Shanice Solan

A Winter's Rose Tanya Anne Crosby,2019-03-21 Facing the grim prospect of a forced marriage to a feckless minion of King Stephen's, Rosalynde, the defiant youngest daughter of Morwen Pendragon takes matters into her own hands. With the help of her mother's spell book and a stolen wimple, she disguises herself as a plain, matronly nun and flees her loveless fate... Giles de Vere, lord of Warkworth, is facing his own arranged marriage--to Rose's sister, the reclusive Seren, reputed to be the loveliest woman in all of Wales. But destiny has its own wayward plans, and when the bold knight finds himself a reluctant champion to a runaway nun, he hasn't any clue of the lady's true identity. All he knows is that while Rose is far from beautiful, there's something magical about her that speaks to his heart...

Branches Of The Vine- Watch My Wheels Go Fast and Slow Shanice Solan,2021-10-23 The Branches Of The Vine series was created with the likeness of diversity in mind. No child should be left out because of their disability or special needs, neither should they be made to feel different from those around them in any negative way. The author Shanice Solan would like to bring awareness to children and parents who may encounter others with physical disabilities and or medical needs like the ones in this book's series. Some eat different from others, talk different from others, see, hear, play, walk, understand and move around different from others; But just like you and just like me, we have our own unique differences that make us who we are today. The Branches Of The Vine series dares you, to embrace that thing that makes you different. Be bold, wear that disability and or that special needs like it is the CAPE of your very own superhero.

Foundations for Ecological Research West of the Antarctic Peninsula Robin M. Ross,Eileen E. Hofmann,Langdon B. Quetin,1996-01-09 Published by the American Geophysical Union as part of the Antarctic Research Series, Volume 70. The Long-Term Ecological Research (LTER) Program was established in 1981 by the United States National Science Foundation in recognition of the need to study ecological processes over time spans longer than those of most research grants. The LTER Network now consists of 18 sites that span a variety of ecosystem types in the continental United States, Alaska, Puerto Rico, and Antarctica. The addition of the Palmer LTER at Palmer Station, Antarctica in October 1990 extended the geographical and ecological range of the LTER Network and provided the opportunity to link physical and ecological processes in the northern and southern hemispheres. One criterion for establishment of a LTER site is the existence of historical data and observations that can provide a basis for guiding research programs. Thus, the intent of this volume is to bring together meteorological, hydrographical, biological and ecological observations made in the general area west of the Antarctic Peninsula and to discuss the processes underlying the observations. This compilation of available data and observations in conjunction with the present understanding of processes provides the foundation for long?]term studies of the ecosystem in the western Antarctic Peninsula region.
