greece, 30–31 October 1995; Prague, Czech Republic, 7–8 November 1996; Obernai, France, 3–4 November 1997; Stockholm, Sweden, 19–21 October 1998; Dagstuhl, Germany, 28 November – 1 December 1999; Florence, Italy, 25–26 October 2000; and Paris (Chantilly), France, 24–25 October 2002. The concept of “User Interfaces for All” targets a proactive realization of the “-signforall” principle in the field of human-computer interaction (HCI), and involves the development of user interfaces to interactive applications and e-services, which provide universal access and usability to potentially all users. In the tradition of its predecessors, the 8th ERCIM Workshop “User Interfaces for All” aimed to consolidate recent work and to stimulate further discussion on the state of the art in “User Interfaces for All” and its increasing range of applications in the upcoming Information Society. The emphasis of the 2004 event was on “User-Centered Interaction Paradigms for Universal Access in the Information Society.” The requirement for user-centered universal access stems from the growing impact of the fusion of the emerging technologies and from the different dimensions of diversity that are intrinsic to the Information Society. These dimensions become evident when considering the broad range of user characteristics, the changing nature of human activities, the variety of contexts of use, the increasing availability and diversification of information, knowledge sources and e-services, the proliferation of technological platforms, etc.

Steps Toward a Universal Patient Medical Record Michael McGuire, 2004 This book describes how an automated patient medical record could be built that could evolve into a universal patient record. Such a universal patient record would change medical care from a focus on short-term care to one oriented to long-term, preventive-care. It would remove patient care from being the province of the single physician to that of the responsibility of many different healthcare providers, possibly located anywhere in the world.
