International Financial Statistics, July 2016

International Financial Statistics, January 2016 International Monetary Fund. Statistics Dept.,2016-01-04 This January 2016 issue of International Financial Statistics (IFS) is a standard source of statistics on all aspects of international and domestic finance. IFS, Balance-of-Payments Statistics, Direction of Trade Statistics, and Government Finance Statistics are available on CD-ROM by annual subscription. The IMF normally determines the currencies that are used in transactions and operations with members. Each quarter, the IMF prepares a financial transactions plan, in which it indicates the amounts of currencies and SDRs to be used during the relevant period. The monthly printed issue of IFS reports current monthly, quarterly, and annual data, while the yearbook reports 12 observations of annual data. In IFS, exchange rates are expressed in time series of national currency units per SDR and national currency units per US dollar, or vice versa.

International Financial Statistics, April 2016 International Monetary Fund. Statistics Dept.,2016-04-01 This April 2016 issue of International Financial Statistics (IFS) is a standard source of statistics on all aspects of international and domestic finance. The IMF publishes calculated effective exchange rates data only for countries that have given their approval. The IMF cannot allocate SDRs to itself but receives them from members through various financial transactions and operations. Entities authorized to conduct transactions in SDRs are the IMF itself, participants in the SDR Department, and other "prescribed holders." The IMF quota increase under the Fourteenth General Review of Quotas became effective recently. The details regarding the associated change can be found in the IMF Press Release No. 16/25, dated January 27, 2016. The effect of quota payments is reflected in the

following Fund Accounts for those members that have made their quota payments: Quota, Reserve Tranche Position, Fund Holdings of Currency, SDR Holdings. It is also reflected in the international liquidity and central bank data.
