Race-Baiter: How the Media Wields Dangerous Words to Divide a Nation Eric Deggans,2012-10-30 Gone is the era of Edward R. Murrow and Walter Cronkite, when news programs fought to gain the trust and respect of a wide spectrum of American viewers. Today, the fastest-growing news programs and media platforms are fighting hard for increasingly narrow segments of the public and playing on old prejudices and deep-rooted fears, coloring the conversation in the blogosphere and the cable news chatter to distract from the true issues at stake. Using the same tactics once used to mobilize political parties and committed voters, they send their fans coded messages and demonize opposing groups, in the process securing valuable audience share and website traffic. Race-baiter is a term born out of this tumultuous climate, coined by the conservative media to describe a person who uses

racial tensions to arouse the passion and ire of a particular demographic. Even as the election of the first black president forces us all to reevaluate how we think about race, gender, culture, and class lines, some areas of modern media are working hard to push the same old buttons of conflict and division for new purposes. In *Race-Baiter*, veteran journalist and media critic Eric Deggans dissects the powerful ways modern media feeds fears, prejudices, and hate, while also tracing the history of the word and its consequences, intended or otherwise.

Man's Most Dangerous Myth: The Fallacy of Race Ashley Montagu, 2011-11-29
DR. ASHLEY MONTAGU'S book possesses two great merits rarely found in current discussions of human problems. Where most writers over-simplify, he insists on the principle of multiple and interlocking causation. And where most assume that "facts will speak for themselves," he makes it clear that facts are mere ventriloquists' dummies, and can be made to justify any course of action that appeals to the socially conditioned passions of the individuals concerned. These two truths are sufficiently obvious; but they are seldom recognized, for the good reason that they are very depressing. To recognize the first truth is to recognize the fact that there are no panaceas and that therefore most of the golden promises made by political reformers and revolutionaries are illusory. And to recognize the truth that facts do not speak for themselves, but only as man's socially conditioned passions dictate, is to recognize that our current educational processes can do very

little to ameliorate the state of the world. In the language of traditional theology (so much more realistic, in many respects, than the "liberal" philosophies which replaced it), most ignorance is voluntary and depends upon acts of the conscious or subconscious will. Thus, the fallacies underlying the propaganda of racial hatred are not recognized because, as Dr. Montagu points out, most people have a desire to act aggressively, and the members of other ethnic groups are convenient victims, whom one may attack with a good conscience. This desire to act aggressively has its origins in the largely unavoidable frustrations imposed upon the individual by the processes of early education and later adjustments to the social environment. Dr. Montagu might have added that aggressiveness pays a higher dividend in emotional satisfaction than does coöperation. Coöperation may produce a mild emotional glow; but the indulgence of aggressivness can be the equivalent of a drinking bout or sexual orgy. In our industrial societies, the goodness of life is measured in terms of the number and intensity of the excitements experienced. (Popular philosophy is moulded by, and finds expression in, the advertising pages of popular magazines. Significantly enough, the word that occurs more frequently in those pages than any other is "thrill.") Like sex and alcohol, aggressiveness can give enormous thrills. Under existing social conditions, it is therefore easy to represent aggressiveness as good. Concerning the remedies for the social diseases he has so penetratingly diagnosed, Dr. Montagu says very little, except that they will have to consist in some

process of education. But what process? It is to be hoped that he will answer this question at length in another work. ALDOUS HUXLEY

You Suck at Racing Ian Korf, 2016-05-12 A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of art. It's more like a sandwich: convenient and nourishing.

The Danger of Deterioration of Race from the Too Rapid Increase of Great Cities ... Paper Read at the Social Science Congress, Sheffield, ... Oct. 10, 1865 John Edward MORGAN (M.A., M.D.), 1866

Spaces of Danger Heather Merrill, Lisa M. Hoffman, 2015-12-01 These twelve original essays by geographers and anthropologists offer a deep critical understanding of Allan Pred's pathbreaking and eclectic cultural Marxist approach, with a focus on his concept of "situated ignorance": the production and reproduction of power and inequality by regimes of truth through strategically deployed misinformation, diversions, and silences. As the essays expose the cultural and material circumstances in which situated ignorance persists, they also add a previously underexplored spatial dimension to Walter Benjamin's idea of "moments of danger." The volume invokes the aftermath of the July 2011 attacks by far-right activist Anders Breivik in Norway, who ambushed a Labor Party youth gathering and bombed a government building, killing and injuring many. Breivik had publicly and forthrightly declared war against an array of liberal attitudes he saw threatening Western civilization. However, as politicians and journalists interpreted these events for mass consumption, a narrative quickly emerged that painted Breivik as a lone madman and steered the discourse away from analysis of the resurgent right-wing racisms and nationalisms in which he was immersed. The Breivik case is merely one of the most visible recent examples, say editors Heather Merrill and Lisa Hoffman, of the unchallenged production of knowledge in the public sphere. In essays that range widely in topic and setting—for example, brownfield development in China, a Holocaust memorial in Germany, an art gallery exhibit in South Africa—this volume peels back layers

of “situated practices and their associated meaning and power relations.” Spaces of Danger offers analytical and conceptual tools of a Predian approach to interrogate the taken-for-granted and make visible and legible that which is silenced.
