The Phytozyme Cure Michelle Schoffro Cook,2010-10-08 In The Phytozyme Cure, Dr. Michelle Schoffro Cook reveals her cutting-edge, powerful, and all-natural Phytozyme Therapy, which involves the specific combination of miracle healing substances to supercharge their effects -- and your health. Dr. Michelle Schoffro Cook is one of North America's leading natural health experts. Over the past two decades, she has seen that phytonutrients alone can speed weight loss, aid the prevention of heart disease and cancer, and even reverse some of the effects of aging. Similarly, certain enzymes have been known to reverse pain and inflammation; break down bacteria, fungi, viruses, toxins, and cancer cells; remove scar tissue; and even help our bodies grow healthy new tissue, skin and hair. But the real miracle begins when these powerhouses work together. With the right combination, many illnesses can be improved or even reversed. In The Phytozyme Cure, Dr. Schoffro Cook shares these powerful protocols for managing more than 30 common health conditions including allergies, digestive disorders, chronic fatigue syndrome, arthritis, heart disease, diabetes, and cancer. Find out how you can use phytozyme therapy to quickly and easily arm your body against disease and enjoy long-term healthy living. With this new approach to health, all of us can supercharge our immune systems, experience abundant energy, and even slow down the effects of aging!

Respect for Authority Jean Dryden,2018-10-24 Groundbreaking ideas in archival description and control Archival authority control is an often ambiguous label that embraces a potentially wide scope. In this active and quickly-evolving field, new methods of clarification are essential for successful archive management. The articles in Respect for Authority: Authority Control, Context Control, and Archival Description offer an innovative approach by marking and exploring a clear distinction between conventional archival authority files and the broader concept of context control. Intended to not only answer important questions but raise worthy new ones as well, Respect for Authority: Authority Control, Context Control, and Archival Description reveals striking new perspectives in managing archival description more effectively. The engaging essays in this collection tackle key issues of archive authority control and offer sound proposals for advancing a new course. Comprehensive in its approach, this text takes an in-depth look at both the International Standard for Archival Authority Records (ISAAR) and the American standard, Describing Archives: a Content Standard (DACS) and considers the place of authority control in these two standards for archival description. In addition, contributors offer practical answers to the thorny issue of identifying the boundaries of a records-creating entity and present criteria for determining when a new entity is established. International in scope, this book presents groundbreaking case studies by archive professionals from Canada, the United States, Italy, and Australia that document the successes of different institutional applications that describe the records-creator first and then link this description to that of the records themselves. Respect for Authority: Authority Control, Context Control, and Archival Description also includes expert discussions of: the role of standards the nature of archives and their relationships with their creators resources necessary to fully document contextualized content the power of provenance possibilities available through a trinity of descriptive entities—records, agents, and functions the potential of “provenance rediscovery” in American repositories postmodern archive theory, multiple provenance, and the reconceptualization of archive context using ISAAR to document records-creating environments challenges inherent in implementing series-based systems of arrangement and description the National Archives and Records Administration (NARA) and the Archival Resource Catalog (ARC) digitizing and publishing registers and the development of the Online Heritage Resource Manager (OHRM) and many more! Ideal for archive professionals, manuscript librarians, students, and researchers of archival administration, Respect for Authority: Authority Control, Context Control, and Archival Description not only resolves important questions revealed by these new trends but opens new discussions of a major shift in descriptive practice.
