Programming Entity Framework Julia Lerman,2009-01-29 If you use Entity Framework in Visual Studio 2008 and .NET 3.5, this is the book you want. Programming Entity Framework, 1st Edition offers experienced developers a thorough introduction to Microsoft's core framework for modeling and interacting with data in .NET applications. This hands-on tour provides a deep understanding of Entity Framework's architecture and APIs, and explains how to use the framework in a variety of applications built with Visual Studio 2008 and .NET 3.5. From the Entity Data Model (EDM) and Object Services to EntityClient and the Metadata Workspace, this highly acclaimed first edition covers it all. Understand the core concepts you need to make the best use of the Entity Framework (EF) in your applications Learn to query your data, using either LINQ to Entities or Entity SQL Create Windows Forms, WPF, and ASP.NET applications Build ASMX web services and WCF services Use Object Services to work directly with your entity objects Delve into model customization, relationship management, change tracking, data concurrency, and more One important note: while many of the lessons from this book will continue to be valuable as you move to .NET 4, the thoroughly revised second edition of Programming Entity Framework (August 2010) specifically targets Visual Studio 2010 and .NET 4 -- where there have been many advancements and additions to the framework.

Fostering Innovation in the Public Sector OECD,2017-04-25 Public sector innovation does not happen by itself: problems need to be identified, and ideas translated into projects that can be tested, implemented and shared. This report looks at how governments can create an environment that fosters innovation.

Innovative Intelligent Industrial Production and Logistics Sergio Terzi,Kurosh Madani,Oleg Gusikhin,Hervé Panetto,2023-12-22 This book constitutes the proceedings of the 4th International Conference, IN4PL 2023, held in Rome, Italy, during November 15-17, 2023 The 11 full papers and the 13 short papers included in this volume were carefully reviewed and selected from 33 submissions. The book focuses on research and development involving innovative methods, software and hardware, whereby intelligent systems are applied to industrial production and logistics. This is currently related to the concept of industry 4.0 - an expression reflecting the trend towards automation and data exchange in manufacturing technologies and processes which include cyber-physical systems, the industrial internet of things, industrial robotics, cloud computing, cognitive computing and artificial intelligence.

Delivery of Goods under Bills of Lading Anders Møllmann,2016-12-01 Probably the core characteristic of a bill of lading is that the original bill of lading must be presented at the port of destination for a consignee to be entitled to delivery of the goods and for the carrier to get a good discharge of its delivery obligation by delivering the goods to said consignee. This notion is accepted virtually worldwide, but the more precise content of the presentation rule differs from jurisdiction to jurisdiction. Furthermore, and of importance, the legal basis establishing the presentation rule differs. With the technological advances in maritime transport as well as in communications technology and the emergence of more complicated trading patterns, a system where a specific tangible piece of paper issued at the port of loading has to be presented at the port of discharge to obtain delivery of the goods seems almost archaic and can obviously create problems. Thus, in practice very often – especially in some trades such as the oil trade – the bill of lading is not available at the port of discharge when the ship is ready to deliver the cargo. The book will first analyse the presentation rule, its finer contents and its legal basis. It will then go on with (legal) analyses of three developments and responses to the problems that the bill of lading system gives rise to in practice, viz. the commercial, the international legislature's, and the technological response. The commercial response analysed here consists of contractual exemption or limitation clauses in the bill of lading set up as a defence against claims for misdelivery. The international legislature's response denotes the adoption of the Rotterdam Rules which as the first international convention on carriage of goods by sea includes elaborate rules on delivery of the goods. Finally, the technological response denotes the possibility of using electronic (equivalents of) bills of lading. The analyses will include a comparative approach examining both English and Scandinavian law to elucidate the issues with greater clarity.

Transport Documents in Carriage Of Goods by Sea Časlav Pejović,2020-03-05 Bringing a fresh, comparative approach to transport documents used in the carriage of goods by sea, this book covers bills of lading, sea waybills, ship's delivery orders, multimodal transport documents, and electronic transport documents. The book covers historic developments, current conventions, and thoughts for the future on these transport documents; and delves deeply into the legal issues concerning them. It represents a comprehensive compilation of case and statute law from around the world on this subject. In addition to English law, the book covers American, French, German, and Italian laws, as well as the laws of several East Asian jurisdictions (China, Japan, South Korea). Primarily, the book will be of use to maritime law scholars and students, and lawyers who deal with shipping. It may also be of interest to international traders, banks, and ship masters and officers.

Text Mining for Information Professionals Manika Lamba,Margam Madhusudhan,2022-04-21 This book focuses on a basic theoretical framework dealing with the problems, solutions, and applications of text mining and its various facets in a very practical form of case studies, use cases, and stories. The book contains 11 chapters with 14 case studies showing 8 different text mining and visualization approaches, and 17 stories. In addition, both a website and a Github account are also maintained for the book. They contain the code, data, and notebooks for the case studies; a summary of all the stories shared by the librarians/faculty; and hyperlinks to open an interactive virtual RStudio/Jupyter Notebook environment. The interactive virtual environment runs case studies based on the R programming language for hands-on practice in the cloud without installing any software. From understanding different types and forms of data to case studies showing the application of each text mining approaches on data retrieved from various resources, this book is a must-read for all library professionals interested in text mining and its application in libraries. Additionally, this book will also be helpful to archivists, digital curators, or any other humanities and social science professionals who want to understand the basic theory behind text data, text mining, and various tools and techniques available to solve and visualize their research problems.

Smarter New York City André Corrêa d'Almeida,2018-08-28 Innovation is often presented as being in the exclusive domain of the private sector. Yet despite widespread perceptions of public-sector inefficiency, government agencies have much to teach us about how technological and social advances occur. Improving governance at the municipal level is critical to the future of the twenty-first-century city, from environmental sustainability to education, economic development, public health, and beyond. In this age of acceleration and massive migration of people into cities around the world, this book explains how innovation from within city agencies and administrations makes urban systems smarter and shapes life in New York City. Using a series of case studies, Smarter New York City describes the drivers and constraints behind urban innovation, including leadership and organization; networks and interagency collaboration; institutional context; technology and real-time data collection; responsiveness and decision making; and results and impact. Cases include residential organic-waste collection, an NYPD program that identifies the sound of gunshots in real time, and the Vision Zero attempt to end traffic casualties, among others. Challenging the usefulness of a tech-centric view of urban innovation, Smarter New York City brings together a multidisciplinary and integrated perspective to imagine new possibilities from within city agencies, with practical lessons for city officials, urban planners, policy makers, civil society, and potential private-sector partners.

Information Management in Computer Integrated Manufacturing Heimo H. Adelsberger,Jiri Lazansky,Vladimir Marik,1995-08-21 This book presents a modern and attractive approach to computer integrated manufacturing (CIM) by stressing the crucial role of information management aspects. The 31 contributions contained constitute the final report on the EC Project TEMPUS No. 2609 aimed at establishing a new curriculum and regular education in the new field of information management in CIM at European universities. Much attention was paid to the style of writing and coverage of the important issues. Thus the book is particularly suited as a text for students and young scientists approaching CIM from different directions; at the same time, it is a comprehensive guide for industrial engineers in machine engineering, computer science, control engineering, artificial intelligence, production management, etc.
