We’re happy to have you, even if you being here means something’s coming.” Regan loves, and is loved, though her school-friend situation has become complicated, of late. When she suddenly finds herself thrust through a doorway that asks her to Be Sure before swallowing her whole, Regan must learn to live in a world filled with centaurs, kelpies, and other magical equines—a world that expects its human visitors to step up and be heroes. But after embracing her time with the herd, Regan discovers that not all forms of heroism are equal, and not all quests are as they seem... A standalone Wayward Children story containing all-new characters, and a great jumping-on point for new readers. Wednesday Is Indigo Blue Richard E. Cytowic,David M. Eagleman,2011-09-30 How the extraordinary multisensory phenomenon of synesthesia has changed our traditional view of the brain. A person with synesthesia might feel the flavor of food on her fingertips, sense the letter "J" as shimmering magenta or the number "5" as emerald green, hear and taste her husband's voice as buttery golden brown. Synesthetes rarely talk about their peculiar sensory gift—believing either that everyone else senses the world exactly as they do, or that no one else does. Yet synesthesia occurs in one in twenty people, and is even more common among artists. One famous synesthete was novelist Vladimir Nabokov, who insisted as a toddler that the colors on his wooden alphabet blocks were "all wrong." His mother understood exactly what he meant because she, too, had synesthesia. Nabokov's son Dmitri, who recounts this tale in the afterword to this book, is also a synesthete—further illustrating how synesthesia runs in families. In *Wednesday Is Indigo Blue*, pioneering researcher Richard Cytowic and distinguished neuroscientist David Eagleman explain the neuroscience and genetics behind synesthesia's multisensory experiences. Because synesthesia contradicted existing theory, Cytowic spent twenty years persuading colleagues that it was a real—and important—brain phenomenon rather than a mere curiosity. Today scientists in fifteen countries are exploring synesthesia and how it is changing the traditional view of how the brain works. Cytowic and Eagleman argue that perception is already multisensory, though for most of us its multiple dimensions exist beyond the reach of consciousness. Reality, they point out, is more subjective than most people realize. No mere curiosity, synesthesia is a window on the mind and brain, highlighting the amazing differences in the way people see the world.

In Search of Greener Grass Graham Field,2012 From backpack to bicycle and now on a motorcycle, but still on a budget, the author, a compulsive traveller, embarks on a journey East from England with Mongolian intentions. In possession of a good sense of direction, a vague sense of balance and no sense of proportion; this particular trip is financed by modest winnings from an uncharacteristic appearance on a TV game show. Riding a bargain eBay purchase Kawasaki KLR 650 and travelling solo into places beyond the guide book. A daily diary of achievements and mistakes incurred in a transient lifestyle, with mixed emotions from overawed to just plain bored, and making the best of decisions made while trying not to reflect on the alternatives. This is a refreshingly honest, thought provoking, humorous and informative account based on a lifetime of first hand encounters, anecdotes, wisdom and occasional alcohol induced inspiration. Offering an unavoidable wealth of experience which takes the reader with him, as the journey twists and turns on the road

which the author hopes will lead him to greener grass.
