*The Cambridge Handbook of Animal Cognition* Allison B. Kaufman,Josep Call,James C. Kaufman,2021-07-22 This handbook lays out the science behind how animals think, remember, create, calculate, and remember. It provides concise overviews on major areas of study such as animal communication and language, memory and recall, social cognition, social learning and teaching, numerical and quantitative abilities, as well as innovation and problem solving. The chapters also explore more nuanced topics in greater detail, showing how the research was conducted and how it can be used for further study. The authors range from academics working in renowned university departments to those from research institutions and practitioners in zoos. The volume encompasses a wide variety of species, ensuring the breadth of the field is explored.

*The Color of Compromise* Jemar Tisby,2020-01-07 In *The Color of Compromise*, Jemar Tisby takes readers back to the roots of sustained racism and injustice in the American church. Filled with powerful stories and examples of American Christianity's racial past, Tisby's historical narrative highlights the obvious ways people of faith have actively worked against racial justice, as well as the complicit silence of racial moderates. Identifying the cultural and institutional tables that must be flipped to bring about progress, Tisby provides an in-depth diagnosis for a racially divided American church and suggests ways to foster a more equitable and inclusive environment among God's people. Book jacket.

*Nitric Oxide Donors* Peng George Wang,Tingwei Bill Cai,Naoyuki Taniguchi,2005-08-16 Nitric oxide is a highly potent regulatory molecule with great pharmaceutical potential. This handbook fills a real gap in combining the chemistry of nitric oxide releasing substances with their practical applications in biology and drug design. It covers all classes of nitric oxide donors, from organic nitrates to nitroso compounds, guanidines and metal-NO complexes. In addition to a detailed treatment of the chemistry of NO donors, numerous examples of successful diagnostic and pharmacological applications are discussed, as well as further therapeutic targets for these substances.

**Modeling Creativity** Tom De Smedt,2013-02-01 Modeling Creativity (doctoral thesis, 2013) explores how creativity can be represented using computational approaches. Our aim is to construct computer models that exhibit creativity in an artistic context, that is, that are capable of generating or evaluating an artwork (visual or linguistic), an interesting new idea, a subjective opinion. The research was conducted in 2008-2012 at the Computational Linguistics Research Group (CLiPS, University of Antwerp) under the supervision of Prof. Walter Daelemans. Prior research was also conducted at the Experimental Media Research Group (EMRG, St. Lucas University College of Art & Design Antwerp) under the supervision of Lucas Nijs. Modeling Creativity examines creativity in a number of different perspectives: from its origins in nature, which is essentially blind, to humans and machines, and from generating creative ideas to evaluating and learning their novelty and usefulness. We will use a hands-on approach with case studies and examples in the Python programming language.

Academic Writing Mathukutty M Monippally,Badrinarayan Shankar Pawar,2010-05-19 This book addresses key features of the methodology involved in business and management academic writing. Characterizing academic writing as part of research, science and the knowledge generation process, it focuses on its three main aspects: understanding existing research, documenting and sharing the results of the acquired knowledge, and acknowledging the use of other people's ideas and works in the documentation. Written in lucid language, the authors use various examples of good as well as defective writing to help students understand the concepts.

*Global Economic Prospects 2007* World Bank,2006 Over the next 25 years developing countries will move to center stage in the global economy. *Global Economic Prospects 2007* analyzes the opportunities - and stresses - this will create. While rich and poor countries alike stand to benefit, the integration process will make more acute stresses already apparent today - in income inequality, in labor markets, and in the environment. Over the next 25 years, rapid technological progress, burgeoning trade in goods and services, and integration of financial markets create the opportunity for faster long-term growth. However, some regions, notably Africa, are at risk of being left behind. The coming globalization will also see intensified stresses on the global commons. Addressing global warming, preserving marine fisheries, and containing infectious diseases will require effective multilateral collaboration to ensure that economic growth and poverty reduction proceed without causing irreparable harm to future generations.
