Pressure Vessel Design: The Direct Route Josef L Zeman,Franz Rauscher,Sebastian Schindler,2006-06-23 This book explores a new, economically viable approach to pressure vessel design, included in the (harmonized) standard EN 13445 (for unfired pressure vessels) and based on linear as well as non-linear Finite Element analyses. It is intended as a supporting reference of this standard's route, providing background information on the underlying principles, basic ideas, presuppositions, and new notions. Two in the Chest and One in the Head Jason Ramaker,2005-09 Jim Kellers just graduated from the police academy with aspirations to be a police officer. All he has to do is successfully complete seventeen weeks of training on the streets. Randy Sutherland is the police officer assigned to Jim's field training. His job is to teach Jim to survive on the streets, or terminate him if he can't learn to survive on his own. Along the way, Randy will have to protect Jim from the endless pranks police officers so dearly love to play on rookies. Manny Brand will be Jim's biggest test. An escaped convict with a U.S. Marshal hot on his trail, Manny will stop at nothing to gain his freedom. And that includes killing cops. I've already killed one cop. In Texas that means the electric chair, so what's to stop me from killing a few more?
