Women Feeding Cities Alice Hovorka, Henk de Zeeuw, Mary Njenga, 2009 Analyses the roles of women and men in urban food production, and through case studies from three developing regions suggests how women's contribution might be maximized.

Treasury of Alphabets and Lettering Jan Tschichold, 1995 Treasury of Alphabets and Lettering is a classic source book of the most beautiful type and letters of all time selected by Jan Tschichold, internationally renowned typographer and master of lettering. It contains only letters of timeless and lasting beauty--the true mainsprings of the art of lettering. One hundred and seventy-six type specimens are presented, most of them in complete alphabets.

Magnetism and Synchrotron Radiation Eric Beaurepaire, Hervé Bulou, Fabrice Scheurer, Kappler Jean-Paul, 2010-03-12 Advances in the synthesis of new materials with often complex, nano-scaled structures require increasingly sophisticated experimental techniques that can probe the electronic states, the atomic magnetic moments and the magnetic microstructures responsible for the properties of these materials. At the same time, progress in synchrotron radiation techniques has ensured that these light sources remain a key tool of investigation, e.g. synchrotron radiation sources of the third generation are able to support magnetic imaging on a sub-micrometer scale. With the Fifth Mittelwihl School on Magnetism and Synchrotron Radiation the tradition of teaching the state-of-the-art on modern research developments continues and is expressed through the present set of extensive lectures provided in this volume. While primarily aimed at postgraduate students and newcomers to the field, this volume will also benefit researchers and lecturers actively working in the field.

An Essay on Typography Eric Gill, 2013-11-07 Eric Gill's opinionated manifesto on typography argues that 'a good piece of lettering is as beautiful a thing to see as any sculpture or painted picture'. This essay explores the place of typography in culture and is also a moral treatise celebrating the role of craftsmanship in an industrial age. Gill, a sculptor, engraver, printmaker and creator of many classic typefaces that can be seen around us today, fused art, history and polemic in a visionary work which has been hugely influential on modern graphic design. 'Written with clarity, humility and a touch of humour . . . timeless and absorbing' Paul Rand, The New York Times 'His lettering was clear, confident and hugely influential on the development of modern type design. The world has now caught up with Gill' Guardian How do we see the world around us? This is one of a number of pivotal works by creative thinkers like John Berger and Susan Sontag whose writings on art, design and the media have changed our vision for ever.

Cities Feeding People Axumite G. Egziabher, 2014-05-14 Cities Feeding People examines urban agriculture in East Africa and proves that it is a safe, clean, and secure method to feed the world's struggling urban residents. It

also collapses the myth that urban agriculture is practiced only by the poor and unemployed. *Cities Feeding People* provides the hard facts needed to convince governments that urban agriculture should have a larger role in feeding the urban population.

Font Technology Peter Karow,2012-12-06 Computers have changed typography and prepress as well as printing. Typefaces are manufactured by digital punch cutters with a PC, not any more by punch cutters. Typefaces are constructed an output by a new technology, the so-called fonttechnology. The book by Peter Karow covers the whole area of it. It offers various chapters about (among others) issues like intelligent font scaling, kerning, quality of type, legibility, and problems of different output devices. It is interesting to read about Gutenberg setting, the font market, optical scaling, and last but not least a hand on Kanjhi, the Chinese/Japanese Glyphs. Furthermore, Fonttechnology contains a number of valuable and instructive appendices. Almost everything one has to know about type and computers!

Urban Agriculture in Zimbabwe B. Mbiba,1995 This text addresses the phenomenon of urban agriculture in Zimbabwe. While it acknowledges that the activity is a significant source of food and income for the urban poor, the text draws attention to development conflicts raised by the activity. It attempts to place urban agriculture within the context of urban economy, the environment, institutional concerns, gender and urban poverty. Based on ongoing research the text demonstrates that there is a potential for urban agriculture as part of the urban economy, but that the urban poor are not beneficiaries of the activity.

Creep and Fracture of Engineering Materials and Structures T. Sakuma,Kuniaki Yagi,1999-10-12 Volume is indexed by Thomson Reuters CPCI-S (WoS). Recent research on the creep and fracture of engineering materials is presented, with particular emphasis being placed on: mechanisms of high-temperature deformation and fracture, materials for high-temperature service, the behavior of single and polycrystals, components and structures, grain boundaries and interfaces, and superplasticity.

The Rural-urban Interface in Africa Jonathan Baker,Poul O. Pedersen,1992 Discusses the role of small towns as agents for rural improvement and focuses on the links provided by small towns to both rural areas and larger towns. Reviews the role of selected indigenous nongovernmental organizations (NGOs) in supporting the activities of small enterprises in small towns and rural areas. Covers trends from the 1960s.

Advanced Materials Interfaces Ashutosh Tiwari,Hirak K. Patra,Xuemei Wang,2016-06-22 Advanced Material Interfaces is a state-of-the-art look at innovative methodologies and strategies adopted for interfaces and their

applications. The 13 chapters are written by eminent researchers not only elaborate complex interfaces fashioned of solids, liquids, and gases, but also ensures cross-disciplinary mixture and blends of physics, chemistry, materials science, engineering and life sciences. Advanced interfaces operate fundamental roles in essentially all integrated devices. It is therefore of the utmost urgency to focus on how newly-discovered fundamental constituents and interfacial progressions can be materialized and used for precise purposes. Interfaces are associated in wide multiplicity of application spectrum from chemical catalysis to drug functions and the advancement is funnelled by fine-tuning of our fundamental understanding of the interface effects.

Literacy and the Politics of Writing Albertine Gaur, 2000 With the growth of modern information technology, it is time to re-examine the concept and purpose of writing, and question the long cherished idea that the alphabet stands at the apex of a hierarchy towards which all proper forms of writing must necessarily progress. This book shows that the primary purpose of writing is the ability to store and transmit information, information essential to the social, economical and political survival of a particular group. Writing, in whatever form, allows the individual to interact with the group, to acquire an amount of knowledge that far outweighs the scope of memory (oral traditions), and to be free to manipulate this knowledge and arrive at new conclusion. Providing a quick and easy entrance to information related to the subject, the volume contains a network of references leading the reader towards further information, and most entries are listed with bibliographical notes.
