Dynamic Analysis of Switching-Mode DC/DC Converters Andre Kislovski, 2012-12-06 The most critical part of the modern switching-mode power supply is the regulated dc/dc converter. Its dynamic behavior directly determines or influences four of the important characteristics of the power supply: • Stability of the feedback loop • Rejection of input-voltage ripple and the closely-related transient response to input-voltage perturbation • Output impedance and the closely-related transient response to load perturbation • Compatibility with the input EMI filter Due to the complexity of the operation of the converter, predicting its dynamic behavior has not been easy. Without accurate prediction, and depending only on building the circuit and tinkering with it until the operation is satisfactory, the engineering cost can easily escalate and schedules can be missed. The situation is not much better when the circuit is built in the computer, using a general-purpose circuit-simulation program such as SPICE. (At the end of this book is a form for obtaining information on a computer program especially well suited for dynamic analysis of switching-mode power converters: DYANA, an acronym for DYnamic ANALysis. DYANA is based on the method given in this book.) The main goal of this book is to help the power-supply designer in the prediction of the dynamic behavior by providing user-friendly analytical tools, concrete results of already-made analyses, tabulated for easy application by the reader, and examples of how to apply the tools provided in the book.

Rural Poverty and Income Dynamics in Asia and Africa Keijiro Otsuka, Jonna P. Estudillo, Yasuyuki Sawada, 2008-11-19 Although there is much interest in poverty reduction, there are few agreed upon strategies to effectively reduce poverty. In this new book, the editors have gathered together various evidences on poverty dynamics, based on panel data from the last few decades in the Philippines, Thailand, Bangladesh and Tamil Nadu in India, compared with more recent data from sub-Saharan Africa. The major finding of this research project is that rural households in sub-Saharan Africa are beginning to experience the same pattern of structural change in income composition and poverty reduction that Asian households have experienced in the past 20-25 years. The chapters in the book explore how the spread of Green Revolution has triggered the subsequent transformation of rural economies. Many rural households in Asia have been able to move out of poverty in the presence of increasing scarcity of farmland initially by increasing rice income through the adoption of modern rice technology and gradually diversifying their income sources away from farm to non-farm activities. Increased participation in non-farm employment has been more pronounced among the more educated children, whose education is facilitated by an increase in farm income brought about by the Green Revolution. This book identifies the importance of Green Revolution and non-farm employment for poverty reduction in Asia, which provides valuable lessons for sub-Saharan Africa.

Explosion-Resistant Buildings M. Y. H. Bangash, T. Bangash, 2005-12-16 This excellent book highlights all aspects of the analysis and design of buildings subject to impact, explosion and fire. It is a definitive reference book and contains 10 chapters from a wide international perspective. Three-dimensional finite element and discrete element techniques are included. They are applied to buildings such as the World Trade Center (WTC Twin Towers) and the Federal Building in Oklahoma on the basis of the designers drawings, data and other information. Many small case studies are also included. The book has a comprehensive bibliography and a large appendix providing background analysis and computer subroutines of recently developed programs.
